3746.0003 Blue Wave Carwash CalEEMod Notes

Note 1. Land uses and sizes associated with development of the proposed project are drawn from CEI ENGINEERING ASSOCIATES, INC. Site Plans dated April 2, 2021; and Applicant-provided information provided on September 17, 2020. Land uses utilized in the model represent the following:

Retail > Automobile Care Center > 3.6 x 1,000 sq ft. = Car Wash

Parking > Parking Lot > 26 spaces (10,400 sq ft.) = parking space area

Parking > Non-Asphalt Surfaces > 33,976 SQ FT = sidewalks, walkways, other paved areas

Recreational > City Park > 0.27acres = Landscaping.

Note 2. According to Applicant-provided information, dated September 17, 2020, project construction is anticipated to occur from February 2022, to December, 2022. CalEEMod default construction activities, durations, and equipment were adjusted to reflect this. According to Applicant provided information approximately 3,190 cubic yards of soil would be exported during grading activities.

Note 3. During the proposed project construction model, all operational emission sources were reduced to zero to separate modeled construction emissions from operational emission results. During the proposed project operational models, all construction emission sources were reduced to zero to separate modeled construction and operational emission results.

Note 4. W-Trans produced a Focused Transportation Analysis for the proposed project, dated July 28, 2021, that analyzes the trip generation rates for the proposed project. The study relies on the 10th Edition Institute of Transportation Engineers (ITE) Manual for the daily rates for ITE Code LU 948, Automated Car Wash. According to the 10 Edition ITE Manual LU 948 results in the following peak hour trip rate (Rates per 1,000 sq ft): Wkday peak hour - 11.66 and Sat peak hour - 30.40.

Trip generation rates for all other land uses in the model were reduced to zero as project trips are captured in the Automated Car Wash land use. Pass-by trips for the project's car wash use are not included in the ITE Handbook, so W-Trans used the Gasoline Service Station (ITE LU 944) as a reference and it was assumed that 25 percent of the proposed car wash trips would be by pass-by trips. The project is estimated to generate 82 trips during the weekend peak hour with 41 entering the site and 41 exiting. Since the trip rates are given for only the peak hour, the daily trip rate was calculated as follows:

Weekday: $11.66 \text{ trips per hour} \times 10 = 116.6 \text{ trips per day}$

Weekend: $30.40 \text{ trips per hour} \times 10 = 304.0 \text{ trips per day}.$

Peak hour	Daily Rate		
per 1 k sq ft	per 1 k sq ft	Unit	Trips
11.66	116.60	3.6	419.76
30.4	304.00	3.6	1094.4

419.76 x 5 (Monday – Friday) = 2,099 customers

1,094.4 x 2 (Saturday and Sunday) = 2,189 customers

Total number of customers per 7 days = 4,288

4,288 customers per 7 days x 52 weeks in a year = 222,976 customers per year.

Note 5. BAAQMD *Basic Construction Mitigation Measures Recommended For All Proposed Projects* was applied to this project. This includes watering exposed areas at minimum twice per day and limiting construction vehicle speeds to 15 miles per hour on unpaved roads.

Note 6. For a conservative analysis, the proposed project is assumed to operate 365 days per year, resulting in 222,976 annual customers. According to the International Carwash Association's 2018 study *Water Use, Evaporation and Carryout: Conveyor Car Washes*, an average of 30 gallons of water is used per vehicle at facilities in the study. Because the City of Pittsburg does not have any regulations requiring full-service car washes to have water recycling systems, the proposed project is assumed to not have one for a conservative estimate. Therefore, 30 gallons of water use for each of the estimated 222,976 annual customers would result in an estimated 6,689,280 gallons of water used per year.

Note 7. The Off-site Improvements are shown as asphalt pavement because the project would connect to an existing water main within the median of East Leland Drive. The water main is approximately 45 linear feet from the proposed project's water line. For modeling purposes, FCS assumed that connecting to the water main would result in a 6-foot wide 45-foot long area. As a result, 270 square feet of asphalt paving is included in the Land Use portion of the model.

<i>Amortized Construction Emissions (30 years)</i>									<i>9.8</i>
Total Operational GHG Emissions (MTCO₂e/year)									152.8

Note:

All operational emissions were taken from the Mitigated model results to account for BAAQMD and City requirements. For GHG emissions, only non-biogenic CO₂e emissions are included in the project's operational GHG emissions, per BAAQMD's 2017 CEQA Air Quality Guidelines. In addition, per BAAQMD's 2017 CEQA Air Quality Guidelines, stationary source GHG emissions are separated from the project's operational GHG emissions and analyzed against the BAAQMD's stationary source threshold.

OEHHA Cancer/BAAQMD Risk Methodology

$$\text{Cancer Risk} = \text{DPM} \times \text{CPF} \times \text{ASF} \times \text{DBR} \times \text{ED} \times \text{EF} \times \text{TAH} \times \text{AF} / \text{AT}$$

Cancer Risk = probability of an individual contracting cancer out of a population of 1 million people over a lifetime exposure duration of 30 years

DPM = long-term average concentration of diesel PM as predicted by the air dispersion model (ug/m³)

CPF = cancer potency factor for DPM (mg.ke-day)

ASF = age sensitivity factors that are dependent on the age of the exposed individual (unitless)

DBR = daily breathing rates that are dependent on the age of the exposed individual (liters/kg-day)

ED = exposure duration (years)

EF = exposure frequency (days/year)

TAH = time at home factors that are dependent on the age of the exposed individual (%)

AT = averaging time over the lifetime of an individual (days)

AF = adjustment factor for workers and students (unitless)

Cancer Risk Equation Values as recommended by the California Office of Environmental Health Hazards Assessment

Project Health Risk Assessment

IPaC resource list

This report is an automatically generated list of species and other resources such as critical habitat (collectively referred to as *trust resources*) under the U.S. Fish and Wildlife Service's (USFWS) jurisdiction that are known or expected to be on or near the project area referenced below. The list may also include trust resources that occur outside of the project area, but that could potentially be directly or indirectly affected by activities in the project area. However, determining the likelihood and extent of effects a project may have on trust resources typically requires gathering additional site-specific (e.g., vegetation/species surveys) and project-specific (e.g., magnitude and timing of proposed activities) information.

Below is a summary of the project information you provided and contact information for the USFWS office(s) with jurisdiction in the defined project area. Please read the introduction to each section that follows (Endangered Species, Migratory Birds, USFWS Facilities, and NWI Wetlands) for additional information applicable to the trust resources addressed in that section.

Location

Contra Costa County, California

Local office

Sacramento Fish And Wildlife Office

☎ (916) 414-6600

📠 (916) 414-6713

Federal Building
2800 Cottage Way, Room W-2605
Sacramento, CA 95825-1846

Endangered species

This resource list is for informational purposes only and does not constitute an analysis of project level impacts.

The primary information used to generate this list is the known or expected range of each species. Additional areas of influence (AOI) for species are also considered. An AOI includes areas outside of the species range if the species could be indirectly affected by activities in that area (e.g., placing a dam upstream of a fish population even if that fish does not occur at the dam site, may indirectly impact the species by reducing or eliminating water flow downstream). Because species can move, and site conditions can change, the species on this list are not guaranteed to be found on or near the project area. To fully determine any potential effects to species, additional site-specific and project-specific information is often required.

Section 7 of the Endangered Species Act **requires** Federal agencies to "request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action" for any project that is conducted, permitted, funded, or licensed by any Federal agency. A letter from the local office and a species list which fulfills this requirement can **only** be obtained by requesting an official species list from either the Regulatory Review section in IPaC (see directions below) or from the local field office directly.

For project evaluations that require USFWS concurrence/review, please return to the IPaC website and request an official species list by doing the following:

1. Draw the project location and click CONTINUE.
2. Click DEFINE PROJECT.
3. Log in (if directed to do so).
4. Provide a name and description for your project.
5. Click REQUEST SPECIES LIST.

Listed species¹ and their critical habitats are managed by the [Ecological Services Program](#) of the U.S. Fish and Wildlife Service (USFWS) and the fisheries division of the National Oceanic and Atmospheric Administration (NOAA Fisheries²).

Species and critical habitats under the sole responsibility of NOAA Fisheries are **not** shown on this list. Please contact [NOAA Fisheries](#) for [species under their jurisdiction](#).

1. Species listed under the [Endangered Species Act](#) are threatened or endangered; IPaC also shows species that are candidates, or proposed, for listing. See the [listing status page](#) for more information. IPaC only shows species that are regulated by USFWS (see FAQ).
2. [NOAA Fisheries](#), also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

The following species are potentially affected by activities in this location:

Mammals

NAME

STATUS

Salt Marsh Harvest Mouse *Reithrodontomys raviventris* **Endangered**
 Wherever found
 No critical habitat has been designated for this species.
<https://ecos.fws.gov/ecp/species/613>

San Joaquin Kit Fox *Vulpes macrotis mutica* **Endangered**
 Wherever found
 No critical habitat has been designated for this species.
<https://ecos.fws.gov/ecp/species/2873>

Birds

NAME	STATUS
California Clapper Rail <i>Rallus longirostris obsoletus</i> Wherever found No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/4240	Endangered
California Least Tern <i>Sterna antillarum browni</i> Wherever found No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/8104	Endangered

Reptiles

NAME	STATUS
Giant Garter Snake <i>Thamnophis gigas</i> Wherever found No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/4482	Threatened

Amphibians

NAME	STATUS
California Red-legged Frog <i>Rana draytonii</i> Wherever found There is final critical habitat for this species. The location of the critical habitat is not available. https://ecos.fws.gov/ecp/species/2891	Threatened
California Tiger Salamander <i>Ambystoma californiense</i> There is final critical habitat for this species. The location of the critical habitat is not available. https://ecos.fws.gov/ecp/species/2076	Threatened

Fishes

NAME	STATUS
Delta Smelt <i>Hypomesus transpacificus</i> Wherever found There is final critical habitat for this species. Your location overlaps the critical habitat. https://ecos.fws.gov/ecp/species/321	Threatened

Insects

NAME	STATUS
Delta Green Ground Beetle <i>Elaphrus viridis</i> Wherever found There is final critical habitat for this species. The location of the critical habitat is not available. https://ecos.fws.gov/ecp/species/2319	Threatened
Lange's Metalmark Butterfly <i>Apodemia mormo langei</i> Wherever found There is proposed critical habitat for this species. The location of the critical habitat is not available. https://ecos.fws.gov/ecp/species/4382	Endangered
Valley Elderberry Longhorn Beetle <i>Desmocerus californicus dimorphus</i> Wherever found There is final critical habitat for this species. The location of the critical habitat is not available. https://ecos.fws.gov/ecp/species/7850	Threatened

Crustaceans

NAME	STATUS
Vernal Pool Fairy Shrimp <i>Branchinecta lynchi</i> Wherever found There is final critical habitat for this species. The location of the critical habitat is not available. https://ecos.fws.gov/ecp/species/498	Threatened
Vernal Pool Tadpole Shrimp <i>Lepidurus packardii</i> Wherever found There is final critical habitat for this species. The location of the critical habitat is not available. https://ecos.fws.gov/ecp/species/2246	Endangered

Flowering Plants

NAME	STATUS
------	--------

Antioch Dunes Evening-primrose *Oenothera deltoides* ssp. *howellii* **Endangered**
 Wherever found
 There is **final** critical habitat for this species. The location of the critical habitat is not available.
<https://ecos.fws.gov/ecp/species/5970>

Colusa Grass *Neostapfia colusana* **Threatened**
 Wherever found
 There is **final** critical habitat for this species. The location of the critical habitat is not available.
<https://ecos.fws.gov/ecp/species/5690>

Contra Costa Goldfields *Lasthenia conjugens* **Endangered**
 Wherever found
 There is **final** critical habitat for this species. The location of the critical habitat is not available.
<https://ecos.fws.gov/ecp/species/7058>

Contra Costa Wallflower *Erysimum capitatum* var. *angustatum* **Endangered**
 Wherever found
 There is **final** critical habitat for this species. The location of the critical habitat is not available.
<https://ecos.fws.gov/ecp/species/7601>

Keck's Checker-mallow *Sidalcea keckii* **Endangered**
 Wherever found
 There is **final** critical habitat for this species. The location of the critical habitat is not available.
<https://ecos.fws.gov/ecp/species/5704>

Soft Bird's-beak *Cordylanthus mollis* ssp. *mollis* **Endangered**
 Wherever found
 There is **final** critical habitat for this species. The location of the critical habitat is not available.
<https://ecos.fws.gov/ecp/species/8541>

Critical habitats

Potential effects to critical habitat(s) in this location must be analyzed along with the endangered species themselves.

This location overlaps the critical habitat for the following species:

NAME	TYPE
Delta Smelt <i>Hypomesus transpacificus</i> https://ecos.fws.gov/ecp/species/321#crithab	Final

Migratory birds

Certain birds are protected under the Migratory Bird Treaty Act¹ and the Bald and Golden Eagle Protection Act².

Any person or organization who plans or conducts activities that may result in impacts to migratory birds, eagles, and their habitats should follow appropriate regulations and consider implementing appropriate conservation measures, as described [below](#).

1. The [Migratory Birds Treaty Act](#) of 1918.
2. The [Bald and Golden Eagle Protection Act](#) of 1940.

Additional information can be found using the following links:

- Birds of Conservation Concern <http://www.fws.gov/birds/management/managed-species/birds-of-conservation-concern.php>
- Measures for avoiding and minimizing impacts to birds <http://www.fws.gov/birds/management/project-assessment-tools-and-guidance/conservation-measures.php>
- Nationwide conservation measures for birds <http://www.fws.gov/migratorybirds/pdf/management/nationwidestandardconservationmeasures.pdf>

The birds listed below are birds of particular concern either because they occur on the [USFWS Birds of Conservation Concern](#) (BCC) list or warrant special attention in your project location. To learn more about the levels of concern for birds on your list and how this list is generated, see the FAQ [below](#). This is not a list of every bird you may find in this location, nor a guarantee that every bird on this list will be found in your project area. To see exact locations of where birders and the general public have sighted birds in and around your project area, visit the [E-bird data mapping tool](#) (Tip: enter your location, desired date range and a species on your list). For projects that occur off the Atlantic Coast, additional maps and models detailing the relative occurrence and abundance of bird species on your list are available. Links to additional information about Atlantic Coast birds, and other important information about your migratory bird list, including how to properly interpret and use your migratory bird report, can be found [below](#).

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, click on the PROBABILITY OF PRESENCE SUMMARY at the top of your list to see when these birds are most likely to be present and breeding in your project area.

