EXECUTIVE SUMMARY

TRC was retained by HC (Contra Costa) (known as "Applicant" or "User") to perform a Phase I Environmental Site Assessment (ESA) of the defined Study Area located off Pittsburg Waterfront Road in the City of Pittsburg, Contra Costa County, California 94565 (herein referred to as the "subject property"). TRC conducted the Phase I ESA in connection with the Applicant's proposed development involving the subject property as a part of the H Cycle Pittsburg Renewable Hydrogen Project (HCPRHP). The Phase I ESA described in this report was performed in accordance with the scope and limitations of the ASTM International Practice E1527-21 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (hereinafter "ASTM Practice E1527-21" or "ASTM Standard"). Limiting conditions and/or deviations from the ASTM Practice E1527-21 standard are described in Sections 1.3 and 7.7 of this report.

Site Description	The approximately 24-acre subject property is part of a larger approximately 250-acre parent parcel (073-220-049-8). The subject property site is currently occupied by infrastructure associated with the former Dow Chemical manufacturing facility and tenant spaces occupied by Corteva, Generon, and Schlumberger. The subject property is zoned as industrial by the City of Pittsburg.
Site Operations	Based on a review of historical information, the first structures were built on the central portion of the subject property by 1957 and expanded with additional structures in northern portion of property by 1998. Based on available data, Dow Chemical's onsite operations ceased by the early 1980's. The subject property is currently owned by Dow Chemical Company.

This assessment has revealed the following recognized environmental condition (REC) in connection with the subject property.

REC

According to the Corteva representative, Ethyl Corporation operated onsite between 1958 and 1963. Based on review of regulatory records, Ethyl Corporation used and stored chemicals to manufacture tetraethyl lead prior to DOW Chemical Company's purchase of the property in 1982. Soil samples collected in 1979 detected lead in surface soils from 50 to 638 milligrams per kilogram (mg/kg) and in 1990 groundwater sampling detected carbon tetrachloride, chloroform, and trichloroethylene up to 10, 1.4, and 1.2 mg/l milligrams per liter (mg/L) respectively. This property was incorporated into the corrective action under the Hazardous Waste Management Program oversight at the DOW Chemical Company property that is now under the direction of the Water Board. The Ethyl Corporation Property was considered part of the Dow 900/1000 Block Solid Waste Management Unit (SWMU) which is now considered closed. Groundwater monitoring was previously performed in accordance with the cleanup order. Groundwater extraction wells were installed to contain an isolated low level VOC plume and were operated between April 1992 and February 1995. A Workplan for groundwater investigation was submitted to the Board in August 2002, but was not implemented. Groundwater concentrations of contaminants were reported to be low to non-detect during the final sampling event.

DRAFT

DRAFT

1.0 INTRODUCTION

TRC has prepared this Phase I Environmental Site Assessment (ESA) for HC (Contra Costa) (hereinafter, "Applicant," or "User").

This report was prepared for and may be relied upon by Applicant and User for the purposes set forth herein; it may not be relied on by any party other than the Applicant and User. Authorization for third-party reliance on this report will be considered by TRC if requested by the Applicant. TRC reserves the right to deny reliance on this report by third parties.

1.1 Purpose and Scope of Services

The following Phase I ESA was performed for the property located on Pittsburg Waterfront Road in the City of Pittsburg, Contra Costa County, California 94565 (hereinafter the "subject property"). A subject property location map is included as **Figure 1**. TRC prepared this Phase I ESA in accordance with the ASTM International E1527-21 *Standard Practice for Environmental Site Assessments: Phase I ESA Process* (hereinafter "ASTM Practice E1527-21" or "ASTM Standard") and is intended for the sole use of HC (Contra Costa), LLC.

The purpose of this assessment is to identify Recognized Environmental Conditions (RECs) at the subject property, as defined by ASTM Practice E1527-21. The completion of this Phase I ESA report may be used to satisfy one of the requirements for the User to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser liability protections pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), thereby constituting all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial or customary practice as defined by 42 United States Code §9601(35)(B) of CERCLA.

The Scope of Services for this Phase I ESA included the following tasks:

- Subject property and vicinity reconnaissance;
- Subject property and vicinity description and physical setting;
- Historical sources review and a description of historical subject property and adjoining property conditions;
- Evaluate potential for vapor migration to impact the subject property in general accordance with ASTM E2600-15, "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (hereinafter ASTM Practice E2600-15);
- Interviews with owners, operators, and/or occupants of the subject property, and/or local officials;
- Review of environmental databases and regulatory agency records;
- Review of previous environmental reports/documentation, as applicable;
- Review of environmental liens, if provided or authorized to obtain by the User; and
- Preparation of a report summarizing findings, opinions, and conclusions.

DRAFT

1.2 Additional Services

Items outside the scope of ASTM Practice E1527-21 are, but are not limited to the following:

- Substances not defined as Hazardous Substances
- Asbestos-containing building materials
- Radon
- Lead-based paint
- Lead in drinking water
- Wetlands
- Regulatory compliance
- Cultural and historic resources
- Industrial hygiene
- Health and safety
- Ecological resources
- Endangered species
- Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment
- Biological agents
- Mold
- Polychlorinated Biphenyl (PCB)-containing building materials

1.3 Deviations to ASTM Practice E1527-21

No significant deviations or deletions to the ASTM Standard were made during this Phase I ESA.

DRAFT

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 Subject Property Location and Description

The subject property location, ownership, and parcel information are included in the following table. A subject property location map is included as **Figure 1**.

Table 2.1 - Subject Property Location and Description

Subject Property Details	Description
Location	East end Pittsburg Waterfront Road Pittsburg, Contra Costa County, California 94565
Primary use of surrounding area	Industrial
Acreage	~24 acres
Parcel Number	073-220-049-8 (Portion of)
Zoning	Industrial by City of Pittsburg
Owner & Operator	Dow Chemical Company

2.2 Subject Property Improvements

Current subject property improvements are listed in the following table. A subject property layout is included as **Figure 2**.