NAME

BREEDING SEASON (IF A
BREEDING SEASON IS INDICATED
FOR A BIRD ON YOUR LIST, THE
BIRD MAY BREED IN YOUR
PROJECT AREA SOMETIME WITHIN
THE TIMEFRAME SPECIFIED,
WHICH IS A VERY LIBERAL
ESTIMATE OF THE DATES INSIDE
WHICH THE BIRD BREEDS
ACROSS ITS ENTIRE RANGE.

"BREEDS ELSEWHERE" INDICATES
 THAT THE BIRD DOES NOT LIKELY
 BREED IN YOUR PROJECT AREA.)

Allen's Hummingbird *Selasphorus sasin*

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

<https://ecos.fws.gov/ecp/species/9637>

Breeds Feb 1 to Jul 15

California Thrasher *Toxostoma redivivum*

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Breeds Jan 1 to Jul 31

Costa's Hummingbird *Calypte costae*

This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA

<https://ecos.fws.gov/ecp/species/9470>

Breeds Jan 15 to Jun 10

Golden Eagle *Aquila chrysaetos*

This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities.

<https://ecos.fws.gov/ecp/species/1680>

Breeds Jan 1 to Aug 31

Lawrence's Goldfinch *Carduelis lawrencei*

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

<https://ecos.fws.gov/ecp/species/9464>

Breeds Mar 20 to Sep 20

Lewis's Woodpecker *Melanerpes lewis*

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

<https://ecos.fws.gov/ecp/species/9408>

Breeds Apr 20 to Sep 30

Nuttall's Woodpecker *Picoides nuttallii*

This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA

<https://ecos.fws.gov/ecp/species/9410>

Breeds Apr 1 to Jul 20

Oak Titmouse *Baeolophus inornatus*

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

<https://ecos.fws.gov/ecp/species/9656>

Breeds Mar 15 to Jul 15

Rufous Hummingbird *selasphorus rufus*

Breeds elsewhere

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

<https://ecos.fws.gov/ecp/species/8002>

Song Sparrow *Melospiza melodia*

Breeds Feb 20 to Sep 5

This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA

Spotted Towhee *Pipilo maculatus clementae*

Breeds Apr 15 to Jul 20

This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA

<https://ecos.fws.gov/ecp/species/4243>

Tricolored Blackbird *Agelaius tricolor*

Breeds Mar 15 to Aug 10

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

<https://ecos.fws.gov/ecp/species/3910>

Wrentit *Chamaea fasciata*

Breeds Mar 15 to Aug 10

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read and understand the FAQ "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any

week of the year. The relative probability of presence on week 12 is $0.25/0.25 = 1$; at week 20 it is $0.05/0.25 = 0.2$.

- The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

Breeding Season (■)

Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

Survey Effort (|)

Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

To see a bar's survey effort range, simply hover your mouse cursor over the bar.

No Data (—)

A week is marked as having no data if there were no survey events for that week.

Survey Timeframe

Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

Tell me more about conservation measures I can implement to avoid or minimize impacts to migratory birds.

[Nationwide Conservation Measures](#) describes measures that can help avoid and minimize impacts to all birds at any location year round. Implementation of these measures is particularly important when birds are most likely to occur in the project area. When birds may be breeding in the area, identifying the locations of any active nests and avoiding their destruction is a very helpful impact minimization measure. To see when birds are most likely to occur and be breeding in your project area, view the Probability of Presence Summary. [Additional measures](#) or [permits](#) may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

What does IPaC use to generate the migratory birds potentially occurring in my specified location?

The Migratory Bird Resource List is comprised of USFWS [Birds of Conservation Concern \(BCC\)](#) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the [Avian Knowledge Network \(AKN\)](#). The AKN data is based on a growing collection of [survey, banding, and citizen science datasets](#) and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle ([Eagle Act](#) requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the [AKN Phenology Tool](#).

What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?

The probability of presence graphs associated with your migratory bird list are based on data provided by the [Avian Knowledge Network \(AKN\)](#). This data is derived from a growing collection of [survey, banding, and citizen science datasets](#).

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go to the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

How do I know if a bird is breeding, wintering, migrating or present year-round in my project area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may refer to the following resources: [The Cornell Lab of Ornithology All About Birds Bird Guide](#), or (if you are unsuccessful in locating the bird of interest there), the [Cornell Lab of Ornithology Neotropical Birds guide](#). If a bird on your migratory bird species list has a breeding season associated with it, if that bird does occur in your project area, there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

What are the levels of concern for migratory birds?

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are [Birds of Conservation Concern](#) (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the [Eagle Act](#) requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

Details about birds that are potentially affected by offshore projects

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the [Northeast Ocean Data Portal](#). The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the [NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf](#) project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the [Diving Bird Study](#) and the [nanotag studies](#) or contact [Caleb Spiegel](#) or [Pam Loring](#).

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to [obtain a permit](#) to avoid violating the Eagle Act should such impacts occur.

Proper Interpretation and Use of Your Migratory Bird Report

The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated, and see options for identifying what other birds may be in your project area, please see the FAQ "What does IPaC use to generate the migratory birds potentially occurring in my specified location". Please be aware this report provides the "probability of presence" of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please also look

carefully at the survey effort (indicated by the black vertical bar) and for the existence of the "no data" indicator (a red horizontal bar). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list helps you know what to look for to confirm presence, and helps guide you in knowing when to implement conservation measures to avoid or minimize potential impacts from your project activities, should presence be confirmed. To learn more about conservation measures, visit the FAQ "Tell me about conservation measures I can implement to avoid or minimize impacts to migratory birds" at the bottom of your migratory bird trust resources page.

Facilities

National Wildlife Refuge lands

Any activity proposed on lands managed by the [National Wildlife Refuge](#) system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

THERE ARE NO REFUGE LANDS AT THIS LOCATION.

Fish hatcheries

THERE ARE NO FISH HATCHERIES AT THIS LOCATION.

Wetlands in the National Wetlands Inventory

Impacts to [NWI wetlands](#) and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local [U.S. Army Corps of Engineers District](#).

THERE ARE NO KNOWN WETLANDS AT THIS LOCATION.

Data limitations

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

Data exclusions

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tubercid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

Data precautions

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

Table 1: Special-status Plant Species Evaluated

Scientific Name Common Name	Status			Habitat Description ⁴	Occurrence Determination and Rationale ⁵
	USFWS ¹	CDFW ²	CNPS ³		
<i>Amsinckia grandiflora</i> Large-flowered fiddleneck	FE	SE	1B.1	Cismontane woodland, valley and foothill grassland in various soils. Elevation: 275-550 m. Bloom period: April-May	None: Project site does not contain suitable grassland or cismontane woodland habitat. The project site has been subjected to many years of anthropogenic disturbances. This species was not observed during the field survey.
<i>Arctostaphylos auriculata</i> Mt. Diablo manzanita	—	—	1B.3	Chaparral, cismontane woodland. In canyons and on slopes; on sandstone. Elevation: 180-565 m. Bloom period: January-March	None: Project site does not contain chaparral or cismontane woodland habitats that support this species.
<i>Blepharizonia plumosa</i> Big tarplant	—	—	1B.1	Valley and foothill grassland. Often in dry hills and plains in annual grassland. Clay to clay-loam soils; usually on slopes and often in burned areas. Elevation: 60-505 m. Bloom period: July-October	None: Project site does not contain valley or foothill grassland habitats that support this species. The project site has been subjected to many years of anthropogenic disturbances.
<i>Calochortus pulchellus</i> Mt. Diablo fairy-lantern	—	—	1B.2	Chaparral, cismontane woodland, riparian woodland, valley and foothill grassland. On wooded and brushy slopes. Elevation: 45-915 m. Bloom period: April-June	None: The project site does not contain chaparral, woodland or grassland habitat on wooded or brushy slopes to support this species. This species was not observed during the field survey.
<i>Cicuta maculata</i> var. <i>bolanderi</i> Bolander's water-hemlock	—	—	2B.1	Marshes and swamps. In fresh or brackish water. Elevation: 0-20 m. Bloom period: July-September	None: Project site does not contain marshes or swamps that support this species.
<i>Cryptantha hooveri</i> Hoover's cryptantha	—	—	1A	Valley and foothill grassland, inland dunes. In coarse sand. Elevation: 50-365 m. Bloom period: April-May	None: The project site has been subjected to many years of anthropogenic disturbances. No dune habitat is habitat present onsite.
<i>Eriogonum nudum</i> var. <i>psychicola</i> Antioch Dunes buckwheat	—	—	1B.1	Grows on the Antioch Dunes (interior dune system) with <i>Lupinus albifrons</i> , <i>Gutierrezia californica</i> , and introduced grasses and other weeds. Primary host plant for endangered Lange's metalmark butterfly. Elevation: 0-20 m. Bloom period: July-October	None: Project site does not contain dune habitat and is located outside the Antioch Dunes.

Scientific Name Common Name	Status			Habitat Description ⁴	Occurrence Determination and Rationale ⁵
	USFWS ¹	CDFW ²	CNPS ³		
<i>Eriogonum truncatum</i> Mt. Diablo buckwheat	—	—	1B.1	Chaparral, coastal scrub, valley and foothill grassland. Dry, exposed clay or sandy substrates Elevation: 105-350 m. Bloom period: April-September	None: The project site does not contain chaparral, coastal scrub, or valley and foothill grassland habitats. The project site lacks suitable substrates. This species was not observed during the field survey.
<i>Eryngium jepsonii</i> Jepson's coyote-thistle	—	—	1B.2	Vernal pools, valley and foothill grassland on clay soils. Elevation: 3-305 m. Bloom period: April-August	None: Project site does not contain vernal pools, or valley and foothill grassland habitat to support this species. This species was not observed during the field survey.
<i>Erysimum capitatum</i> var. <i>angustatum</i> Contra Costa wallflower	FE	SE	1B.1	Inland dunes. Stabilized dunes of sand and clay near Antioch along the San Joaquin River Elevation: 3-10 m. Bloom period: March-July	None: The project site does not contain suitable habitat to support this species. This species was not observed during the field survey.
<i>Eschscholzia rhombipetala</i> Diamond-petaled California poppy	—	—	1B.1	Valley and foothill grassland. Alkaline, clay slopes and flats. Elevation: 30-625 m. Bloom period: March-April	None: The project site does not contain suitable habitat to support this species.
<i>Helianthella castanea</i> Diablo helianthella	—	—	1B.2	Broadleafed upland forest, chaparral, cismontane woodland, coastal scrub, riparian woodland, valley and foothill grassland. Usually in chaparral/oak woodland interface in rocky, azonal soils. Often in partial shade Elevation: 45-1070 m. Bloom period: March-June	None: Project site does not contain chaparral or oak woodland habitat and does not contain azonal soils or conditions to support this species. This species was not observed during the field survey.
<i>Hesperolinon breweri</i> Brewer's western flax	—	—	1B.2	Chaparral, cismontane woodland, valley and foothill grassland. Often in rocky serpentine soil in chaparral and grassland. Elevation: 195-910 m. Bloom period: May-July	None: The project site does not contain chaparral, cismontane woodland, or valley and foothill grassland and does not contain serpentine soils to support this species. This species was not observed during the field survey.
<i>Lasthenia conjugens</i> Contra Costa goldfields	FE	—	1B.1	Vernal pools, swales, low depressions, in open grassy areas. Elevation: 1-450 m. Bloom period: March-June	None: Project site does not contain suitable habitat to support this species. This species was not observed during the field survey.
<i>Lathyrus jepsonii</i> var. <i>jepsonii</i> Delta tule pea	—	—	1B.2	Marshes and swamps. In freshwater and brackish marshes, often on marsh and slough edges. Elevation: 0-5 m. Bloom period: May-July	None: Project site does not contain marshes, swamps, or sloughs to support this species. This species was not observed during the field survey.

Scientific Name Common Name	Status			Habitat Description ⁴	Occurrence Determination and Rationale ⁵
	USFWS ¹	CDFW ²	CNPS ³		
<i>Lilaeopsis masonii</i> Mason's lilaeopsis	—	CR	1B.1	Marshes and swamps, riparian scrub. Tidal zones, in muddy or silty soil formed through river deposition or riverbank erosion. In brackish or freshwater. Elevation: 0-10 m. Bloom period: April-November	None: The project site does not contain suitable aquatic habitat to support this species. This species was not observed during the field survey.
<i>Limosella australis</i> Delta mudwort	—	—	2B.1	Riparian scrub, marshes and swamps. Usually on mud banks of the Delta in marshy or scrubby riparian associations; Elevation: 0-5 m. Bloom period: April	None: The project site lacks riparian habitat, marshes, or swamps to support this species.
<i>Madia radiata</i> Showy golden madia	—	—	1B.1	Valley and foothill grassland, cismontane woodland. Mostly on adobe clay in grassland or among shrubs. Elevation: 75-1220 m. Bloom period: March-May	None: Project site does not contain valley and foothill grassland, cismontane woodland, or suitable substrate to support this species.
<i>Malacothamnus hallii</i> Hall's bush-mallow	—	—	1B.2	Chaparral, coastal scrub. Some populations are found on serpentine. Elevation: 10-735 m. Bloom period: March-September	None: The project site does not contain chaparral or coastal scrub habitat to support this species. This species was not observed during the field survey.
<i>Navarretia nigelliformis ssp. radians</i> Shining navarreita	—	—	1B.2	Cismontane woodland, valley and foothill grassland, vernal pools. Elevation: 60-975 m. Bloom period: April-July	None: The project site does not contain vernal pool habitat. The grasslands present have been subjected to many years of anthropogenic disturbances. This species was not observed during the field survey.
<i>Oenothera deltoides ssp. howellii</i> Antioch Dunes evening-primrose	FE	SE	1B.1	Interior dunes. Remnant river bluffs and sand dunes east of Antioch. Elevation: 1-15 m. Bloom period: March-September	None: The project site does not contain dune habitat to support this species. This species was not observed during the field survey.
<i>Senecio aphanactis</i> Chaparral ragwort	—	—	2B.2	Chaparral, cismontane woodland, coastal scrub. Drying alkaline flats. Elevation: 20-1020 m. Bloom period: January-April	None: The project site does contain chaparral, woodland, or coastal scrub habitat to support this species.

Scientific Name Common Name	Status			Habitat Description ⁴	Occurrence Determination and Rationale ⁵
	USFWS ¹	CDFW ²	CNPS ³		
<i>Symphyotrichum lentum</i> Suisun Marsh aster	—	—	1B.2	Marshes and swamps (brackish and freshwater). Most often seen along sloughs with Phragmites, Scirpus, blackberry, Typha, etc. Elevation: 0-15 m. Bloom period: March-November	None: The project site does not contain marsh or swamp habitat to support this species. This species was not observed during the field survey.
<i>Tropidocarpum capparideum</i> Caper-fruited tropidocarpum	—	—	1B.1	Valley and foothill grassland on alkaline clay Elevation: 0-360 m. Bloom period: March-April	None: The project site does not contain valley or foothill grassland with alkaline soils.