Table 2.2 - Subject Property Improvements

Subject Property Feature	Description
Buildings	Four buildings used for material storage, a laboratory, and an empty shed (currently unused)
Exterior areas	Unpaved and paved parking as well as equipment storage and vegetation throughout the subject property. There is also an inactive water tower in the northeast corner of the site and railroad spurs along the southern and southwestern property boundaries.
On-site roads/rail lines	Rail spurs along the southern and southwestern property boundaries.
Potable water supply	City of Pittsburg
Sewage disposal system(s)	Delta Diablo
Stormwater system	Stormwater outfall and collection system along eastern property boundary
Heating system (supplier)	None
Cooling system (supplier)	None
Back-up fuel source(s)	N/A
Electricity supplier(s)	Pacific Gas & Electric

DRAFT

2.3 Current and Historical Subject Property Use

2.3.1 Current Subject Property Use(s)

The subject property is currently owned by Dow Chemical Company and the existing buildings are utilized by Corteva, Generon, and Schlumberger primarily for storage. The railroad spurs are also utilized for storage by Corteva.

2.3.2 Previous Owner and Operator Information

Based on information provided by the User (Section 3.0), the historical record review (Section 4.0), and interviews conducted during this Phase I ESA (Section 5.0), historical subject property ownership and operator information are provided below.

Table 2.3 - Previous and Current Owner & Operator Information

Subject Property Owner & Operator	Description	From	To
Dow Chemical Company	Tenant space for Corteva, Generon	Unknown	Present
Dow Chemical Company	Dow Chemical Company	1963	Early 1980's
Ethyl Corporation	Manufacturing of tetraethyl lead	At least 1957	1963

2.4 Physical Setting

According to United States Geological Survey topographic maps reviewed, including the map included as **Figure 1**, the subject property is just south of the Dowest Slough and north of Arcy Lane. The subject property topographic elevation is approximately 14 feet above mean sea level, and local topography slopes to the north- northeast. The topographic downward slope observed at the subject property during the site reconnaissance is generally toward the northeast. Based on local topography and historical environmental reports provided to TRC, as applicable, the assumed direction of shallow groundwater flow is to the north- northeast, New York Slough. However, a subsurface investigation would be required to determine actual groundwater flow direction.

The database radius report, supplied by Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut, was reviewed to obtain information regarding the dominant soil composition in the vicinity of the subject property. This information is summarized below:

Soil Component Name:	Clearlake, Rincon
Hydric Status:	Partially hydric - Capay
	Soil does not meet the requirements for a hydric soil - Rincon
Soil Surface Texture:	Clay, clay loam
Deeper Soil Types:	Silty clay loam

Please refer to the Geocheck Physical Setting Source Summary of the EDR report presented in **Appendix A** for further information regarding the soil composition in the vicinity of the subject property.

3.0 USER-PROVIDED INFORMATION

According to ASTM Practice E1527-21, certain tasks that may help identify the presence of RECs associated with the subject property are generally conducted by the Phase I ESA User. These tasks include providing or authorizing the environmental professional to obtain recorded land title records for environmental liens or activity and use limitations (AULs); providing specialized knowledge related to RECs at the subject property (e.g., information about previous ownership or environmental litigation); providing commonly known or reasonably ascertainable information within the local community about the subject property that is material to RECs in connection with the subject property; and informing the environmental professional if, as believed by the User, the purchase price of the subject property is lower than the fair market value due to contamination. A copy of the User questionnaire is included in **Appendix B**. Information provided by the User is listed in Section 4.4.

3.1 Records for Environmental Liens or Activity and Use Limitations

According to the information provided by the User to TRC, a review of title and judicial records for environmental liens or AULs associated with the subject property, an activity use covenant/limitation for the main parcel encompassing the subject property exists. The covenant is associated with the former Dow Chemical operation and specifically the former solar evaporation ponds A-D which does not encompass the subject site 24-acre site limits.

3.2 Specialized Knowledge

Specialized knowledge regarding the subject property and/or nearby properties was not provided by the User.

3.3 Property Value Reduction Issues

The User was not aware of property valuation reduction issues regarding the subject property.

3.4 Commonly Known or Reasonably Ascertainable Information

TRC was supplied with commonly known and/or reasonably ascertainable information regarding the subject property by the User. This information was used during this Phase I ESA and has been incorporated in this report as applicable.

3.5 Reason for Conducting a Phase I ESA

TRC understands the User requires a Phase I ESA for due diligence purposes.

DRAFT

4.0 RECORDS REVIEW

4.1 Historical Research

Information regarding subject property and vicinity historical uses was obtained from various publicly available and practically reviewable sources including:

- Aerial photographs dated 1937, 1939, 1952, 1957, 1963, 1966, 1972, 1979, 1984, 1998, 2006, 2009, 2012, 2016, and 2020;
- Topographic maps dated 1907, 1908, 1912, 1916, 1918, 1953, 1968, 1978, 1980, 2012, 2015, and 2018;
- City directories dated 2005, 2010, 2014, 2017, and 2020 (which did not cover the subject property);
- Local municipal records;
- An environmental database report; and
- Interviews with subject property representative, as necessary.

Aerial photographs, topographic maps, city directories, and the environmental database report were provided by EDR. Historical research documentation is included in **Appendix C**.

Historical Sanborn® Fire Insurance Maps (Sanborn Maps®) were originally produced for assessing fire insurance liability in urban areas in the United States. The maps provide detailed information (e.g., building construction, subject property occupants, storage tank locations, and hazardous material storage areas), which can be used as a resource to document land use and structural change over time. EDR researched the availability of Sanborn Maps® in the vicinity of the subject property; however, EDR stated that Sanborn Map® coverage does not exist for the subject property or nearby surrounding area.

4.1.1 Subject Property History

Operational History

Table 4.1 - Subject Property History

Year	Subject Property History
From at least 1907 to at least 1939	According to the 1907 to 1918 topographic maps and the 1937 through 1952 aerial photographs, no structures are depicted at the subject property. The 1937 through 1952 aerials do depict the Dowest Slough extending through the northwest portion of the subject property.
From at least 1957 to at least 1984	Based on aerial photographs, the subject property appears to be improved with the original infrastructure of the Dow Chemical Plant, that includes at least four building structures, the rail spurs, and the water tower. The 1968 topographic map depicts multiple infrastructure features on the site but by 1980 most of the features are no longer depicted. The Dowest Slough on the northwest corner has been filled in during this time period.

Table 4.1 - Subject Property History

Year	Subject Property History
From at least 1984 to present	The aerial photographs indicate from at least 1984 to the present there is little change to the site configuration except for the addition of new structure along north central property boundary and the property appears to be in its current configuration. The topographic maps do not depict any structures or the rail spurs on the subject property during this timeframe.

4.1.2 Adjoining Property History

Table 4.2 - Adjoining Property History

Direction from Subject Property	Adjoining Property History
North	Since at least 1937 through 1952 the north adjoining properties were open land with no structures. By 1957 there appears to be some grading and filling in of the Dowest Slough. Two structures appear on the north adjoining property in 1998 and the development of this property has expanded by 2006 with additional road infrastructure in 2008.
South	Since at least 1937 through 1963 the north adjoining properties were open land with no structures. In 1966 there is a large structure on the property and by 1984 development of the property has expanded to include additional infrastructure. Additional expansion appears to take place in 2006 through 2012.
East	Since at least 1937 through the present the east adjoining properties were open land with no structures. A road did appear to have been graded in 1957 to access properties northeast of the subject property.
West	Since at least 1937 through the present the west adjoining properties were open land with no structures and occupied by the Dowest Slough. The development detailed above to the south of the site is considered west of the southernmost portion of the subject property.

4.1.3 Surrounding Property History

Since at least 1937, the surrounding area was historically open land with scattered roads and waterways. By 1966, extensive industrial development including railroads occurred and continued through the 1990s.

4.2 Database Report and Environmental Record Review

A database search report that identifies properties listed on state and federal databases within the ASTM-required radii of the subject property was obtained from EDR. These properties included those that could be mapped and those that could not (i.e., orphan properties). A copy of the database search report is included in **Appendix A**. The database search report includes the list of environmental databases/records searched and their corresponding abbreviations.

4.2.1 Subject Property

Subject property information included in the database search report is summarized in the following table:

DRAFT

Subject Property Facility Name(s) and/or Address(es)	**Ethyl Corporation** End of Loveridge Road
Map No(s).	1
Database(s)	Envirostor
Description/ID No(s).	Referred to RWQCB 1/12/2003 Facility ID: 7280107
Database Review Summary	Ethyl Corporation is listed as being immediately east of the site and used and stored chemicals to manufacture tetraethyl lead prior to DOW Chemical Company's purchase of the property in 1982. Soil samples collected in 1979 detected lead in surface soils from 50 to 638 mg/kg and in 1990 groundwater sampling detected carbon tetrachloride, chloroform, and trichloroethylene up to 10, 1.4, and 1.2 mg/L respectively. This property was incorporated into the corrective action under the Hazardous Waste Management Program oversight at the DOW Chemical Company property that is now under the direction of the Water Board. The Ethyl Corporation Property was considered part of the Dow 900/1000 Block SWMU and the SWMU is considered closed. Ethyl Corporation stored chemicals used to manufacture tetraethyl lead in this area prior to Dow's purchase of the property in 1982. Groundwater monitoring was previously performed in accordance with the cleanup order. Groundwater extraction wells were installed to contain an isolated low level VOC plume and were operated between April 1992 and February 1995. A Workplan for groundwater investigation was submitted to the Board in August 2002, but was not implemented. Groundwater concentrations of contaminants were low to non-detect during the final sampling events. Given the likely presence of lead in subsurface soil and historic low concentrations of VOCs in groundwater, this listing is considered a REC.

TRC notes that no oil/gas production wells, water wells, or pipelines were identified on the subject property based on information provided by EDR. Monitoring wells were listed to be present on the property and were observed (see Site Reconnaissance Section 6.0 and **Appendix D**) during the Site reconnaissance.

Based on the above listing, TRC conducted a file review of Ethyl Corporation for available files maintained at the Department of Toxic Substances Control (DTSC), Regional Water Quality Control Board (Water Board). The Ethyl Corporation case was incorporated into the corrective action for the DOW Chemical Company property and the SWMU was closed in 2016 and no regulatory action items are required at this time.

4.2.2 Adjoining and Surrounding Property Record Review

TRC evaluated the following factors to determine whether additional environmental records should be reviewed with respect to the potential for contaminant migration from the adjoining and surrounding properties:

(1) Whether the property is upgradient or downgradient of the subject property related to potential groundwater migration based on the local topography, and the assumed (or known) groundwater depth and shallow groundwater flow direction (refer to Section 2.4 above);
(2) Whether the property is upgradient or downgradient of the subject property related to potential vapor migration based on readily available information pursuant to ASTM Practice E1527-21 including soil and geological characteristics; contaminant characteristics; contaminated plume migration data; and significant conduits that might provide preferential pathways for vapor migration such as major utility corridors, sanitary sewers, storm sewers, and significant natural conduits such as karst terrain (vapor migration may also be influenced by the age and design of infrastructure features associated with these conduits);
(3) Property case status (i.e., whether the state environmental agency or applicable regulatory authority has issued a No Further Action (NFA) letter or other similar closure document);
(4) Type of database and whether the presence of contamination is known; and
(5) The distance between the listed property and the subject property.

Based on this evaluation, TRC limited the review of additional environmental records to the properties listed below because the other properties are considered to have a low potential for contamination to migrate to the subject property.

4.2.2.1 Adjoining Properties

Information regarding adjoining properties (those which share a common property boundary with the subject property) included in the database search report is summarized in the following table:

Facility Name(s) and/or Address(es)	**Generon IGS, INC** Foot of Loveridge Road, Pittsburg, CA
Map No(s).	A2, A3
Approximate Location Relative to the Subject Property	Adjoining north- northeast
Presumed Hydrogeologic Setting	Downgradient
Database(s)	PFAS ECHO, EMI, RCRA NonGen/NLR, CERS
Description/ID No(s)	Facility ID: 14654 CERS ID: 11003800521
Database Review Summary	The facility is listed as generating the following spent halogenated solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, and 1,1,2, Trichloroethane. Also generation of spent solvent mixtures/blends. Based on the administrative nature of the listings the facility is not considered a REC.

Facility Name(s) and/or Address(es)	**Delta Energy Center (**Current Schlumberger property that bounds the subject property to south and west) 1200 Arcy Lane
Map No(s).	B4, B5
Approximate Location Relative to the Subject Property	Adjoining south-southwest
Presumed Hydrogeologic Setting	Upgradient
Database(s)	RCRA SQG, AST, WDSCPS-SLIC, CIWQS, CHMIRS, NPDES, CERS, CERS HAZ WASTE, CERS Tanks
Description/ID No(s)	Facility ID: S105886148 CERS ID: 10017064 OES Number: 14938 EPA ID: CAR000072371
Database Review Summary	The facility has had multiple past violations that include: • Failure to provide and maintain secondary containment for bulk storage tank installations sufficient to hold the capacity of the largest container and sufficient freeboard for precipitation. - Returned to compliance on 06/06/2019. • APSA Program - Near the condenser, at the open drain, there appeared to be oil around the drain. Water was present, however there was large staining and upon inspection a residue was present. Facility is to maintain containment and ensure spills/releases are cleaned up immediately. Returned to compliance on 06/06/2019 • Business Plan Program -Administration/ Documentation – Returned to compliance on 05/17/2013 Based on the administrative nature of the listings the facility is not considered a REC.