Table 2: Special-status Wildlife Species Evaluated

Scientific Name Common Name	Status		Habitat Description ³	Potential to Occur and Rationale ⁴
	USFWS ¹	CDFW ²		
Amphibians				
<i>Ambystoma californiense</i> California tiger salamander	FT	ST WL	Found in grassland, oak savanna, edges of mixed woodland and lower elevation coniferous forest. Nocturnal, and fossorial, spending most time underground in animal burrows, especially those of California ground squirrels, valley pocket gophers, and moles. This salamander needs both suitable upland terrestrial habitat with mammal burrows for refuge and temporary breeding ponds in order to survive.	None: The project site does not contain suitable habitat to support this species. The nearest recorded occurrence is located approximately 1.9 miles south of the site within a former stockpond. Dispersal barriers between this occurrence and the project site are present in the form of extensive urban development.
<i>Rana draytonii</i> California red-legged frog	FT	— SSC	Lowlands and foothills in or near permanent sources of deep water with dense, shrubby or emergent riparian vegetation. Requires 11-20 weeks of permanent water for larval development. Must have access to estivation habitat.	None: The project site does not contain riparian habitat or other aquatic features that contain permanent water. The nearest recorded occurrence is located approximately 1.7 miles southeast of the site within Markley Canyon Creek. Due to the shallow nature of the creek, it was noted that this occurrence location provided estivation and not breeding habitat. Dispersal barriers between this occurrence and the project site are present in the form of extensive urban development.
Birds				
<i>Athene cunicularia</i> burrowing owl	— MBTA	— SSC	Found in open, dry annual or perennial grasslands, deserts, and scrublands characterized by low-growing vegetation. A subterranean nester, dependent upon burrowing mammals, most notably the California ground squirrel (<i>Otospermophilus beecheyi</i>).	Low: This species is covered under the East Contra Costa County Habitat Conservancy (ECCHC). The project site does contain marginal grassland habitat to support this species. However, no suitable ground squirrel burrow complexes or signs of burrowing owl presence were observed during the June 2021 field survey. The nearest recorded occurrence is located approximately 1.8 miles southeast of the site
<i>Aquila chrysaetos</i> Golden eagle	— MBTA	— FP	Rolling foothills, mountain areas, sage-juniper flats, and desert. Cliff-walled canyons provide nesting habitat in most parts of range; also, large trees in open areas.	Low: This species is covered under the ECCHC. The project site contains two trees that have the potential to support nesting habitat for golden eagle, although this species often prefers nesting on cliff sides. Other mature trees are present in adjacent urban/landscaped areas and small patches of undeveloped land provide potential foraging habitat within 0.5 mile of the project site. No golden eagles or nests were observed during the June 2021 field survey, either within the project site or the 0.5-mile survey buffer. The nearest recorded occurrence for this species is approximately 5 miles to the southwest of the project site.

Scientific Name Common Name	Status		Habitat Description ³	Potential to Occur and Rationale ⁴
	USFWS ¹	CDFW ²		
<i>Buteo swainsoni</i> Swainson's hawk	— MBTA	ST	Breeds in grasslands with scattered trees, juniper-sage flats, riparian areas, savannahs, & agricultural or ranch lands with groves or lines of trees. Requires adjacent suitable foraging areas such as grasslands, or alfalfa or grain fields supporting rodent populations.	Low: This species is covered under the ECCHC. The project site contains two trees that have the potential to support nesting habitat for Swainson's hawk. Other mature trees are present in urban/landscaped areas and small patches of undeveloped land provide potential foraging habitat within 1,000 feet of the project site. No Swainson's hawks or nests were observed during the June 2021 field survey, either within the project site or the 1,000-foot survey buffer. The nearest recorded occurrence for this species is approximately 5 miles to the east of the project site.
<i>Elanus leucurus</i> white-tailed kite	— MBTA	— FP	Preferred habitat includes rolling foothills and valley margins with scattered oaks & river bottomlands or marshes next to deciduous woodland. Forages in open grasslands, meadows, or marshes. Often found perching and nesting in isolated, dense-topped trees.	Low. The project site contains trees that provide marginal nesting habitat. The general vicinity of the project site contains pockets of grassland habitat for foraging. Nearest recorded occurrence is 2.2 miles northeast of the project site.
<i>Geothlypis trichas sinuosa</i> Saltmarsh common yellowthroat	— MBTA	— SSC	Resident of the San Francisco Bay region, in fresh and saltwater marshes. Requires thick, continuous cover down to water surface for foraging; tall grasses, tule patches, willows for nesting.	None: The project site does not contain aquatic features including fresh or saltwater marshes to support this species.
<i>Laterallus jamaicensis coturniculus</i> California black rail	— MBTA	ST FP	Inhabits freshwater marshes, wet meadows and shallow margins of saltwater marshes bordering larger bays. Needs water depths of about 1 inch that do not fluctuate during the year and dense vegetation for nesting habitat.	None: The project site does not contain aquatic features including freshwater or saltwater marshes, or wet meadows to support this species.
<i>Melospiza melodia</i> Song sparrow	— MBTA	— SSC	Inhabits emergent freshwater marshes dominated by tules and cattails as well as riparian willow thickets. Needs moderately dense vegetation to supply cover for nests.	None: The project site does not contain riparian vegetation or aquatic features including marshes to support this species.
<i>Melospiza melodia maxillaris</i> Suisun song sparrow	— MBTA	— SSC	Resident of brackish-water marshes surrounding Suisun Bay. Inhabits cattails, tules and other sedges, and Salicornia; also known to frequent tangles bordering sloughs.	None: The project site does not contain hydrophytic vegetation or aquatic features including marshes to support this species.

Scientific Name Common Name	Status		Habitat Description ³	Potential to Occur and Rationale ⁴
	USFWS ¹	CDFW ²		
<i>Phalacrocorax auritus</i> Double-crested cormorant	— MBTA	—	Requires large water bodies big enough to support their mostly fish diet. However, they may roost and form breeding colonies on smaller lagoons or ponds. In addition to fishing waters, cormorants need high, airy perches to dry off and digest their meals (rocks, wires, tops of dead trees, ship masts). This species tend to form breeding colonies in clusters of trees in or near water. Nests can be on the ground, on rocks or reefs with no vegetation, or atop trees.	None: The project site does not contain suitable large water bodies capable of supporting this species.
<i>Sternula antillarum browni</i> California least tern	FE MBTA	SE FP	Nests along the coast from San Francisco Bay south to northern Baja California. Colonial breeder on bare or sparsely vegetated, flat substrates: sand beaches, alkali flats, land fills, or paved areas.	None: The project site does not contain coastal habit including sand beaches, or alkali flats to support this species.
Fish				
<i>Hypomesus transpacificus</i> Delta smelt	FT	SE	Sacramento-San Joaquin Delta. Seasonally in Suisun Bay, Carquinez Strait, and San Pablo Bay. Usually found in water with salinities < 2ppt.	None. The project site does not contain suitable aquatic habitat to support this species.
<i>Oncorhynchus mykiss irideus</i> (pop. 11) steelhead (central valley coast DPS)	FT	—	This population occurs in the Sacramento and San Joaquin rivers and their tributaries. Require cool, swift, shallow water & clean loose gravel for spawning, & suitably large pools in which to spend the summer. Minimum water depth for upstream migration is 18 cm. Water velocities greater than 3-4 m/sec may impede upstream progress.	None: The project site does not contain suitable aquatic habitat to support this species.
<i>Spirinchus thaleichthys</i> Longfin smelt	FC	ST	Found in open waters of estuaries, mostly in middle or bottom of water column. Prefers salinities between 15 and 30 ppt, but can also be found in either fresh or saltwater.	None: The project site does not contain suitable aquatic habitat to support this species.
Invertebrates				
<i>Apodemia mormo langei</i> Lange's metalmark butterfly	FE	—	Inhabits stabilized dunes along the San Joaquin River. Endemic to Antioch Dunes, Contra Costa County. Primary host plant is <i>Eriogonum nudum var auriculatum</i> ; feeds on nectar of other wildflowers, as well as host plant.	None: The project site does not contain dune habitat or floral resources to support this species.

Scientific Name Common Name	Status		Habitat Description ³	Potential to Occur and Rationale ⁴
	USFWS ¹	CDFW ²		
<i>Bombus crotchii</i> Crotch bumble bee	—	CE	Grassland and scrub areas, requiring a hotter and drier environment than other bumblebee species, and can only tolerate a very narrow range of climatic conditions. Nests underground, often in abandoned rodent dens	None: The project site does not contain suitable grassland and scrub areas to support this species.
<i>Bombus occidentalis</i> Western bumble bee	—	CE	Formerly found in large parts of California but has been reduced in abundance and is now mostly restricted to high meadows or coastal environments. Species requires floral resources, and undisturbed nest and overwintering sites.	None. The project site does not contain suitable high meadows or coastal environments, floral resources, and undisturbed nest sites to support this species.
<i>Branchinecta lynchi</i> Vernal pool fairy shrimp	FT	—	Endemic to the grasslands of the Central Valley, Central Coast mountains, and South Coast mountains, in astatic rain-filled pools. Inhabit small, clear-water sandstone-depression pools and grassed swale, earth slump, or basalt-flow depression pools.	None: The project site does not contain suitable aquatic features, including vernal pools, swales, or depressions to support this species.
Mammals				
<i>Lasiurus blossevillii</i> Western red bat	—	SSC	Roosts primarily in trees, 2-40 ft above ground, from sea level up through mixed conifer forests. Prefers habitat edges and mosaics with trees that are protected from above and open below with open areas for foraging.	Low: The project site contains two trees that provide marginal roosting habitat. The nearest recorded occurrence for this species is located approximately 4 miles to the east of the project site within the City of Antioch.
<i>Reithrodontomys raviventris</i> Salt-marsh harvest mouse	FE	SE FP	Only in the saline emergent wetlands of San Francisco Bay and its tributaries. Pickleweed is primary habitat, but may occur in other marsh vegetation types and in adjacent upland areas. Does not burrow; builds loosely organized nests. Requires higher areas for flood escape.	None: The project site does not contain saline emergent wetlands with associated pickleweed to support this species.
<i>Vulpes macrotis mutica</i> San Joaquin kit fox	FE	ST	Found in annual grasslands or grassy open stages with scattered shrubby vegetation. Need loose-textured sandy soils for burrowing, and suitable prey base.	None: The project site does not suitable habitat to support this species and is cut off from natural San Joaquin kit fox habitat by extensive urban development and high use traffic corridors. The site lacks the proper substrate including loose-textured sandy soils due to previous disturbances. The nearest recorded occurrence for this species is located 3 miles to the south of the project site. Moreover, the project site is not mapped within the “Suitable Core Habitat” or the “Suitable Low Use Habitat” as referenced in Appendix D of the ECCHC.

Scientific Name Common Name	Status		Habitat Description ³	Potential to Occur and Rationale ⁴
	USFWS ¹	CDFW ²		
Reptiles				
<i>Anniella pulchra</i> Northern California legless lizard	—	SSC	Sandy or loose loamy soils under sparse vegetation with chaparral, coastal dunes, and scrub. Soil moisture is essential. They prefer soils with a high moisture content	None: The project site does not contain chaparral, coastal dune, or scrub habitats and is cut off from natural Northern California legless lizard habitat by extensive urban development. Soils on site are highly compacted through previously disturbances. The nearest recorded occurrence is approximately 3 miles north of the project site from 1941 in an area composed of formerly undeveloped grasslands.
<i>Arizona elegans occidentalis</i> California glossy snake		SSC	Patchily distributed from the eastern portion of San Francisco Bay, southern San Joaquin Valley, and the Coast, Transverse, and Peninsular ranges, south to Baja California. Generalist reported from a range of scrub and grassland habitats, often with loose or sandy soils.	None: The project site does not contain grassland or scrub habitats and is cut off from natural California glossy snake habitat by extensive urban development. The nearest recorded occurrence is approximately 4.4 miles northeast of the project site within the Antioch Dunes.
<i>Emys marmorata</i> western pond turtle	—	— SSC	Found in ponds, lakes, rivers, streams, creeks, marshes, and irrigation ditches, with abundant vegetation, and either rocky or muddy bottoms, in woodland, forest, and grassland. In streams, prefers pools to shallower areas. Logs, rocks, cattail mats, and exposed banks are required for basking.	None: The project site does not contain aquatic features to support this species. The project site is surrounded by extensive urban development precluding the presence of this species.
<i>Masticophis lateralis euryxanthus</i> Alameda whipsnake	FT	ST	Typically found in chaparral and scrub habitats but will also use adjacent grassland, oak savanna and woodland habitats. Mostly south-facing slopes and ravines, with rock outcrops, deep crevices or abundant rodent burrows, where shrubs form a vegetative mosaic with oak trees and grasses.	None: The project site does not contain suitable habitat and the project site is cut off from natural Alameda whipsnake habitat by extensive urban development.

Required Information

Project Title: Blue Wave Car Wash

Local Government/Lead Agency: City of Pittsburg

Contact Person: Dr. Dana DePietro

Street Address: 1350 Treat Blvd. Ste. 380

City: Walnut Creek

Zip: 94597

Phone: 530.219.1432

Fax: _____

Email: ddepietro@fcs-intl.com; mdolan@fcs-intl.com

Specific Area Subject to Proposed Action

County: Contra Costa County

City/Community: City of Pittsburg

Project Description:

The applicant is proposing to develop a car wash and self-service vacuum facility on an approximately 1.36-acre site. The project would include a 100-foot drive-through vehicle wash tunnel, three 12.5-foot drive-through pay lanes, three drive through payment stations, and 22 vacuum stalls.

NAHC.ca.gov**Re: Native American Tribal Consultation, Pursuant to the Assembly Bill 52 (AB 52), Amendments to the California Environmental Quality Act (CEQA) (Chapter 532, Statutes of 2014), Public Resources Code Sections 5097.94 (m), 21073, 21074, 21080.3.1, 21080.3.2, 21082.3, 21083.09, 21084.2 and 21084.3, Blue Wave Car Wash Project, Contra Costa County**

To Dr. DePietro:

Pursuant to Public Resources Code section 21080.3.1 (c), attached is a consultation list of tribes that are traditionally and culturally affiliated with the geographic area of the above-listed project. Please note that the intent of the AB 52 amendments to CEQA is to avoid and/or mitigate impacts to tribal cultural resources, (Pub. Resources Code §21084.3 (a)) ("Public agencies shall, when feasible, avoid damaging effects to any tribal cultural resource.")