Based on the above listings, no information regarding a release at the adjacent properties was noted. Therefore, no subsequent file review was conducted.

4.2.2.2 Surrounding Properties

Information regarding surrounding properties (those within the general vicinity of the subject property) included in the database search report is summarized in the following tables:

Facility Name(s) and/or Address(es)	**Salt River Construction** 1 Arcy Lane

DRAFT

Map No(s).	**13**
Approximate Location Relative to the Subject Property	0.229 miles south- southeast
Presumed Hydrogeologic Setting	Cross- to downgradient
Database(s)	Contra Costa Co. Site List
Description/ID No(s)	Facility ID: FA0030544 CERS ID: 10019350
Database Review Summary	Based on the administrative nature of the listings the facility is not considered a REC.

Facility Name(s) and/or Address(es)	**Dow Chemical Co**. 900 Loveridge Road
Map No(s).	14, D16
Approximate Location Relative to the Subject Property	0.371 miles northwest
Presumed Hydrogeologic Setting	Cross gradient
Database(s)	AST, CHMIRS, CPS-SLIC, ENF, ENVIROSTOR, Hist Cortese, NPDES, CIWQS, CERS, SEMS-ARCHIVE, CORRACTS, RCRA NonGen/NLR, HWTS, ICE, WDS, HWP, HAZNET, SWF/L, HIST UST, US FIN ASSUR, RAATS, ICIS, FTTS, US AIRS, HWP, Contra Costa Co. Site List
Description/ID No(s)	Facility ID: SL20210828, 07280120 EPA ID: CAD076528678
Database Review Summary	Given the extensive history of the DOW-associated facilities within the area of concern, TRC conducted a file review of the facility for available files maintained at the RWQCB. This discussion is presented below.

Facility Name(s) and/or Address(es)	**Hydrochem Industrial Services Inc.** Loveridge Road
Map No(s).	15
Approximate Location Relative to the Subject Property	0.523 miles west- northwest
Presumed Hydrogeologic Setting	Crossgradient

DRAFT

Database(s)	Envirostor
Description/ID No(s).	Facility ID: 80001822
Database Review Summary	The facility is listed as "Inactive – needs evaluation" as of June 2009. No additional information was available for the facility. Based on facility's distance and direction from the subject property as well as its regulatory status it is not considered a REC.

Based on the above listings, TRC conducted a file review of available files maintained at the RWQCB for the Dow Chemical facility. The Dow Chemical Company owns and operates a chemical manufacturing facility at 901 Loveridge Road that is bounded by the New York Slough on the north, the Pittsburg-Antioch Highway on the south, Loveridge Road on the west, and parklands and commercial areas on the east. The facility also reportedly encompassed a portion of the subject property where Ethyl Corporation operated. Historically, Dow used the site to manufacture chlorine, sodium hydroxide, hydrogen, and chlorinated solvents, including carbon tetrachloride and tetrachloroethene. In addition to chemical manufacturing activities, Dow conducts chemical development research at its Pittsburg facility. The Calpine Corporation operates a power plant on site, producing electricity and steam and The Cynera Company and M.G. Generon fabricate reverse osmosis membranes on the Dow property.

Since March 2000, Dow has operated the prototype EISB system proposed in their 1999 revised corrective action plan (CAP) in lieu of the site-wide hydraulic containment remedy proposed in their 1997 Cap. An effectiveness evaluation report of the EISB system was submitted in March 2006.

As detailed above Ethyl Corporation stored chemicals used to manufacture tetraethyl lead in this area prior to Dow's purchase of the property in 1982. Currently, approximately 70% of area is covered with asphalt pavement or cement. Groundwater extraction wells were installed to contain an isolated low-level volatile organic compounds (VOC) plume but are no longer active and lead was not detected in groundwater when monitoring was discontinued. There is known residual lead in soil below the asphalt and cement surfaces.

4.3 Vapor Encroachment Evaluation

Vapor encroachment screening (VES) was conducted to evaluate chemicals of concern (COC) that may migrate to the vadose zone of the subject property through preferential pathways from either adjacent properties or the subject property itself due to contamination of soil and groundwater. The evaluation was performed in general accordance with ASTM E 2600-15.

Based on the EDR-provided database, historical documents, and subject property reconnaissance observations, TRC identified the following *potential* vapor encroachment conditions (VECs):

Tier 1

- Historical operation of the subject property to manufacture tetraethyl lead.
- Low level VOC plume from past historical operations.

DRAFT

- Nearby Dow Chemical Manufacturing facility with reported VOC releases.
- Current onsite chemical storage

Tier 2

- Review of Ethyl Corporation available regulatory records indicate that VOCs were detected in elevated concentrations in groundwater.

Soil characteristics, groundwater flow direction, and hydrologic characteristics of the physical setting suggest that vapors may have migrated from the off-site sources to the target property (ASTM E 2600-15 Section 8.3.3) based on records indicating past onsite groundwater extraction was performed. Based on the past trace detections of VOC in onsite groundwater, the VOCs are considered to have a potential to impact the environmental condition of the subject property and is thus considered a potential VEC.

4.4 Title and Judicial Records for Environmental Liens or AULs

User-provided information regarding potential environmental concerns associated with title or judicial records, or the existence of environmental liens or AULs for the subject property is discussed in Section 3.0.

In addition to reviewing the EDR report (discussed in Section 4.2) and local municipal records (Section 4.5), as requested by the User, TRC obtained supplemental information regarding possible environmental liens and AULs at the subject property from EDR, which is included in **Appendix C**. An AUL for the main parcel encompassing the subject property was identified. The AUL is associated with the former Dow Chemical operation and specifically the former solar evaporation ponds A-D, which does not encompass the subject property 24-acre site limits.