Public Resources Code sections 21080.3.1 and 21084.3(c) require CEQA lead agencies to consult with California Native American tribes that have requested notice from such agencies of proposed projects in the geographic area that are traditionally and culturally affiliated with the tribes on projects for which a Notice of Preparation or Notice of Negative Declaration or Mitigated Negative Declaration has been filed on or after July 1, 2015. Specifically, Public Resources Code section 21080.3.1 (d) provides:

Within 14 days of determining that an application for a project is complete or a decision by a public agency to undertake a project, the lead agency shall provide formal notification to the designated contact of, or a tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, which shall be accomplished by means of at least one written notification that includes a brief description of the proposed project and its location, the lead agency contact information, and a notification that the California Native American tribe has 30 days to request consultation pursuant to this section.

The AB 52 amendments to CEQA law does not preclude initiating consultation with the tribes that are culturally and traditionally affiliated within your jurisdiction prior to receiving requests for notification of projects in the tribe's areas of traditional and cultural affiliation. The Native American Heritage Commission (NAHC) recommends, but does not require, early consultation as a best practice to ensure that lead agencies receive sufficient information about cultural resources in a project area to avoid damaging effects to tribal cultural resources.

The NAHC also recommends, but does not require that agencies should also include with their notification letters, information regarding any cultural resources assessment that has been completed on the area of potential effect (APE), such as:

1. The results of any record search that may have been conducted at an Information Center of the California Historical Resources Information System (CHRIS), including, but not limited to:

- A listing of any and all known cultural resources that have already been recorded on or adjacent to the APE, such as known archaeological sites;
- Copies of any and all cultural resource records and study reports that may have been provided by the Information Center as part of the records search response;
- Whether the records search indicates a low, moderate, or high probability that unrecorded cultural resources are located in the APE; and
- If a survey is recommended by the Information Center to determine whether previously unrecorded cultural resources are present.

2. The results of any archaeological inventory survey that was conducted, including:

- Any report that may contain site forms, site significance, and suggested mitigation measures.

All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum, and not be made available for public disclosure in accordance with Government Code section 6254.10.

3. The result of any Sacred Lands File (SLF) check conducted through the Native American Heritage Commission was negative.

4. Any ethnographic studies conducted for any area including all or part of the APE; and

5. Any geotechnical reports regarding all or part of the APE.

Lead agencies should be aware that records maintained by the NAHC and CHRIS are not exhaustive and a negative response to these searches does not preclude the existence of a tribal cultural resource. A tribe may be the only source of information regarding the existence of a tribal cultural resource.

This information will aid tribes in determining whether to request formal consultation. In the event that they do, having the information beforehand will help to facilitate the consultation process.

If you receive notification of change of addresses and phone numbers from tribes, please notify the NAHC. With your assistance, we can assure that our consultation list remains current.

If you have any questions, please contact me at my email address: Sarah.Fonseca@nahc.ac.gov.

Sincerely,

Sarah Fonseca
Cultural Resources Analyst

July 6, 2021

Muwekma Ohlone Indian Tribe of the SF Bay Area
Monica Arellano, Vice Chairwoman
20885 Redwood Road, Suite 232
Castro Valley, CA, 94546

Subject: Proposed BlueWave Carwash Project

Dear Vice Chairwoman Arellano:

FirstCarbon Solutions (FCS) is preparing a cultural resources assessment for the proposed BlueWave Carwash Project on behalf of City of Pittsburg. As part of the environmental review process, we are searching for records pertaining to cultural resources in the area surrounding the project site described below. Attached is the Records Search map with a 0.5-mile buffer around the site for your reference.

BlueWave Express Car Wash and CEI Engineering (Applicant) is proposing a new stand-alone carwash to be located at 1160 E. Leland Road on an approximately 1.36-acre site. The project would include a 100-foot drive-through vehicle wash tunnel; three 12.5-foot drive-through pay lanes; three drive-through payment stations; 22 vacuum stalls and paved driveways.

As part of the cultural resources assessment, FCS conducted a Sacred Lands File (SLF) search and California Historical Resource Information System (CHRIS). However, due to delays related to the Global Pandemic, CHRIS results have not been received. The results of the SLF records search was negative and the Native American Heritage Commission (NAHC) suggested you might be able to provide further information. If you have any additional information regarding potential historic or cultural resources in proximity or relation to the proposed project area, we would greatly appreciate your input.

Please note that this letter is a request for information pertaining to a cultural resources assessment and is not notification of a project under Senate Bill (SB) 18, Assembly Bill (AB) 52 or Section 106 of the National Historic Preservation Act. Designated lead agencies under the California Environmental Quality Act (CEQA) and National Environmental Policy Act (NEPA) are handling project notification and consultation requirements. Please feel free to contact me at 925.357.2562 or via email at sgriffin@fcs-intl.com and thank you for your valuable assistance.

CITY OF PITTSBURG
BLUE WAVE CAR WASH

July 6, 2021

Muwekma Ohlone Indian Tribe of the SF Bay Area
Charlene Nijmeh, Chairperson
20885 Redwood Road, Suite 232
Castro Valley, CA, 94546

Subject: Proposed BlueWave Carwash Project

Dear Chairperson Nijmeh:

FirstCarbon Solutions (FCS) is preparing a cultural resources assessment for the proposed BlueWave Carwash Project on behalf of City of Pittsburg. As part of the environmental review process, we are searching for records pertaining to cultural resources in the area surrounding the project site described below. Attached is the Records Search map with a 0.5-mile buffer around the site for your reference.

BlueWave Express Car Wash and CEI Engineering (Applicant) is proposing a new stand-alone carwash to be located at 1160 E. Leland Road on an approximately 1.36-acre site. The project would include a 100-foot drive-through vehicle wash tunnel; three 12.5-foot drive-through pay lanes; three drive-through payment stations; 22 vacuum stalls and paved driveways.

As part of the cultural resources assessment, FCS conducted a Sacred Lands File (SLF) search and California Historical Resource Information System (CHRIS). However, due to delays related to the Global Pandemic, CHRIS results have not been received. The results of the SLF records search was negative and the Native American Heritage Commission (NAHC) suggested you might be able to provide further information. If you have any additional information regarding potential historic or cultural resources in proximity or relation to the proposed project area, we would greatly appreciate your input.

Please note that this letter is a request for information pertaining to a cultural resources assessment and is not notification of a project under Senate Bill (SB) 18, Assembly Bill (AB) 52 or Section 106 of the National Historic Preservation Act. Designated lead agencies under the California Environmental Quality Act (CEQA) and National Environmental Policy Act (NEPA) are handling project notification and consultation requirements. Please feel free to contact me at 925.357.2562 or via email at sgriffin@fcs-intl.com and thank you for your valuable assistance.

Subject: Re: 3746.0003 Tribal Consultation Request for the Proposed BlueWave Carwash Project

Dear Regan,

Thank you for your email. The Tribe is always concerned when a project is within half mile from a water source. The body of water that is included in the buffer zone that you have created, could you let us know if this is a man made water area or if it is pre/historical? Also are there other water ways that have been culverted in the area of the proposed project?

Thanks so much.

'Uni (Respectfully),

Corrina Gould, Tribal Chair

Confederated Villages of Lisjan Tribe

Hello,

Attached is a request for information pertaining to a cultural resources assessment for the proposed BlueWave Carwash Project in the City of Pittsburg. Please feel free to contact Stefanie Griffin at sgriffin@fcs-intl.com if you would like to provide input.

Thank you,

Regan Del Rosario

Table of Contents

Energy Calculations Workbook	1
Typical Construction Trailer—Annual	13

Blue Wave CarWash Energy Use Summary

Summary of Energy Use During Construction		(Annually)
Construction vehicle fuel		3,563 gallons (gasoline, diesel)
Construction equipment fuel		25,456 gallons (diesel)
Total construction fuel		29,019 gallons (gasoline, diesel)
Construction office electricity		11,210 kilowatt hours

Summary of Energy Use During Operations		(Annually)
Operation vehicle fuel		48,784 gallons (gasoline, diesel)
Operation natural gas		94,246 kilo-British Thermal Units
Operation electricity		32,800 kilowatt hours

Construction Vehicle Fuel Calculations

Re: Paleontological Records Search: Blue Wave Car Wash Project (3746.0003), City of Pittsburg, Contra Costa County

Dear Dr. DePietro:

As per the request of Madelyn Dolan, I have performed a records search on the University of California Museum of Paleontology (UCMP) database for the Blue Wave Car Wash project located in Pittsburg on the south side of East Leland Road and west of Loveridge Road. The Public Land Survey (PLS) location of the proposed project site is NW, NW¼, Sec. 21, T2N, R1E, Antioch North quadrangle (USGS 7.5-series topographic map). Google satellite imagery shows this to be an isolated, undeveloped, flat parcel with low vegetation; prior usage or disturbance is not evident. The applicant has proposed construction of a car wash and self-service vacuum facility on an approximately 1.36-acre site. The project would include a 100-foot drive-through vehicle wash tunnel, three 12.5-foot drive-through pay lanes, three drive through payment stations, and 22 vacuum stalls.

Geologic Units

According to the adjoined parts of the geologic maps by Dibblee and Minch (2006) and Sims et al. (1973) shown here, the project site (yellow outline at center) is on Pleistocene alluvium (Qoa). The site is on the older of the two maps where the surficial deposits were identified as Quaternary (Pleistocene-Holocene) alluvium (Qal), but the newer map to the west confirms its Pleistocene age. The surrounding half-mile search area (black dashed outline) also includes Holocene alluvium (Qa). Older Tertiary units occur to the south, just beyond the search perimeter, where the nearest is the Oro Loma Formation (Tol) of Pliocene and possibly early Pleistocene age.

UCMP Paleontological Records Search

The paleontological record search for this project focused on the Pleistocene of Contra Costa County. There are 63 Pleistocene localities in the County; the nearest to the project site is V6030 (Mokelumne Aqueduct No. 3,1) about one mile to the southeast, which yielded multiple skeletal elements of rodents. The composite Pleistocene vertebrate assemblage of 9,931 specimens represents the Rancholabrean NALMS (North American Land Mammal Stage), which spans the interval of 240–11 Kya. Appendix 1 is a systematic listing of this UCMP collection. There are no Pleistocene plant localities recorded for Contra Costa County.

Remarks and Recommendations

The project site is located on Pleistocene alluvium, which has a high paleontological sensitivity and low-to-moderate paleontological potential. The flat, vegetated surface of the project site precludes a preconstruction paleontological survey, but paleontological monitoring is recommended for all construction-related earth-disturbing activities that will impact previously undisturbed sediments. Should any significant paleontological resources (e.g., bones, teeth,) be unearthed, all construction activities should be diverted at least 15 feet from the find until a professional paleontologist has assessed it and, if deemed significant, salvaged the fossil(s) in a timely manner. Collected fossils should be deposited in an appropriate repository, such as the UCMP, where they will be properly curated and made available for future research.

Sincerely,

Re: Phase I Environmental Site Assessment

BlueWave Carwash Express
1160 East Leland Road
Pittsburg, California 94565
Contra Costa County

Environmental Assessment Specialists, Inc. (EAS) has completed a Phase I Environmental Site Assessment (ESA) for the above referenced site in accordance with the 2021 Master Services Agreement between EAS and FirstCarbon Solutions (Client), and in substantial compliance with the scope and limitations of the American Society of Testing Materials (ASTM), Standard Practices for ESAs: The Phase I ESA Process, Designation E1527-13. For the purpose of this report the entire land area associated with the address and/or APN is referred to as the Property, Subject Property, and/or Site.

According to the Contra Costa County Assessor's Office, the Property's Assessor Parcel Number (APN) is listed as 088-230-028 and located on the south side of East Leland Road in Pittsburg, Contra Costa County, California. Per the Assessor's Office, the Property address is 1160 East Leland Road. The Property is accessible via the public right-of-way located on the south side of East Leland Road.

The approximately 1.36-acre Property is primarily occupied by a vacant grass covered lot with scattered miscellaneous trash/debris. The western portion of the Property is occupied by an approximately 40' by 100' raised soil and gravel covered area. Three approximately 3' by 3' low soil piles are located in the southern-central portion of the Property and one approximately 3' by 3' low soil pile is located in the northern-central portion of the Property. In addition, an approximately 1' by 2' stained bare soil area is located in southwest portion of the Property. A sanitary sewer manhole, storm drain manhole, and Pacific Gas & Electric (PG&E) electrical vault are located in the northwest corner of the Property.

The Property is located in an area comprised primarily of commercial and residential land uses. EAS walked the Property, visually observing all accessible features. At the time of the site visit, the Property appeared to be in good condition but irregularly maintained. Proposed improvements include the construction of a one-story carwash (BlueWave Carwash Express) and its environs with paved parking areas and driveways and landscaped areas.

Historically, the Property appears to have been occupied by vacant land until at least 1939. From at least 1942 until at least 1959, the Property appeared occupied by residential troop buildings associated with the U.S. Army's Camp Stoneman. By 1963, the Camp Stoneman residential buildings were razed and the Property appeared as subsequent residential land uses until at least

1972. Due to the poor quality of the 1979 aerial photograph, it is not clear if portions of the Property were still occupied by any residential improvements, however by 1982 until at least May 2002, the Property appeared as part of a larger vacant lot. By October 2002, the Property appeared as part of a larger construction yard/staging area for the development of the east adjoining ARCO gasoline station and carwash. By July 2003, all construction equipment had been removed and the Property appeared as part of a larger vacant lot that included the west adjoining property until at least October 2009. By at least March 2010 to at least May 2010, the Property appeared as part of a construction yard/staging area for the development of the west adjoining DaVita Dialysis Center. By July 2010, all construction equipment had been removed and the and the Property appeared as a vacant lot. Of note, the present-day approximately 40' by 100' raised soil and gravel pile area appears as early as the July 2010 aerial photograph and is likely associated with the Property's former construction yard/staging area land use. The Property has appeared similar to present-day land uses since that time.