4.5 Previous Documents

The User provided the following documents for TRC's review:

- March 2018, Dow Chemical Plant RCRA Hazardous Waste Facility Permit Application for Block 560 Drum Storage Area prepared by CH2M Hill for DOW Chemical Company. The application details Resource Conservation and Recovery Act (RCRA) hazardous waste facilities operating at this site which include the Block 560 Drum Storage Area and two permitted industrial furnaces. The application further details the chemical and physical analysis of waste streams that that could potentially be stored in the Block 560 Drum Storage Area. None of the facilities are within the footprint of the Subject Property and the application does not cover the Subject Property.
- June 3, 2019, Revised Part A and Part B Permit Application for the Renewal of RCRA Hazardous Waste Facility Permit Monofill Corteva Agriscience - Pittsburg Operations prepared by Jacobs for Corteva Agriscience. The application updates the Hazardous Waste Post Closure Facility Permit (PCFP) for the Monofill issued by the DTSC which allows Corteva to monitor and maintain the Monofill for post-closure activities and is a renewal of the PCFP for the Monofill, which expired December 12, 2017. In 1987, six solar evaporation ponds were closed in accordance with 22 CCR 66264.112. Four of the ponds, A through D, were located adjacent to each other and Ponds E and F were located adjacent to each other, approximately 500 feet from the southern end of Ponds A through

D. During closure, the pond wastes were consolidated and solidified. As the ponds were closed, the Monofill was constructed at the same location as Ponds A through D. The solidified wastes were placed in the Monofill and the unit was closed. Post-closure care has been ongoing since that time. Ponds E and F were clean closed. The closest Pond is approximately 1,000 feet west and crossgradient of the Subject Property. As the ponds are not within the footprint of the Subject Property, the application does not cover the Subject Property.

- February 2023, 2019 Part B Permit Application for the Renewal of Hazardous Waste Facility Permit Boiler and Industrial Furnace Permit Corteva Agriscience - Pittsburg Operations prepared by Jacobs for Corteva Agriscience. The application details the RCRA hazardous waste storage units operating under this permit; two Halogen Acid Furnaces (HAFs) that are operating under Boiler and Industrial (BIF) RCRA Equivalent Permit 01-NC-08. None of the units are within the footprint of the Subject Property and the application does not cover the Subject Property.

Information provided in these reports is not relevant to Dow's past onsite operations nor current operations and is therefore is not further discussed in the report.

4.6 Other Environmental Record Sources

Per the ASTM Standard, local or additional state records were reviewed to enhance and supplement the ASTM-required federal and state records reviewed and discussed earlier in this report. Local sources that were contacted to obtain this information are discussed below:

Table 4.3 - Other Environmental Record Sources

Regulatory Agency/ Department	Available Information
Contra Costa County Department of Health Hazardous Materials Program (CCCHMP)	TRC contacted the CCCHMP on August 1, 2023. A response was not received by the issuance date of this report.
Contra Costa County Department of Environmental Health (CCCEH)	TRC contacted the CCCEH on August 1, 2023. A response was received on August 9, 2023 from the County Clerk indicating that there were no available records on file for the Site.
Bay Area Air Quality Management District (BAAQMD)	TRC contacted the BAAQMD on August 2, 2023, regarding the availability of files pertaining to the subject property in terms of historical emissions. A response was received on August 10, 2023 and the Public Records Clerk indicated that there were no available records on file for tenant addresses associated with the Site.
Contra Costa County Fire Protection District (CCCFPD)	TRC contacted the CCCFPD on August 1, 2023. A response was not received by the issuance date of this report.
City of Pittsburg Building Department	TRC contacted the City of Pittsburg Building Department on August 1, 2023. A response was not received by the issuance date of this report.

DRAFT

Table 4.3 - Other Environmental Record Sources

Regulatory Agency/ Department	Available Information
City of Pittsburg Geographic Information System (GIS)	TRC accessed the City of Pittsburg GIS system on July 27, 2023, to obtain the Site's parcel number, acreage, general information, and property ownership. This information is included throughout this report as applicable.
Department of Toxic Substances Control (DTSC) - Envirostor	TRC accessed the California Department of Toxic Substance Control online database system on July 31, 2023, to obtain any available files related to releases or potential contaminants associated with the Site or in the near vicinity. Subject property information is on record for the subject property as well as for several adjoining and surrounding properties' and included throughout this report as applicable.
San Francisco Bay Regional Water Quality Control Board (RWQCB) - GeoTracker	TRC accessed the Regional Water Resources Control Board online database system on July 31, 2023, to obtain any available files related to releases or potential contaminants associated with the Site or in the near vicinity. Subject property information is on record for the subject property as well as for several adjoining and surrounding properties' and included throughout this report as applicable.

DRAFT

5.0 INTERVIEWS

The following person was interviewed to obtain historically and/or environmentally pertinent information regarding potential RECs associated with the subject property. The information provided is discussed and referenced throughout this report.

- Jason Ruhl, Property Business Manager of Corteva, with 26 years of experience and knowledge of the subject property, was interviewed on July 24, 2023.
- Megan Good, Key Applicant Representative of HC (Contra Costa)with knowledge of the subject property, was interviewed on July 27, 2023.

Information provided is discussed throughout the report and referenced in Section 4.5. Other references and sources of information are included in **Appendix D**.

DRAFT

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

Brian Mo, TRC Staff Geologist, conducted a site reconnaissance of accessible areas on and around the subject property on July 24, 2023, for the purpose of identifying potential RECs. Photographs taken during the site reconnaissance are provided in **Appendix E**. A subject property layout plan is included as **Figure 2**.

Limiting conditions encountered during the site visit consisted of the following:

- Access and documentation of current tenant facilities within the subject property was not permitted by the property owner to protect proprietary information.
- Overgrown vegetation limited observations near the eastern subject property boundaries.
- The integrity and functionality of underground structures (e.g., associated piping and structures with the present digester tanks) could not be discerned during the site visit given their underground nature.

6.2 Interior and Exterior Subject Property Observations

Unless otherwise noted, the items listed in the table below appeared in good condition with no visual evidence of staining, deterioration, or a discharge of hazardous materials; and there are no records of a release in these areas. Items where further description is warranted are discussed in the section(s) following the table.