FINDINGS AND CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E1527-13 of 1160 East Leland Road in Pittsburg, Contra Costa County, California, the Property. Any exceptions to, or deletions from, this practice are described in Section 10.0 of this report. **This assessment has revealed no evidence of recognized environmental conditions in connection with the Property.**

However, the following business environmental risks (BERs) were identified which warrant mention:

Former Land Uses & Undocumented Soil

Historically, the Property has been occupied by vacant, various residential, then vacant land uses. By October 2002, the Property appeared as part of a larger construction yard/staging area for the development of the east adjoining ARCO gasoline station and carwash. By July 2003, all construction equipment had been removed and the Property appeared as part of a larger vacant lot that included the west adjoining property until at least October 2009. By at least March 2010 to at least May 2010, the Property appeared as part of a construction yard/staging area for the development of the west adjoining DaVita Dialysis Center. By July 2010, all construction equipment had been removed and the and the Property appeared as a vacant lot. Of note, the present-day approximately 40' by 100' raised soil and gravel pile area appears as early as the July 2010 aerial photograph and is likely associated with the Property's former construction yard/staging area land use. In addition, three approximately 3' by 3' low soil piles are located in the southern-central portion of the Property; one approximately 3' by 3' low soil pile is located in the northern-central portion of the Property; and one approximately 1' by 2' stained bare soil area is located in southwest portion of the Property.

As the Property is to undergo extensive grading/soil removal as part of a future redevelopment project into a carwash facility, EAS recommends that a program of subsurface sampling and testing be conducted in the areas of discussed above, as well as throughout the remainder of the Property, prior to any ground disturbance/construction activities. Once the analysis has been completed, the results would verify that contaminated soils above action levels are/are not present.

Asbestos-Containing Material/Lead-Based Paint (ACMs/LBP)

According to Client-provided information, initially the onsite carwash development project was to “require an offsite improvement to replace the water line from the median because it is eroded and has asbestos in it.” However, in a subsequent message, “The City let the applicant know that they will not be required to remove the water line. They can choose to instead install new water lines/taps for the water required for the development. It has not been decided how the applicant will proceed. If they chose to leave the older water line stub-out with asbestos in it, it would just get capped off/abandoned.”

Based on the above information, EAS recommends the presence of asbestos-containing materials (ACMs) be confirmed through a program of sampling and testing prior to any impacts or removal of the water line discussed above. Once the analysis has been completed, the results would verify that asbestos is / is not present.

It is up to the Client, based on their risk tolerance and applicable law, to determine the extent of further inquiry.

In addition, the following items warrant mention:

- Standard dust mitigation measures should be implemented during any future renovation, redevelopment, and/or soil handling activities. During any grading or excavation activities at the Property, redevelopment personnel must be made aware to look for unusual conditions suggesting buried debris or other potential adverse environmental conditions that may be discovered on the Property. In addition, **if any abnormal soils are discovered during future redevelopment, such as stained soils, hydrocarbon odors, or any other unusual odors, all construction activities should be stopped immediately and EAS should be contacted for further assessment and monitoring.**

1.0 INTRODUCTION

The purpose of this Phase I ESA was to identify recognized environmental conditions associated with the Property. To achieve this objective, the Phase I ESA included visual observations of the Property and observations of the surrounding properties, a visual survey for suspect asbestos-containing materials/debris piles/lead-based paint, limited historical land use review, review of regulatory database listings, and reviews of readily available geologic and hydrogeologic data. This report represents a summary of these findings. A parcel map, site plans, area map, site photographs, historical aerial photos and topographic maps, wetlands map, flood hazard map, fire insurance map report, city directory abstract, regulatory database report, questionnaires, and supporting documentation are included as attachments to this report.

EAS visually observed the Property on August 23, 2021, to identify potential sources or indications of chemical contamination such as USTs, aboveground storage tanks (ASTs), PCBs, chemicals and hazardous waste materials, areas with surficial staining or distressed vegetation, and visual evidence of ACMs and/or LBP. Lands immediately adjoining to the Property were visually inspected for possible sources of contamination or environmental impairment, which could migrate to the Property via surface water runoff, groundwater transport, and other pathways. EAS conducted a regulatory records review, reviewed historical aerial photographs, historical maps, building permits (upon availability), and contacted and interviewed property representatives and regulatory agencies as necessary.

2.0 SITE LOCATION and DESCRIPTION

According to the Contra Costa County Assessor's Office, the Property's Assessor Parcel Number (APN) is listed as 088-230-028 and located on the south side of East Leland Road in Pittsburg, Contra Costa County, California. Per the Assessor's Office, the Property address is 1160 East Leland Road. The Property is accessible via the public right-of-way located on the south side of East Leland Road.

The approximately 1.36-acre Property is primarily occupied by a vacant grass covered lot with scattered miscellaneous trash/debris. The western portion of the Property is occupied by an approximately 40' by 100' raised soil and gravel covered area. Three approximately 3' by 3' low soil piles are located in the southern-central portion of the Property and one approximately 3' by 3' low soil pile is located in the northern-central portion of the Property. In addition, an approximately 1' by 2' stained bare soil area is located in southwest portion of the Property. A sanitary sewer manhole, storm drain manhole, and Pacific Gas & Electric (PG&E) electrical vault are located in the northwest corner of the Property.

The Property is located in an area comprised primarily of commercial and residential land uses. EAS walked the Property, visually observing all accessible features. At the time of the site visit, the Property appeared to be in good condition but irregularly maintained. Proposed improvements include the construction of a one-story carwash (BlueWave Carwash Express) and its environs with paved parking areas and driveways and landscaped areas.

Historically, the Property appears to have been occupied by vacant land until at least 1939. From at least 1942 until at least 1959, the Property appeared occupied by residential troop buildings associated with the U.S. Army's Camp Stoneman. By 1963, the Camp Stoneman residential buildings were razed and the Property appeared as subsequent residential land uses until at least 1972. Due to the poor quality of the 1979 aerial photograph, it is not clear if portions of the Property were still occupied by any residential improvements, however by 1982 until at least May

2002, the Property appeared as part of a larger vacant lot. By October 2002, the Property appeared as part of a larger construction yard/staging area for the development of the east adjoining ARCO gasoline station and carwash. By July 2003, all construction equipment had been removed and the Property appeared as part of a larger vacant lot that included the west adjoining property until at least October 2009. By at least March 2010 to at least May 2010, the Property appeared as part of a construction yard/staging area for the development of the west adjoining DaVita Dialysis Center. By July 2010, all construction equipment had been removed and the Property appeared as a vacant lot. Of note, the present-day approximately 40' by 100' raised soil and gravel pile area appears as early as the July 2010 aerial photograph and is likely associated with the Property's former construction yard/staging area land use. The Property has appeared similar to present-day land uses since that time.

3.0 PHYSICAL SETTING

Based on the United States Geological Survey (USGS) *Antioch North, CA 7.5-Minute Quadrangle* (1:24,000), the Property has an average elevation of approximately 20 feet above mean sea level with slight gradients descending toward the north-northeast. Storm water runoff is expected to flow off the Property to the north-northeast.

According to the USGS, Geologic Map of California (2012), the Property appears to be underlain by Quaternary alluvial deposits consisting of unconsolidated and semi-consolidated clay, silt, sand, and gravel.

According to information obtained from the State Water Resources Control Board, GeoTracker regulated facilities database, groundwater in the vicinity of the Property is expected to be over 50 feet below the ground surface (based on the closest 2020 measurements from an investigation located approximately one mile west of the Property). Groundwater would generally be expected to follow local topography and flow towards the north-northeast. Therefore, areas and properties located south-southwest of the Property are considered upgradient. However, actual groundwater flow direction is often locally influenced by factors such as rainfall, geologic structure, seasonal fluctuations, soil and bedrock geology, production wells, and other factors beyond the scope of this study. The actual groundwater flow direction under the site can be accurately determined only by installing groundwater monitoring wells, which was beyond this scope of this project.

4.0 SITE RECONNAISSANCE and OBSERVATION

On August 23, 2021, EAS personnel conducted a site reconnaissance of the Property. The site reconnaissance is documented in the site photographs (Appendices). The EAS representative was unaccompanied at the Property during the site visit. In addition, a walk along the perimeter of the Property and a drive around roads in the immediate area were conducted. At the time of the site visit, the weather was clear.

The purpose of the site reconnaissance was to visually and physically observe the Property, any onsite structures, and adjoining properties for conditions indicating an existing release, past release, or threatened release of any hazardous substances or petroleum products into structures of the site, or into soil and/or groundwater beneath the site. This would include any evidence of contamination, distressed vegetation, petroleum-hydrocarbon staining, waste drums, illegal dumping, or improper waste storage/handling.

Underground Storage Tanks/Aboveground Storage Tanks (USTs/ASTs)

No visual evidence (e.g. pipes, vents, pumps, and stains) that would indicate the past or present use of petroleum hydrocarbon underground storage tanks (USTs) or leaking aboveground storage tanks (ASTs) on or immediately upgradient of the Property was readily apparent during the site visit. In addition, the Property was not listed in the underground or aboveground fuel storage tank databases within the government records/regulatory database report (FirstSearch Report).

Leaking Underground Storage Tanks (LUSTs)

No evidence for the presence of leaking underground storage tanks was observed on or adjacent to the Property was observed during the site reconnaissance.

Dry Cleaners

No dry-cleaning activity was observed on or adjacent to the Property during the site reconnaissance.

Solid Waste Disposal

Scattered miscellaneous trash/debris was observed throughout the Property. No evidence of significant solid waste disposal was observed on or adjacent to the Property during the site reconnaissance.

Landfills

The western portion of the Property is occupied by an approximately 40' by 100' raised soil and gravel covered area. Three approximately 3' by 3' low soil piles are located in the southern-central portion of the Property and one approximately 3' by 3' low soil pile is located in the northern-central portion of the Property.

No additional evidence of landfills was observed on or adjacent to the Property during the site reconnaissance.

Polychlorinated Biphenyls (PCBs)

No leaking or stained equipment that would have the potential to contain PCBs (e.g., transformers, capacitors, light ballasts, hydraulic equipment) was observed at the Property during the site reconnaissance.

Waste Management and Chemical Handling

No significant quantities of hazardous materials were observed on or adjacent to the Property during the site reconnaissance.

Underground Oil or Gas Pipelines

No markers indicating the presence of underground oil or gas pipelines were observed on or adjacent to the Property during the site reconnaissance.

Asbestos-Containing Material/Lead-Based Paint (ACMs/LBP)

No suspect asbestos-containing material or lead-based paint was observed at the Property during the site reconnaissance.

According to Client-provided information, initially the onsite carwash development project was to “require an offsite improvement to replace the water line from the median because it is eroded and has asbestos in it.” However, in a subsequent message, “The City let the applicant know that they will not be required to remove the water line. They can choose to instead install new water lines/taps for the water required for the development. It has not been decided how the applicant will proceed. If they chose to leave the older water line stub-out with asbestos in it, it would just get capped off/abandoned.”

Based on the above information, EAS recommends the presence of asbestos-containing materials (ACMs) be confirmed through a program of sampling and testing prior to any impacts or removal of the water line discussed above. Once the analysis has been completed, the results would verify that asbestos is / is not present.

Stained Soil or Asphalt Patches

An approximately 1’ by 2’ stained bare soil area is located in southwest portion of the Property.

No additional asphalt patches or stained soil were observed on or adjacent to the Property during the site reconnaissance.

Pits, Ponds, or Lagoons

No pits, ponds, or lagoons were observed on or adjacent to the Property during the site reconnaissance.

Radon

Radon gas is a naturally occurring radioactive gas that is invisible and odorless. Radon forms from the radioactive decay of small amounts of uranium and thorium naturally present in rocks and soils, so some radon exists in all rocks and soils. Because radon is a gas, it can easily move through soil and cracks in building slabs or basement walls and concentrate in a building’s indoor air. According to the City-Data.com map of radon zones, twenty-nine (29) radon tests have taken place in sites located within the Property’s zip code of 94565, and two (2) tests came back positive for radon levels of 4 picoCuries per liter (pCi/L) or above, which is the State of California’s recommended action level. Contra Costa County is listed in Radon Zone 2 (Moderate Potential); counties that have a predicted average indoor radon screening level between 2 and 4 pCi/L. Based on this information, the presence of onsite radon levels above California’s recommended action level is unlikely.

Clarifiers or Sumps

No clarifiers or sumps were observed on or adjacent to the Property during the site reconnaissance.

Onsite Wells

No onsite wells were observed on or adjacent to the Property during the site reconnaissance.

Septic Systems

Septic systems are important, as they can be a venue for mismanagement of hazardous or regulated wastes. No evidence of septic systems was observed on or adjacent to the Property during the site reconnaissance.

Air Emissions and Odors

No air emissions or odors were observed or noted to be emanating from the Property during the site reconnaissance.

Flood Zone

According to the Federal Emergency Management Agency (FEMA), National Flood Hazard Layer (NFHL) Viewer, Map Panel 06013C0138G (Effective Date 9/30/2015), the Property is located within Zone X, Area of Minimal Flood Hazard (flood hazard areas determined to be outside the 0.2% annual chance floodplain). Please see FEMA Flood Insurance Rate Map (FIRM) in the Appendices.

Wetlands Designation

According to a review of the U.S. Fish and Wildlife Service National Wetlands Inventory Mapper as viewed on <http://www.fws.gov/wetlands/Data/Mapper.html>, no wetlands are located on or adjoining to the Property.

Pesticides/Herbicides

No pesticides or herbicides were observed being stored or used within the Property during the site reconnaissance.

Demolition Debris

No evidence of demolition debris was observed on or adjacent to the Property during the site reconnaissance.

Stressed Vegetation

No evidence of visibly stressed vegetation was observed on or adjacent to the Property during the site reconnaissance.

5.0 ADJOINING PROPERTIES

EAS conducted a reconnaissance of the adjoining properties to evaluate the potential for off-site impacts. These would include evidence of improper chemical storage or usage, surface staining or leakage, distressed vegetation, or evidence of dumping. A visual inspection from the public right-of-way did not reveal any issues of concern.

Direction	Description
North	East Leland Road followed by a multi-family residential development (110 Dias Circle); Planet Fitness (2240 Loveridge Road); and an IHOP Restaurant (2290 Loveridge Road)
East	ARCO gasoline station and car wash (1190 East Leland Road)
South	Multi-family residential development (500 Loveridge Circle)
West	DaVita Delta View Dialysis Center (1190 East Leland Road)
Surrounding Vicinity	Primarily commercial and residential land uses

None of the adjoining properties were identified on any regulatory databases indicative of a release, spill, or contamination condition as confirmed by a review of the State Water Resources Control Board, GeoTracker regulated facilities database. Adjoining properties of note are discussed in detail in Section 6.0 below. Based on information obtained during the Site inspection and historical records review, the adjoining properties do not appear to have any recognized environmental conditions that may impact the Property.

6.0 REGULATORY RECORDS REVIEW

EAS reviewed available databases from federal and state regulatory agencies to identify use, generation, storage, treatment and/or disposal of hazardous materials and chemicals or release incidents of such materials, which may have impacted the Property. The regulatory databases were provided to EAS from Environmental Data Resources Inc. (EDR). The Environmental FirstSearch™ Report (FirstSearch Report) is attached in the appendices of this report. The environmental and regulatory databases that were included in this review follow the ASTM standard E1527-13 guidelines.

Federal National Priorities Listing (NPL) Sites
Federal Delisted NPL Sites
Comprehensive Environmental Response Compensation And Liability Information System List (CERCLIS)
Federal CERCLIS: No Further Remedial Action Planned (NFRAP) Site List
Federal Resource Conservation And Recovery Act (RCRA) Generator's List
Federal RCRA Non-CORRACTS TSD Facilities List
Federal RCRA CORRACTS Facilities List
Federal RCRA Treatment, Storage And Disposal Facilities (TSDF's) List
Federal Institutional Control/Engineering Control (IC/EC) Registries
Federal Emergency Response Notification System (ERNS) List
State And Tribal Lists Of *Hazardous Waste Sites* Identified For Investigation Or Remediation:
State-And Tribal-Equivalent NPL
State-And Tribal-Equivalent CERCLIS
State-And Tribal-*Landfill* And/or *Solid* Waste Disposal Site Lists
State-And Tribal-Leaking Storage Tanks Lists

State And Tribal Registered Storage Tank Lists
State And Tribal *Institutional Control/Engineering Control* Registries
State And Tribal Voluntary Cleanup Sites
State And Tribal Brownfield Sites

The Property address was not identified in the FirstSearch Report.

The date of the most recent database update and a plotted map of the aforementioned listings, if any, depicting their location relative to the Property is included in the Appendices of this report.

Information obtained from the FirstSearch Report indicated that the Property has not been included on any institutional/engineering control databases that track activity and use limitations on properties.

Subject Property

No sites were found for the Property.

Of note, the FirstSearch report incorrectly identifies two facilities located at the Property: “Cameron @ Foot of Arcy Lane” and “Calpine Pittsburg, Inc. @ N. End of Loveridge Road”. The facilities are actually located over 1.7-mile (Cameron) and 1.3-mile (Calpine) northeast and downgradient of the Property and are not considered a concern.

Adjoining Properties

None of the adjoining properties were identified on any regulatory databases indicative of a release, spill, or contamination condition.

Two former tenants of the adjoining properties located across East Leland Road and at least 175 to the north-northeast and downgradient of the Property are identified in HAZNET database. The HAZNET database only contains information about types and quantities of wastes that are generated and not information pertaining to release events. Based on the distance and downgradient location, these listings are not considered to have had a significant negative environmental impact on the Property no further investigation is recommended at this time.

The adjoining ARCO gasoline station located to the east and cross-gradient of the Property is identified in the UST, HAZNET, RCRA NonGen/NLR, RCRA-SQG, and FINDS databases.

Registered Underground Storage Tanks (UST)

The County EHD compiles a registered underground storage tank (UST) list that identifies facilities with onsite USTs. The adjoining ARCO gasoline station (identified as Green Desert Oil Group Inc.; ARCO AM PM; BP West Coast Products LLC 06526; and ARCO Facility No. 06526) is listed as an active underground storage tank facility within the FirstSearch regulatory report and the State Water Resources Control Board GeoTracker regulated facilities database (Facility ID: 07-000-773158). The ARCO USTs are located in the northeast portion of the adjoining property, approximately 220 feet east and cross-gradient of the Subject Property’s eastern property line. The ARCO facility was not identified in any databases indicative of releases, spills, or contamination conditions and no violations were listed. Based on the above information, the adjoining property USTs are not considered to have had a significant negative environmental impact on the Property and no further investigation is recommended at this time.

The HAZNET database only contains information about types and quantities of wastes that are generated and not information pertaining to release events. The EPA's Resource Conservation and Recovery Act (RCRA) facilities database identifies properties which report generation, storage, transportation, treatment, or disposal of hazardous waste. RCRA small quantity generators (SQG) are facilities which generate less than 1,000 kg/month of non-acutely hazardous waste. The RCRA NonGen/NLR database identifies properties which report generation, storage, transportation, treatment, or disposal of hazardous waste. Non-Generators do not presently generate hazardous waste. The Facilities Index System (FINDS) contains both facility information and 'pointers' to other sources that contain more detail.

Of note, ARCO's self-serve drive-thru car wash and associated drains are located approximately 25 feet east of the Property and the in-ground car wash clarifiers are located approximately 50 feet east of the Property. No ARCO car wash wastewater was observed outside of the car wash structure.

No violations were identified. Based on the above information, including observations made during the Site visit, adjoining ARCO listings are not considered to have had a significant negative environmental impact on the Property and no further investigation is recommended at this time.

Surrounding Area Properties

Due to the Property's location in a densely developed area, numerous sites were identified within various databases in the regulatory agency report. No facilities listed in a database indicative of open case/pending spills, releases, or contamination conditions are located within 0.5-mile of the Property as confirmed by a review of the State Water Resources Control Board, GeoTracker regulated facilities database. Based on the distance, hydraulic gradient, and/or regulatory status, none of the sites identified in the FirstSearch Report are suspected of having had a negative impact on the Property.

Orphan Sites

Two (2) additional facilities were listed as unmapped sites in the FirstSearch report. These facilities cannot be plotted due to errors or missing information in the regulatory records. EAS reviewed the unmapped sites in the database report and determined the facilities are not considered to represent a concern to the Property.

7.0 INFORMATION AND INTERVIEWS

City of Pittsburg Community Development

EAS contacted the City of Pittsburg Community Development Department for information regarding potential environmental concerns and recognized environmental conditions for the Property. According to Office Clerk Ms. Cathleen Slaga, no open or closed permits were identified for the Property (see Community Development Department email in Appendices).

Contra Costa County Fire Protection District

EAS contacted the Contra Costa County Fire Protection District via telephone for information regarding potential environmental concerns and recognized environmental conditions for the Property. According to on-duty desk officer, no incident report records are on file for the Property.

Contra Costa County Health Services, Hazardous Materials Programs/Contra Costa County Certified Unified Program Agency (CUPA)

EAS contacted the Contra Costa County Health Services, Hazardous Materials Programs/Contra Costa County Certified Unified Program Agency (CUPA) for files related to possible recognized environmental conditions for the Property. According to a response from the Hazardous Materials Programs clerical supervisor, no hazardous materials records are on file for the Property (see County Health Services email in Appendices).

Contra Costa County Department of Conservation & Development, Records Research Division

EAS contacted the Contra Costa County Department of Conservation & Development, Records Research Division for files related to possible recognized environmental conditions for the Property. According to a response from Records Research Division personnel, no hazardous materials records are on file for the Property (see Department of Conservation & Development, Records Research Division email in Appendices).

Bay Area Air Quality Management District (AQMD), Facility Information Detail (FINDS) database

EAS reviewed the Bay Area Air Quality Management District (AQMD) online portal for permits/files related to possible recognized environmental conditions for the Property. No permits were identified for the Property or any adjoining properties.

Contra Costa County Assessor's Office

EAS contacted the Contra Costa County Assessor's Office, for files related to possible recognized environmental conditions for the Property. According to the Assessor's Office online portal, the Property's parcel number is 088-230-028 corresponding to 1160 East Leland Road in Pittsburg, CA. No records of environmental concern were identified for the Property.

California Environmental Protection Agency, State Water Resources Control Board, GeoTracker regulated facilities database

EAS reviewed the California Environmental Protection Agency, State Water Resources Control Board, GeoTracker regulated facilities database for files related to possible recognized environmental conditions for the Property. According to the State GeoTracker database, no records are on file for the Property.

State of California, Department of Toxic Substances Control EnviroStor database

EAS reviewed the Department of Toxic Substances Control EnviroStor database for files related to possible recognized environmental conditions for the Property. According to the EnviroStor database, no records are on file for the Property.

Site Contact Interview

As of the date of this report, EAS has not received completed User and Property Representative questionnaires. Copies of the questionnaires provided by EAS are attached in the Appendices.

Former Site Contact Interview

No former property representative contact information was provided to EAS during the course of preparation of this report.

Specialized Knowledge

There is no specialized knowledge about the Subject Property as provided by the User (MLC Holdings, Inc.) of this Environmental Site Assessment. Therefore, no specialized knowledge was supplied to the environmental professional.

8.0 HISTORICAL USE INFORMATION REVIEW

Vapor Intrusion Condition (VIC)

As the Property and the adjacent properties are not identified in any open case/pending Leaking UST, CERCLIS, or Institutional/Engineering Controls databases, and no evidence for the presence of leaking USTs or hazardous materials usage, storage, or disposal was observed within a 100-foot radius of the lease Site during the site visit, a potential vapor intrusion condition (VIC) does not appear to exist in connection with the Property.

Aerial Photographs

Aerial photographs were reviewed to identify historical land development and any uses, which may have impacted the Property. Photographs and maps provided by EDR were reviewed at approximately 5 to 10-year intervals dating back to 1939 (See Appendices). Historically, the Property appears to have been occupied by vacant land until at least 1939. From at least 1942 until at least 1959, the Property appeared occupied by residential troop buildings associated with the U.S. Army's Camp Stoneman. By 1963, the Camp Stoneman residential buildings were razed and the Property appeared as subsequent residential land uses until at least 1972. Due to the poor quality of the 1979 aerial photograph, it is not clear if portions of the Property were still occupied by any residential improvements, however by 1982 until at least May 2002, the Property appeared as part of a larger vacant lot. By October 2002, the Property appeared as part of a larger construction yard/staging area for the development of the east adjoining ARCO gasoline station and carwash. By July 2003, all construction equipment had been removed and the Property appeared as part of a larger vacant lot that included the west adjoining property until at least October 2009. By at least March 2010 to at least May 2010, the Property appeared as part of a construction yard/staging area for the development of the west adjoining DaVita Dialysis Center. By July 2010, all construction equipment had been removed and the and the Property appeared as a vacant lot. Of note, the present-day approximately 40' by 100' raised soil and gravel pile area appears as early as the July 2010 aerial photograph and is likely associated with the Property's former construction yard/staging area land use. The Property has appeared similar to present-day land uses since that time.

Topographic Maps

Topographic maps were reviewed to identify historical land development and any uses, which may have impacted the Property. Maps provided by EDR and the USGS were reviewed dating back to 1896 (See Appendices). The Property, adjoining properties and immediate surrounding vicinity were not depicted on the 1896, 1898, 1943, 1973, or 1994 topographic maps. The 1907, 1908, and 1918 maps depict the Property, adjoining properties and immediate surrounding vicinity as vacant land including an unimproved road to the east. The 1953 and 1968 maps depict the Property and all adjoining properties as improved lands within Camp Stoneman. An oil tank farm is depicted approximately one mile to the southeast. Based on the distance and hydraulic gradient, this area is not considered a concern. The 1978 map depicts the Property and all adjoining properties as vacant land; East Leland Road and Loveridge Road are located in their present-day configurations. The 2012 map depicts the Property and all adjoining properties as built-up land.

Sanborn Fire Maps

EAS contacted EDR to obtain Sanborn fire insurance maps for the Property and surrounding areas. According to the Certified Sanborn Map Report, the Property is identified as an Unmapped Property.

Oil and Gas Fields

Based on the California Geologic Energy Management Division (CalGEM), online mapping application Well Finder, no production wells are shown on, adjoining, or within one mile of the Property.

City Directories

EAS reviewed historical city directory information provided by EDR for information pertaining to possible environmental concerns for the Property and surrounding properties. The City Directory Abstract (See Appendices) dates back to 1975.

The Property was not identified in the City Directory Abstract. The adjoining ARCO AM PM gasoline station was first identified in 2010. The adjoining DaVita Dialysis Center was first identified in 2014. No additional adjoining properties were identified as environmentally significant.

Summary of Previous Environmental Site Assessments

EAS was not provided with any environmental reports including Phase I Environmental Site Assessments that were prepared previously by others.

Title Report

No Title Report was provided to EAS during the course of preparation of this report.

Historical Data Gaps

During the historical research process of the preparation of this report, there were no gaps exceeding five years in which EAS was unable to ascertain the probable onsite land use.

9.0 FINDINGS AND CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E1527-13 of 1160 East Leland Road in Pittsburg, Contra Costa County, California, the Property. Any exceptions to, or deletions from, this practice are described in Section 10.0 of this report. **This assessment has revealed no evidence of recognized environmental conditions in connection with the Property.**

However, the following business environmental risks (BERs) were identified which warrant mention:

Former Land Uses & Undocumented Soil

Historically, the Property has been occupied by vacant, various residential, then vacant land uses. By October 2002, the Property appeared as part of a larger construction yard/staging area for the development of the east adjoining ARCO gasoline station and carwash. By July 2003, all construction equipment had been removed and the Property appeared as part of a larger vacant lot that included the west adjoining property until at least October 2009. By at least March 2010 to at least May 2010, the Property appeared as part of a construction yard/staging area for the development of the west adjoining DaVita Dialysis Center. By July 2010, all construction equipment had been removed and the and the Property appeared as a vacant lot. Of note, the present-day approximately 40' by 100' raised soil and gravel pile area appears as early as the July 2010 aerial photograph and is likely associated with the Property's former construction yard/staging area land use. In addition, three approximately 3' by 3' low soil piles are located in the southern-central portion of the Property; one approximately 3' by 3' low soil pile is located in the northern-central portion of the Property; and one approximately 1' by 2' stained bare soil area is located in southwest portion of the Property.

As the Property is to undergo extensive grading/soil removal as part of a future redevelopment project into a carwash facility, EAS recommends that a program of subsurface sampling and testing be conducted in the areas of discussed above, as well as throughout the remainder of the Property, prior to any ground disturbance/construction activities. Once the analysis has been completed, the results would verify that contaminated soils above action levels are/are not present.

Asbestos-Containing Material/Lead-Based Paint (ACMs/LBP)

According to Client-provided information, initially the onsite carwash development project was to "require an offsite improvement to replace the water line from the median because it is eroded and has asbestos in it." However, in a subsequent message, "The City let the applicant know that they will not be required to remove the water line. They can choose to instead install new water lines/taps for the water required for the development. It has not been decided how the applicant will proceed. If they chose to leave the older water line stub-out with asbestos in it, it would just get capped off/abandoned."

Based on the above information, EAS recommends the presence of asbestos-containing materials (ACMs) be confirmed through a program of sampling and testing prior to any impacts or removal of the water line discussed above. Once the analysis has been completed, the results would verify that asbestos is / is not present.

It is up to the Client, based on their risk tolerance and applicable law, to determine the extent of further inquiry.