Table 6.1 - Interior and Exterior Subject Property Observations

Item	Present (Current/ Historical/ Not Observed)	Description
Hazardous material storage or handling areas	Current	Hazardous material storage from current tenants (Generon and Schlumberger) was observed in the northern portion of the subject property.
Solid and liquid wastes including municipal wastes	Current	See Section 6.2.2
Underground Storage Tanks (USTs) and associated piping	Not Observed	See Section 6.2.3.
Aboveground Storage Tanks (ASTs) and associated piping	Current	See Section 6.2.4.
Unlabeled drums and containers (≥5 gallons)	Not Observed	
Strong, pungent, or noxious odors	Not Observed	

DRAFT

Table 6.1 - Interior and Exterior Subject Property Observations

Item	Present (Current/ Historical/ Not Observed)	Description
Pools of liquid, including surface water bodies and sumps (handling hazardous substances or substances likely to be hazardous only)	Not Observed	
Known or Likely PCB-containing items (liquid-filled transformers, hydraulic equipment, etc.)	Not Observed	
Stains or corrosion	Not Observed	
Drains and sumps	Current	Stormwater drains are installed throughout the subject property. Observations were limited due to their underground nature.
Oil water separator	Not Observed	
Pits, ponds, and lagoons	Observed	A pit with water and municipal trash was observed between the two digester tanks.
Stressed vegetation	Not Observed	
Fill or stockpiled material	Not Observed	A soil stockpile (Picture 5; Appendix D) was observed between the abandoned former Corteva reactive chemical storage buildings. The source of the material is unknown. TRC has interpreted the unknown source of the soil as a data gap.
Wastewater (discharged from or to the subject property)	Not Observed	
Stormwater (discharged from or to the subject property)	Current	Stormwater flow collects to installed stormwater drains throughout subject property and discharges to Kirker Creek in the west adjoining property.
Wells (including dry wells, irrigation wells, injection wells, abandoned wells, oil and gas wells, or other wells)	Current	Several historical monitoring wells are located within the subject property. All wells are abandoned. A monument map provided by subject property owner is in Appendix D.
Septic systems or cesspools	Not Observed	

DRAFT

Table 6.1 - Interior and Exterior Subject Property Observations

Item	Present (Current/ Historical/ Not Observed)	Description
Debris piles	Current	Two small soil stockpiles from grading activities are located in the northern portion and central portion of the subject property respectively. The soil stockpiles are not tied to any known chemical releases or investigations and was reported to be generated from on-site grading. Due to the historical presence of lead it the soil, TRC has interpreted the source of the soil as a data gap.
Evidence of Uncontrolled Access	Not Observed	

6.2.1 Hazardous Substances

According to subject property representatives, no hazardous substances or petroleum products are generated at the subject property. Containers for hazardous material storage was observed in the central portion of the subject property. The Key Site Manager indicated that all containers in the central portion of the subject property are empty, and the chemicals were not used on the subject property. Accessible labels indicate that 2-chloro-trichloromethylpyridine was contained.

Tenants of the subject property appear to use hazardous substances on the subject property. All hazardous substances appear to be stored in the north storage building. Access and documentation were not permitted for this area by the subject property owner.

6.2.2 Solid and Liquid Wastes

Solid wastes in the form of municipal trash were observed during the site visit. Liquid wastes were not observed.

According to the subject property representative and previous environmental records, there has been no release of hazardous waste at the subject property that has resulted in RCRA Corrective Action.

6.2.3 Underground Storage Tanks

According to subject property representatives, no USTs are currently or have historically been present at the subject property. Additionally, no visual evidence (e.g., vent pipes, fill ports, dispensing equipment, etc.) of USTs was observed during the site visit.

6.2.4 Aboveground Storage Tanks

According to subject property representatives, all ASTs currently or historically present at the subject property have been empty and were just stored on the subject property. As observed by

DRAFT

TRC, more than 50, 4,600-gallon tanks that had previously contained DOW agrichemicals are stored in the central portion of the subject property. The Key Site Manager indicated that all tanks observed could be removed from the subject property. No evidence of staining or corrosion were observed.

6.3 Adjoining and Surrounding Properties Reconnaissance

6.3.1 Adjoining Properties

During the site reconnaissance, TRC viewed the adjoining properties from the subject property and publicly accessible areas (e.g., public roadways, etc.).

Table 6.2 - Adjoining Properties Reconnaissance

Direction from Subject Property	Current Land Use Description
North, West	Corteva Agriscience (901 Loveridge Rd) agricultural and pest control chemical manufacturer
East	Disturbed vacant/unoccupied land as former DOW facility
South	Delta Energy Center (1200 Arcy Ln) power station, Delta Diablo Sanitation District (2500 Pittsburg-Antioch Hwy) wastewater treatment

6.3.2 Surrounding Properties

Surrounding properties generally include industrial entities to the north and east, commercial use to the south, and mixed commercial and industrial use to the west.

DRAFT

7.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Potential findings can include RECs, controlled RECs (CRECs), historical RECs (HRECs), and de minimis conditions, pursuant to ASTM Practice E1527-21.

RECs are defined as (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment: (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

CRECs are defined as RECs affecting the subject property that have been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, AULs, institutional controls, or engineering controls).

HRECs are defined as previous releases of hazardous substances or petroleum products affecting the subject property that have been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria without subjecting the subject property to any controls (for example, property use restrictions, AULs, institutional controls, or engineering controls). An HREC is not a REC.

De minimis conditions are related to a release that generally does not present a threat to human health or the environmental and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not RECs nor CRECs.

Business environmental risks (BERs) are defined as a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope considerations.

Data gaps are defined as a lack of or inability to obtain information required by this practice despite good faith efforts by the Environmental Professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to, site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the Key Site Manager, regulatory officials, etc.).

TRC has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 at the property located at Loveridge Road on Pittsburg Waterfront Road in the City of Pittsburg, Contra Costa County, California 94565. Any exceptions to, or deletions from, this practice are described in Sections 1.3 and 7.7 of this report.

Findings determined to be RECs, CRECs, HRECs, and/or de minimis conditions are discussed in the sections below.

DRAFT

7.1 RECs

This assessment has revealed the following REC in connection with the subject property:

1. According to the Corteva representative, Ethyl Corporation operated onsite between 1958 and 1963. Based on review of regulatory records, Ethyl Corporation used and stored chemicals to manufacture tetraethyl lead prior to DOW Chemical Company's purchase of the property in 1982. Soil samples collected in 1979 detected lead in surface soils from 50 to 638 mg/kg and in 1990 groundwater sampling detected carbon tetrachloride, chloroform, and trichloroethylene up to 10, 1.4, and 1.2 mg/L respectively. This property was incorporated into the corrective action under the Hazardous Waste Management Program oversight at the DOW Chemical Company property that is now under the direction of the Water Board. Groundwater monitoring was previously performed in accordance with the cleanup order. Groundwater extraction wells were installed to contain an isolated low level VOC plume and were operated between April 1992 and February 1995. A Workplan for groundwater investigation was submitted to the Board in August 2002, but was not implemented. Groundwater concentrations of contaminants were reported to be low to non-detect during the final sampling event. The Ethyl Corporation case was incorporated into the corrective action for the DOW Chemical Company property and the SWMU was closed in 2016 and no regulatory action items are required at this time.