In addition, the following items warrant mention:

- Standard dust mitigation measures should be implemented during any future renovation, redevelopment, and/or soil handling activities. During any grading or excavation activities at the Property, redevelopment personnel must be made aware to look for unusual conditions suggesting buried debris or other potential adverse environmental conditions that may be discovered on the Property. In addition, **if any abnormal soils are discovered during future redevelopment, such as stained soils, hydrocarbon odors, or any other unusual odors, all construction activities should be stopped immediately and EAS should be contacted for further assessment and monitoring.**

10.0 LIMITATIONS

The purpose of this Phase I ESA was to identify recognized environmental conditions associated with the Property, if any. It is up to the Client, based on their risk tolerance and applicable law, to determine the extent of further inquiry. The professional opinions contained in this report are based solely on the laws, regulations, and technical data known to EAS at the time of report preparation. The conclusions of this assessment rely on reasonably obtainable information from site reconnaissance, interviews with onsite personnel and public officials, and public records. No warranty is made regarding the accuracy of the publicly documented information or the opinions of officials or personnel consulted for the study. All known information has been disclosed and a good-faith effort has been made to consult pertinent sources.

It should be noted that all environmental assessments are inherently limited in the sense that conclusions are drawn, and recommendations developed, from information obtained from limited research and site evaluation. Subsurface conditions were not investigated as part of this study and may differ from the conditions implied by visual observations. Additionally, the passage of time may result in a change in environmental characteristics at this site and on surrounding properties. This report does not warrant against future operations, activities, or conditions that may occur. This report is not a regulatory compliance audit. A regulatory compliance audit of the tenant operation would analyze compliance of the operation with regulatory requirements and accepted industry practices. The scope of the Phase I ESA focused on the likelihood or potential presence of recognized environmental conditions at the subject property, according to ASTM standards.

This study is not intended to assess or otherwise determine if any soil contamination, waste emplacement, or groundwater contamination exists on the subject property. This investigation has been based only upon prior site history, previous documentation, and observable conditions. Existing hazardous materials and contaminants can escape detection using these methods. If the results of this study suggest that it is possible that hazardous materials contamination exists at the subject property, then further investigation (regulatory file review, subsurface testing) may be necessary to make a definite assessment. Our conclusions regarding the potential environmental impact from offsite facilities near the subject property are based on readily available information from the environmental databases and the assumed groundwater flow direction. A detailed file review of each facility was beyond the scope of work.

We appreciate your selection of EAS for this project and look forward to assisting you further on this and other projects. If you have any questions, comments, or concerns regarding the information within this report, or if further assistance is required, please contact us by e-mail at jr1996@easenv.com and gjl1999@easenv.com.

Sincerely,

ENVIRONMENTAL ASSESSMENT SPECIALISTS, INC

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental professional as defined in Section 312.10 of 40 CFR 312 and I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject Property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Jeff Randle
Senior Project Manager/Project Supervisor

Gavin Leaver
CEO/President

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

		The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 8/16/2021 at 6:20 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Env. Assessment Specialists were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

Database Descriptions

NPL: NPL National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices. NPL - National Priority List Proposed NPL - Proposed National Priority List Sites.

NPL Delisted: Delisted NPL The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Delisted NPL - National Priority List Deletions

CERCLIS: SEMS SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL. SEMS - Superfund Enterprise Management System

NFRAP: SEMS-ARCHIVE SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site. SEMS-ARCHIVE - Superfund Enterprise Management System Archive

RCRA COR ACT: CORRACTS CORRACTS identifies hazardous waste handlers with RCRA corrective action activity. CORRACTS - Corrective Action Report

RCRA TSD: RCRA-TSDF RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste. RCRA-TSDF - RCRA - Treatment, Storage and Disposal

RCRA GEN: RCRA-LQG RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. RCRA-LQG - RCRA - Large Quantity Generators RCRA-SQG - RCRA - Small Quantity Generators. RCRA-VSQG - RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators).

Federal IC / EC: US ENG CONTROLS A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. US ENG CONTROLS - Engineering Controls Sites List
US INST CONTROLS - Institutional Controls Sites List.

Database Descriptions

ERNS: ERNS Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances. ERNS - Emergency Response Notification System

State/Tribal NPL: RESPONSE Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. RESPONSE - State Response Sites

State/Tribal CERCLIS: ENVIROSTOR The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites. ENVIROSTOR - EnviroStor Database

State/Tribal SWL: SWF/LF (SWIS) Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites. SWF/LF (SWIS) - Solid Waste Information System

State/Tribal LTANKS: RIVERSIDE CO. LUST LUST REG 3 - Leaking Underground Storage Tank Database. LUST REG 7 - Leaking Underground Storage Tank Case Listing. ORANGE CO. INDIAN LUST R7 - Leaking Underground Storage Tanks on Indian Land. CPS-SLIC - Statewide SLIC Cases (GEOTRACKER). SLIC REG 1 - Active Toxic Site Investigations. SLIC REG 2 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. SLIC REG 3 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. SLIC REG 4 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. SLIC REG 5 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. SLIC REG 6V - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. SLIC REG 6L - SLIC Sites. SLIC REG 7 - SLIC List. SLIC REG 8 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. Sacramento Co. CS - Toxic Site Clean-Up List. SLIC REG 9 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing.

State/Tribal Tanks: UST MILITARY UST SITES - Military UST Sites (GEOTRACKER). UST CLOSURE - Proposed Closure of Underground Storage Tank (UST) Cases. Military ust sites UST CLOSURE - Military UST Sites (GEOTRACKER) AST - Aboveground Petroleum Storage Tank Facilities. INDIAN UST R10 - Underground Storage Tanks on Indian Land. INDIAN UST R9 - Underground Storage Tanks on Indian Land. INDIAN UST R5 - Underground Storage Tanks on Indian Land. INDIAN UST R4 - Underground Storage Tanks on Indian Land. INDIAN UST R6 - Underground Storage Tanks on Indian Land. INDIAN UST R7 - Underground Storage Tanks on Indian Land. INDIAN UST R8 - Underground Storage Tanks on Indian Land. INDIAN UST R1 - Underground Storage Tanks on Indian Land.

Database Descriptions

State/Tribal VCP: VCP Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs. VCP - Voluntary Cleanup Program Properties

US Brownfields: US BROWNFIELDS Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs. US BROWNFIELDS - A Listing of Brownfields Sites

Other SWF: WMUDS/SWAT CA LA LF - City of Los Angeles Landfills. VENTURA CO. LF - Inventory of Illegal Abandoned and Inactive Sites. SAN DIEGO CO. LF - Solid Waste Facilities. LOS ANGELES CO. LF - List of Solid Waste Facilities. Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information. LOS ANGELES CO. LF - Waste Management Unit Database

Other Haz Sites: SCH This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose. SCH - School Property Evaluation Program SAN DIEGO CO. HMMMD - Hazardous Materials Management Division Database. CERS HAZ WASTE - CERS HAZ WASTE. US CDL - Clandestine Drug Labs. PFAS - PFAS Contamination Site Location Listing.

Other Tanks: SWEEPS UST Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list. SWEEPS UST - SWEEPS UST Listing ALAMEDA CO. UST - Underground Tanks. KERN CO. UST - Underground Storage Tank Sites & Tank Listing. MARIN CO. UST - Underground Storage Tank Sites. NAPA CO. UST - Closed and Operating Underground Storage Tank Sites. ORANGE CO. UST - List of Underground Storage Tank Facilities. RIVERSIDE CO. UST - Underground Storage Tank Tank List. SAN FRANCISCO CO. UST - Underground Storage Tank Information. SOLANO CO. UST - Underground Storage Tanks. SUTTER CO. UST - Underground Storage Tanks. VENTURA CO. UST - Underground Tank Closed Sites List. YOLO CO. UST - Underground Storage Tank Comprehensive Facility Report. LOS ANGELES UST - Active & Inactive UST Inventory. EL SEGUNDO UST - City of El Segundo Underground Storage Tank. LONG BEACH UST - City of Long Beach Underground Storage Tank. UST SAN JOAQUIN - San Joaquin Co. UST. TORRANCE UST - City of Torrance Underground Storage Tank. UST MENDOCINO - Mendocino County UST Database. LOS ANGELES AST - Active & Inactive AST Inventory. SAN FRANCISCO AST - Aboveground Storage Tank Site Listing. CA FID UST - Facility Inventory Database. CERS TANKS - California Environmental Reporting System (CERS) Tanks.

Local Land Records: DEED Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners. DEED - Deed Restriction Listing

Database Descriptions

Spills: HMIRS Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT. HMIRS - Hazardous Materials Information Reporting System CHMIRS - California Hazardous Material Incident Report System. Orange Co. Industrial Site - List of Industrial Site Cleanups. SPILLS 90 - SPILLS90 data from FirstSearch.

Other: RCRA NonGen / NLR RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste. RCRA NonGen / NLR - RCRA - Non Generators / No Longer Regulated FEDLAND - Federal and Indian Lands. TSCA - Toxic Substances Control Act. Appendix I: Questionnaires and Supporting Documents

PHASE I ENVIRONMENTAL SITE ASSESSMENT PROCESS

USER QUESTIONNAIRE

Bluewave Carwash Express – 1160 East Leland Road, Pittsburg, California 94565

INTRODUCTION: In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “Brownfields Amendments”), the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that “all appropriate inquiry” is not complete.

(1.) Environmental cleanup liens that are filed or recorded against the site.

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? Yes_____ No_____

(2.) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry.

Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? Yes_____ No_____

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP.

As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? Yes_____ No_____

(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated.

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? * Yes___ No___

*If you conclude the purchase price being paid for this property DOES NOT reasonably reflect the fair market value, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

(5.) Commonly known or reasonably ascertainable information about the property.

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

(a.) Do you know the past uses of the property? Yes_____ No_____

(b.) Do you know of specific chemicals that are present or once were present at the property? Yes_____ No_____

(c.) Do you know of spills or other chemical releases that have taken place at the property? Yes_____ No_____

(d.) Do you know of any environmental cleanups that have taken place at the property? Yes_____ No_____

(6.) The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation.

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property? Yes_____ No_____

Landowner Liability Protections, or *LLPs*, is the term used to describe the three types of potential defenses to Superfund liability in EPA’s Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability (“Common Elements” Guide) issued on March 6, 2003.

Questionnaire Completed By: Name_____ Date_____, 2021

PHASE I ENVIRONMENTAL SITE ASSESSMENT PROPERTY REPRESENTATIVE QUESTIONNAIRE

**Bluewave Carwash Express
1160 East Leland Road
Pittsburg, California 94565**

<u>Question</u>	<u>Response</u>			<u>If yes, provide description</u>
	Yes	No	Unk	
1a. Is the <i>property</i> used for an industrial use?				
1b. Is any <i>adjoining property</i> used for an industrial use?				
2a. Did you observe evidence or do you have any prior knowledge that the <i>property</i> has been used for an industrial use in the past?				
2b. Did you observe evidence or do you have any prior knowledge that any <i>adjoining property</i> has been used for an industrial use in the past?				
3a. Is the <i>property</i> used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?				
3b. Is any <i>adjoining property</i> used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?				
4a. Did you observe evidence or do you have any prior knowledge that the <i>property</i> has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?				
4b. Did you observe evidence or do you have any prior knowledge that any <i>adjoining property</i> has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?				

<u>Question</u>	<u>Response</u>			<u>If yes, provide description</u>
5a. Are there currently any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of >5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the <i>property</i> or at the facility?	Yes	No	Unk	
5b. Did you observe evidence or do you have any prior knowledge that there have been previously any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of >5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the <i>property</i> or at the facility?	Yes	No	Unk	
6a. Are there currently any industrial <i>drums</i> (typically 55 gal (208 L)) or sacks of chemicals located on the <i>property</i> or at the facility?	Yes	No	Unk	
6b. Did you observe evidence or do you have any prior knowledge that there have been previously any industrial <i>drums</i> (typically 55 gal (208 L)) or sacks of chemicals located on the <i>property</i> or at the facility?	Yes	No	Unk	
7a. Did you observe evidence or do you have any prior knowledge that <i>fill dirt</i> has been brought onto the <i>property</i> that originated from a contaminated site?	Yes	No	Unk	
7b. Did you observe evidence or do you have any prior knowledge that <i>fill dirt</i> has been brought onto the <i>property</i> that is of an unknown origin?	Yes	No	Unk	
8a. Are there currently any <i>pits, ponds, or lagoons</i> located on the <i>property</i> in connection with waste treatment or waste disposal?	Yes	No	Unk	
8b. Did you observe evidence or do you have any prior knowledge that there have been previously, any <i>pits, ponds, or lagoons</i> located on the <i>property</i> in connection with waste treatment or waste disposal?	Yes	No	Unk	
9a. Is there currently any stained soil on the <i>property</i> ?	Yes	No	Unk	

<u>Question</u>	<u>Response</u>			<u>If yes, provide description</u>
9b. Did you observe evidence or do you have any prior knowledge that there has been previously, any stained soil on the <i>property</i> ?	Yes	No	Unk	
10a. Are there currently any registered or unregistered storage tanks (above or underground) located on the <i>property</i> ?	Yes	No	Unk	
10b. Did you observe evidence or do you have any prior knowledge that there have been previously, any registered or unregistered storage tanks (above or underground) located on the <i>property</i> ?	Yes	No	Unk	
11a. Are there currently any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the <i>property</i> or adjacent to any structure located on the <i>property</i> ?	Yes	No	Unk	
11b. Did you observe evidence or do you have any prior knowledge that there have been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the <i>property</i> or adjacent to any structure located on the <i>property</i> ?	Yes	No	Unk	
12a. Is there currently evidence of leaks, spills or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the <i>property</i> ?	Yes	No	Unk	
12b. Did you observe evidence or do you have any prior knowledge that there have been previously any leaks, spills or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the <i>property</i> ?	Yes	No	Unk	
13a. If the <i>property</i> is served by a private well or non-public water system, is there evidence or do you have prior knowledge that contaminants have been identified in the well or system that exceed guidelines applicable to the water system?	Yes	No	Unk	
13b. If the property is served by a private well or non-pubic water system, is there evidence or do you have prior knowledge that the well has been designated as contaminated by any government environmental/health agency?	Yes	No	Unk	