7.2 CRECs

This assessment has revealed no evidence of CRECs in connection with the subject property.

7.3 HRECs

This assessment has revealed no evidence of HRECs in connection with the subject property.

7.4 De Minimis Conditions

This assessment has revealed no evidence of de minimis conditions in connection with the subject property.

7.5 Business Environmental Risks (BERs)

This assessment has revealed the following BERs that warrant further discussion in this section.

- The abandoned training/administrative building located in the central portion of the subject property has signage present indicating asbestos is present in building materials.

- Containers for hazardous material storage were observed in the central portion of the subject property. The Key Site Manager indicated that all containers in the central portion of the subject property are empty, and the chemicals were not used on the subject property. Accessible labels indicate that the containers formerly contained 2-chloro-trichloromethylpyridine.

DRAFT

7.6 Data Gaps

TRC has made an appropriate inquiry into the commonly known and reasonably ascertainable resources concerning the historical ownership and use of the subject property back to the first development per Section 8.3.8 of ASTM Practice E1527-21. The following data gaps were identified during this assessment:

1. An owner, owner representative, or past owner was not available during this Phase I ESA for specialized knowledge of the subject property and adjoining and nearby properties that may be indicative of a REC. However, TRC has not identified significant data gaps indicative of a REC based on the historical information provided by the User and Freedom of Information Act information provided. Therefore, should interviews with an owner, an owner representative, or past owner be completed, findings in this Phase I ESA are not likely to substantially change.
2. Access was not available to several of the tenant buildings and tenants of the subject property appear to use hazardous substances on the subject property in the north storage building along the northern border. Access and documentation were not permitted for this area by the subject property owner.
3. The Dowest Slough on the northwest corner of the Site was filled in sometime in the early 1960's. Due to the industrial history of the surrounding area and the unknown source of the backfill material, this is considered a data gap.
4. A soil stockpile was observed between the abandoned former Corteva reactive chemical storage buildings. Due to the industrial history of the Subject Property and the unknown source of the stockpile this is considered a data gap.
5. Two small soil stockpiles from grading activities are located in the northern portion and central portion of the subject property respectively. The soil stockpiles are not tied to any known chemical releases or investigations and was reported to be generated from on-site grading. Due to the historical presence of lead it the soil, TRC has interpreted the source of the soil as a data gap.

The data gaps associated with the unknown source of the soil should be considered if disturbance of soil in these areas is anticipated.

7.7 Limiting Conditions and Deviations

7.7.1 Accuracy and Completeness

ASTM Practice E1527-21 recognizes inherent limitations for Phase I ESAs that apply to this report, including:

- Uncertainty Not Eliminated – No Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Data gaps identified during this Phase I ESA are listed in Section 7.6.
- Not Exhaustive – A Phase I ESA is not an exhaustive investigation.
- Past Uses of the Property – A review of standard historical sources at intervals less than 5 years is not required.

DRAFT

The Applicant is advised that the Phase I ESA conducted at the subject property is a limited inquiry into a property's environmental status, cannot wholly eliminate uncertainty, and is not an exhaustive assessment to discover every potential source of environmental liability at the subject property. Therefore, TRC does not make a statement i) of warranty or guarantee, express or implied for any specific use; ii) that the subject property is free of RECs or environmental impairment; iii) that the subject property is "clean;" or iv) that impairments, if any, are limited to those that were discovered while TRC was performing the Phase I ESA. This limiting statement is not meant to compromise the findings of this report; rather, it is meant as a statement of limitations within the ASTM Standard and intended scope of this assessment. Specific limiting conditions identified during the site reconnaissance are described in Section 6.1. Subsurface conditions may differ from the conditions implied by surface observations and can be evaluated more thoroughly through intrusive techniques that are beyond the scope of this assessment. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other construction purposes.

This report presents TRC's site reconnaissance observations, findings, and conclusions as they existed at the time of the site reconnaissance. TRC makes no representation or warranty that the past or current operations at the property are or have been in compliance with applicable federal, state, and local laws, regulations, and codes. TRC makes no guarantees as to the accuracy or completeness of information obtained from others during the course of this Phase I ESA report. It is possible that information exists beyond the scope of this assessment, or that information was not provided to TRC. Additional information subsequently provided, discovered, or produced may alter findings or conclusions made in this Phase I ESA report. TRC is under no obligation to update this report to reflect such subsequent information. The findings presented in this report are based upon reasonably ascertainable information and observed subject property conditions at the time of the assessment.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not assessed. Regardless of the findings stated in this report, TRC is not responsible for consequences or conditions arising from facts that were not fully disclosed to TRC during the assessment.

An independent data research company provided the government agency database referenced in this report. Information regarding surrounding area properties was requested for approximate minimum search distances and was assumed to be correct and complete unless obviously contradicted by TRC's observations or other credible referenced sources reviewed during the assessment.

TRC is not a professional title insurance or land surveyor firm and makes no guarantee, explicit or implied, that any land title records acquired or reviewed, or any physical descriptions or depictions of the property in this report, represent a comprehensive definition or precise delineation of property ownership or boundaries.

7.7.2 Warranties and Representations Disclaimer

TRC prepared this document solely for the benefit of the Applicant and the User. With regard to third-party recipients of this document, neither TRC, nor the Applicant, nor the User, nor any of their respective parents, affiliates, or subsidiaries, nor any person acting on their behalf: (a) makes any warranty, expressed or implied, with respect to the use of any information or methods disclosed in this document; or (b) assumes any liability with respect to the use of any information

or methods disclosed in this document. Any third-party recipient of this document, by its acceptance or use of this document, releases TRC, the Applicant, the User, and their parents, affiliates, and subsidiaries from any liability for direct, indirect, economic, incidental, consequential, or special loss or damage whether arising in contract, warranty, express or implied, tort, or otherwise, and irrespective of fault, negligence, and strict liability.

This report does not warrant against: (1) operations or conditions which were not evident from visual observations or historical information provided; (2) conditions which could only be determined by physical sampling or other intrusive investigation techniques; (3) locations other than the Applicant-provided addresses and/or subject property description; or (4) information regarding off-site location(s) (with possible impact to the subject property) not published in publicly available records.