<u>Question</u>	<u>Response</u>			<u>If yes, provide description</u>
14. Does the <i>owner</i> or <i>occupant</i> of the <i>property</i> have any knowledge of <i>environmental liens</i> or governmental notification relating to past or recurrent violations of environmental laws with respect to the <i>property</i> or any facility located on the <i>property</i> ?	Yes	No	Unk	
15a. Has the <i>owner</i> or <i>occupant</i> of the <i>property</i> been informed of the past existence of hazardous substances of <i>petroleum products</i> with respect to the <i>property</i> or any facility located on the <i>property</i> ?	Yes	No	Unk	
15b. Has the <i>owner</i> or <i>occupant</i> of the <i>property</i> been informed of the current existence of hazardous substances of <i>petroleum products</i> with respect to the <i>property</i> or any facility located on the <i>property</i> ?	Yes	No	Unk	
15c. Has the <i>owner</i> or <i>occupant</i> of the <i>property</i> been informed of the past existence of environmental violations with respect to the <i>property</i> or any facility located on the <i>property</i> ?	Yes	No	Unk	
15d. Has the <i>owner</i> or <i>occupant</i> of the <i>property</i> been informed of the current existence of environmental violations with respect to the <i>property</i> or any facility located on the <i>property</i> ?	Yes	No	Unk	
16. Does the <i>owner</i> or <i>occupant</i> of the <i>property</i> have any knowledge of any <i>environmental site assessment</i> of the <i>property</i> or facility that indicated the presence of <i>hazardous substances</i> or <i>petroleum products</i> on, or contaminations of, the <i>property</i> or recommended further assessment of the <i>property</i> ?	Yes	No	Unk	
17. Does the <i>owner</i> or <i>occupant</i> of the <i>property</i> know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any <i>hazardous substance</i> or <i>petroleum products</i> involving the <i>property</i> by any <i>owner</i> or <i>occupant</i> of the <i>property</i> ?	Yes	No	Unk	
18a. Does the <i>property</i> discharge <i>waste-water</i> (not including sanitary waste or storm water) onto or adjacent to the <i>property</i> and/or into a storm water system?	Yes	No	Unk	

<u>Question</u>	<u>Response</u>			<u>If yes, provide description</u>
	Yes	No	Unk	
18b. Does the <i>property</i> discharge waste water (not including sanitary waste or storm water) onto or adjacent to the <i>property</i> and/or into a sanitary sewer system?				
19. Did you observe evidence or do you have any prior knowledge that any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials have been dumped above grade, buried and/or burned on the <i>property</i> ?	Yes	No	Unk	
20. Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?	Yes	No	Unk

Subject: RE: records request for 1160 East Leland Road, Pittsburg, CA 94565

Good Afternoon,

After exhausting all forms of records research (digital, microfiche and physical), no plans have been located for the address of '1160 East Leland Road.' The address is located within the **City of Pittsburg's** jurisdiction, not in unincorporated Contra Costa County. The City of Pittsburg issues their own permits; therefore, this office has no information about the property.

Please contact the City of Pittsburg's Building Division. The Building Division is responsible for managing general public information, plan submittal, plan review, permit issuance, inspection and document retention. I have included the Building Division's web address and physical site to visit as follows:

Web address: [Building | City of Pittsburg \(pittsburgca.gov\)](https://www.pittsburgca.gov/building)

City of Pittsburg Building Division

Phone: (925) 252-4910

Fax: (925) 252-4814

Email: permit@ci.pittsburg.ca.us

Please keep in mind that no jurisdiction is required to keep any information on file for longer than 180 days from the date of the final inspection as explained in the California Residential Code R106.5 Retention of Construction documents.

I hope you find this information useful.

Regards,

Monika Ashman

Map View Descriptions

Air Quality Forecast Map

The Air District issues a daily air quality forecast that predicts air pollution levels for the coming five-day period. This forecast uses the U.S. EPA's Air Quality Index scale. For forecasting purposes, cities in the Bay Area have been divided into five reporting zones.

Air Quality Monitoring Map

Air quality data from the Air District Air Monitoring Network sites shown in the map are available to view online. Pollutants measured include ozone, oxides of nitrogen, carbon monoxide, sulfur dioxide, hydrogen sulfide, particulate matter, hydrocarbons, elemental and organic carbon, and various hazardous air pollutants. Click on a station of interest to view more information about the monitoring site.

Ground-level monitors are air quality monitoring stations placed near certain large industrial facilities, such as oil refineries, as required by the facility's permit. The facility operates the monitoring equipment, but the Air District validates and audits the data collected by the station.

Meteorological data from the monitoring sites is also available for viewing.

Facilities Map

Learn about facilities that are regulated by the Air District. Zoom in to see individual facilities and learn about their locations and emissions.

Impacted Communities Map

The Community Air Risk Evaluation (CARE) program identifies areas with high concentrations of air pollution and populations most vulnerable to air pollution's health impacts. The maps, along with information about pollutants and their sources that lead to the impacts, help prioritize a broad array of actions designed to foster healthy communities.

Open Burning Map

Open burning is generally prohibited in the Bay Area, with the exception of 17 types of fires that are regulated under the Air District's Open Burning Regulation 5. Certain fires for agricultural purposes, flood control, fire training, and the prevention of fire hazards, among other purposes, are allowed when weather conditions are favorable for dispersal and dilution of smoke. Many of these fires are only allowed during specified periods - or burn seasons - throughout the year.

Subject: RE: UPDATE - REQUEST SITE INFO TO PROCEED - SIGNED - EAS POR25695 for UPDATE - Phase 1 ESA for proposed Blue Wave Carwash project

Hi Jeff,

I've requested a report from the City and will let you know if they get back to me.

I also wanted to let you know that we have some new information about the fate of the water line. The City let the applicant know that they will not be required to remove the water line. They can choose to instead install new water lines/taps for the water required for the development. It has not been decided how the applicant will proceed. If they chose to leave the older water line stubout with asbestos in it, it would just get capped off/abandoned.

Thanks!

Hi Jeff,

Just wanted to let you know that the project will require an offsite improvement to replace the water line from the median because it is eroded and has asbestos in it, in case this will be relevant for your report.

Thank you!

Best,

Madelyn Dolan (she | her | hers)

Focused Transportation Analysis for the BlueWave Carwash Express Project

Dear Ms. Bean;

As requested, W-Trans has prepared a focused transportation analysis for the proposed BlueWave Carwash Express project to be located at 1160 East Leland Road in the City of Pittsburg. The purpose of this letter is to address the project's potential traffic impacts, site access, circulation, and on-site queuing.

Existing Conditions

In the City of Pittsburg, East Leland Road is a four-lane arterial that runs east-west between Railroad Avenue and Century Boulevard. Along the project frontage the roadway has a speed limit of 40 miles per hour (mph) and two 11-foot vehicle travel lanes in each direction separated by a raised median. It also has a 5-foot bicycle lane and continuous sidewalk in both directions of travel.

Project Description

The proposed project would include an automated car wash facility with 22 self-service vacuum stalls on a vacant parcel located between an existing medical office building at 1150 East Leland Road and a gas station at 1190 East Leland Road. Customers would access the project site via an existing driveway on East Leland Road which is shared with the medical office building to the west of the site. Patrons would also have access to the site through the gas station east of the site. The car wash structure consists of a 3,600 square foot building which uses a conveyor style operation. The proposed project site plan is enclosed.

Trip Generation

The anticipated trip generation for the proposed project was estimated using standard rates published by the Institute of Transportation Engineers (ITE) in *Trip Generation Manual*, 10th Edition, 2017 for "Automated Car Wash" (ITE LU 948). The peak hour is anticipated to occur during the weekend midday which is common for similar land uses. The project site is located on a currently vacant lot and therefore no trip credits were assigned for an existing land use.

Pass-by Trips

Some portion of traffic associated with the car wash would be drawn from existing traffic on East Leland Road. These vehicle trips are not considered "new," but would instead be comprised of drivers who are already driving on the adjacent street system and choose to make an interim stop and are referred to as "pass-by." The percentage of these pass-by trips was based on information provided in the *Trip Generation Handbook*, 3rd Edition, Institute of Transportation Engineers, 2017. Since the *Handbook* does not provide a pass-by trip percentage for an Automated Car Wash, the pass-by trip percentages for Gasoline Service Station (ITE LU 944) were used as a reference. To provide a conservative estimate, it was assumed that 25 percent of the proposed car wash trips would be pass-by trips, which is lower than the pass-by trip percentage of 44 percent for the Gasoline Service Station land use.

Total Project Trip Generation

The expected trip generation potential for the proposed project is indicated in Table 1, with deductions taken for pass-by trips. The proposed project is expected to generate an average of 110 trips during the weekend peak hour. After deductions are taken into account, the project would be expected to generate 82 trips during peak hour.

Table 1 – Trip Generation Summary					
Land Use	Units	Weekend Peak Hour			
		Rate	Trips	In	Out
Proposed					
Automated Car Wash	3.6 ksf	30.40	110	55	55
Pass-by		-25%	-28	-14	-14
Total			82	41	41

Note: ksf = 1,000 square feet

Site Access and Circulation

The site would not result in the construction of any new driveways as access would take place via an existing driveway shared with the medical office as well as from the adjacent gas station.

Sight Distance

At driveways, a substantially clear line of sight should be maintained between the driver of a vehicle waiting to enter the street and the driver of an approaching vehicle. Sight distances along East Leland Road at the project driveway were evaluated based on sight distance criteria contained in the *Highway Design Manual* published by Caltrans. The recommended sight distances for driveway approaches are based on stopping sight distance and use the approach travel speed as the basis for determining the recommended sight distance.

Since East Leland Road has a posted speed limit of 40 mph, the recommended stopping sight distance is 300 feet. Sight distance at the project driveway extends over 300 feet to the west along level and unobstructed terrain. Sight lines to the east were not measured as egress is limited to right turns only by the existing center median island.

Finding – Sight distance along East Leland Road at the project driveway is adequate based on existing conditions.

Recommendation – It is recommended that any trees and vegetation near the project driveway on East Leland Road be trimmed as necessary to maintain adequate sight distance at the driveway.

Emergency Access

Emergency response vehicles would be able to access the site via the project driveway on East Leland Road. The proposed 35-foot wide driveway and drive aisles meet current City standards and so can be expected to accommodate the access requirements for both emergency and passenger vehicles.

Finding – Emergency access is expected to operate acceptably.

On-Site Circulation

The access and circulation associated with the project site was assessed to determine if the site's layout would provide adequate space and drive aisles for vehicles to maneuver throughout the site. Based on a review of the site plan, the internal drive aisle that connects the driveway to the car wash pay stations would have three one-way lanes and a width of 47 feet, which would provide adequate space for vehicles to transition to a single 14-foot lane to access the car vacuum or car wash facility. There would also be a bi-directional 30-foot wide drive aisle between the self-service vacuum stalls that would allow customers to maneuver their vehicles into and out of each service stall. Per the *City of Pittsburgh Municipal Code 18.78.050; Parking Facility Design Standards*, the required minimum width of a two-way traffic drive aisle providing access to perpendicular parking spaces is 25 feet. The project drive aisle would meet this requirement.

The transitional area between the pay stations and car wash tunnel includes a relatively small area where three lanes merge into a single lane. To minimize the potential for conflicts if multiple vehicles exit the pay area simultaneously, it is recommended that a gate be installed at the egress of each pay station which is intended to control and spread out the movement of vehicles between these two areas.

Finding – Vehicle access and internal circulation within the project site would be adequate. A gate is recommended at each pay station to control vehicle movements and alleviate the potential for conflicts.

Queuing Analysis

A queuing analysis was conducted to identify the potential queuing of vehicles accessing the project site and to determine whether vehicles waiting to access the car wash would spill back onto East Leland Road. Since the project site includes three distinct areas, an automated car wash, self-service vacuum stations and a pay station, the queuing analysis was divided into three parts.

The 95th-percentile queue is generally applied as the acceptable limit for on-site circulation impacts. To assess the potential queuing for the site, factors such as the storage capacity, arrival rate and service rate were considered. The arrival rate is defined as the number of patrons arriving at the facility per hour. Similarly, the service rate is defined as the number of patrons served within an hour. The applied service rate was based on data regarding the typical time needed to completely service each vehicle.

Pay Station

For the queuing at the three pay stations a storage capacity of 24 vehicles was assumed (three lanes able to store eight vehicles in each lane) before a queue would spill back into the shared drive aisle. A service rate of 20 vehicles per hour was assumed, which is based on the assumption that it takes three minutes to complete a transaction for each car.

Based on the trip generation estimate, a maximum arrival rate of 55 vehicles per hour was applied to the analysis. Applying these rates produced a calculated 95th percentile queue length of 10 vehicles, which can be accommodated by the pay station approach lanes which have a 24-vehicle capacity. The queuing calculation worksheet is enclosed for reference.

Automated Car Wash

The approximately 175-foot drive aisle connecting the pay stations and the entrance to the car wash tunnel can accommodate a queue of seven vehicles. The automated car wash facility would employ a conveyor style operation which has a capacity to wash up to three vehicles in close succession within the tunnel structure. According to the site operator, the car wash tunnel is capable of processing approximately one vehicle per minute (or 60 vehicles per hour) during peak operations. Based on the peak hour trip generation, the maximum arrival rate would be 55 vehicles per hour. If the car wash facility is in use when a customer is at the pay station, they

would wait in line within the driveway between the pay station and the car wash entrance, or wait for their turn in one of the three lanes approaching the pay stations.

Applying these rates produced a calculated 95th percentile queue length approaching the car wash entrance of seven vehicles, which is equal to the storage capacity of the drive aisle between the pay stations and car wash entrance. The queuing calculation worksheet is enclosed for reference.

Self-Service Vacuum Area

The vacuum area is comprised of 22 self-service spaces. These spaces can serve at least 88 cars per hour assuming a typical vacuum service can be completed in 15 minutes or less. Therefore, the 22-space service area would provide adequate capacity since the serving capacity of 88 cars per hour is greater than the trip generation of 55 cars per hour. This is a conservative analysis since it is recognized that only a portion of all customers purchasing a car wash would also use the vacuum service.

Finding – Based on the assumed arrival and service rates, the proposed on-site vehicle storage capacity is expected to adequately accommodate the vehicle queue in all areas of the site, and no spillover onto East Leland Road is anticipated.

Conclusions and Recommendations

- The proposed project is expected to generate an average of 82 new peak hour trips during the weekend day.
- Vehicle access and internal circulation at the project site would be adequate. A gate is recommended at each pay station to control vehicle movements and alleviate the potential for conflicts.
- Sight distances at the project driveway are adequate based on existing conditions. It is recommended that any trees and vegetation near the project driveway on East Leland Road be trimmed as necessary to maintain adequate sight distance at the driveway.
- Adequate emergency access to the project site would be provided from East Leland Road.
- The on-site vehicle stacking spaces in each area of the site would be adequate to accommodate the anticipated peak hour demand, and therefore vehicles are not anticipated to back up onto the project driveway at East Leland Road.

Thank you for giving W-Trans the opportunity to provide these services. Please call if you have any questions.

Sincerely,

Kimberly Tellez