7.7.3 Continued Validity/User Reliance

This report is presumed to be valid, in accordance with, and subject to, the limitations specified in ASTM Practice E1527-21, for a period of 180 days from the completion of each component using the dates provided in Section 8, or until the applicant obtains specific information that may materially alter a finding, opinion, or conclusion in this report, or until the Applicant is notified by TRC that it has obtained specific information that may materially alter a finding, opinion, or conclusion in this report. Additionally, pursuant to ASTM Practice E1527-21, this report is presumed valid if the required components are completed fewer than 180 days prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction.

7.7.4 Significant Assumptions

During this Phase I ESA, TRC relied on database information; interviews with subject property representatives, regulatory officials, and other individuals having knowledge of subject property operations; and User-provided information as requested in our authorized Scope of Work. TRC has assumed that the information provided is true and accurate. Reliance on electronic database search reports is subject to the limitations set forth in those reports. TRC did not independently verify the information provided. TRC found no reason to question the validity of the information received unless explicitly noted elsewhere in this report. If other information is discovered and/or if previous reports exist that were not provided to TRC, our conclusions may not be valid.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---- National Priority List
Proposed NPL ---- Proposed National Priority List Sites
NPL LIENS ---- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---- Federal Facility Site Information listing
SEMS ---- Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE ---- Superfund Enterprise Management System Archive

Lists of Federal RCRA TSD facilities

RCRA-TSDF ---- RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-LQG ---- RCRA - Large Quantity Generators
RCRA-VSQG ---- RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS ---- Land Use Control Information System
US ENG CONTROLS ---- Engineering Controls Sites List

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/06/2023 has revealed that there are 4 CORRACTS sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
DOWELL SCHLUMBERGER EPA ID:: CAT080010580	***LOVERIDGE ROAD***	***NW 1/2 - 1 (0.542 mi.)***	***D18***	***281***

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/24/2023 has revealed that there are 11 ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/06/2023 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
GENERON I G S PITTSB EPA ID:: CAR000009274	***FOOT OF LOVERIDGE RD***	***NNE 0 - 1/8 (0.103 mi.)***	***A3***	***11***

CONTRA COSTA CO SAN EPA ID:: CAD000626408	2500 PITTSBURG ANTIO	SSE 1/8 - 1/4 (0.195 mi.)	C11	93

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 05/08/2023 has revealed that there is 1 FUDS site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
PACIFIC ORDNANCE STE		SW 1/2 - 1 (0.608 mi.)	E26	1017

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 03/30/2023 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
GENERON IGS, INC		NNE 0 - 1/8 (0.103 mi.)	A2	10

HWP: Detailed information on permitted hazardous waste facilities and corrective action ("cleanups") tracked in EnviroStor.

A review of the HWP list, as provided by EDR, and dated 02/13/2023 has revealed that there are 5 HWP sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These

GENERON I G S PITTSBURGH (Continued) **1001085604**

Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Description:	When the plant restarted it over pressured the oily water separator, causing the oily water separator to over flow. RP states a small amount has entered a storm drain. They are taking measures to prevent substance from entering the nearby Dowest SSlough via the storm drain. The product is not near the slough at this time, but they have put absorbent pigs in the outfall structure to prevent substance from entering the slough, as a preventative measure.

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 391273
Site Name: DELTA ENERGY CENTER
Violation Date: 05-06-2019
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to provide and maintain secondary containment for bulk storage tank installations (except for mobile refuelers and other non-transportation-related tank trucks) sufficient to hold the capacity of the largest container and sufficient freeboard for precipitation.
Violation Notes: Returned to compliance on 06/06/2019. OBSERVATION: Failure to maintain secondary containment for bulk storage tank installations sufficient to hold the capacity of the largest container and sufficient freeboard for precipitation. Facility has secondary containment under their used oil tank however it appeared to be about have full of used oil. Facility had approximately 10-15 drums of new product directly outside the covered area from the used oil that had standing water. Facility needs to maintain adequate secondary containment. CORRECTIVE ACTION: Provide and maintain adequate secondary containment for bulk storage containers.
Violation Division: Contra Costa County Health Services Department
Violation Program: APSA
Violation Source: CERS,

Site ID: 391273
Site Name: DELTA ENERGY CENTER
Violation Date: 01-25-2017
Citation: HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple
Violation Description: Business Plan Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 01/25/2017.
Violation Division: Contra Costa County Health Services Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 391273
Site Name: DELTA ENERGY CENTER
Violation Date: 05-06-2019
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to provide and maintain secondary containment for bulk storage tank installations (except for mobile refuelers and other non-transportation-related tank trucks) sufficient to hold the capacity of the largest container and sufficient freeboard for precipitation.
Violation Notes: Returned to compliance on 05/06/2019. OBSERVATION: Failure to provide and maintain secondary containment for bulk storage tank installations sufficient to hold the capacity of the largest container and sufficient freeboard for precipitation. Facility had at least one valve open upon inspection. Valve was located near the switch board area of the site. CORRECTIVE ACTION: Provide and maintain adequate secondary containment for bulk storage containers. However this was corrected on site.

Violations:

Site ID:	24639
Site Name:	DELTA DIABLO SANITATION DISTRICT- TREATMENT PLANT
Violation Date:	03-02-2022
Citation:	HSC 6.7 25291(a)(1) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(a)(1)
Violation Description:	Failure to construct, operate, and maintain primary containment as product-tight.
Violation Notes:	Returned to compliance on 07/12/2022. OBSERVATION: UST system primary containment is not constructed, operated, and maintained product-tight. Diesel primary containment observed to be leaking. Diesel observed in the annular space. First observed on 3/26/2021. UST has not been repaired. CORRECTIVE ACTION: Remove tank or construct, operate, and maintain UST primary containment system so that it is product tight.
Violation Division:	Contra Costa County Health Services Department
Violation Program:	UST
Violation Source:	CERS,

Site ID:	24639
Site Name:	DELTA DIABLO SANITATION DISTRICT- TREATMENT PLANT
Violation Date:	03-02-2022
Citation:	23 CCR 16 2712(b)(3) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(3)
Violation Description:	Failure to comply with one or more of the following requirements for the cathodic protection system: Install corrosion protection for USTs and/or the field-installed cathodic protection system to meet the consensus standards. For impressed current: Have corrosion protection equipment turned on and functioning properly. Inspect the impressed-current system every 60 days. Test the impressed-current system within six months of installation or repair and at least every 36 months thereafter. For sacrificial anodes: Check sacrificial anodes within six months of installation or repair and at least once every 36 months thereafter in accordance with the manufacturer s instructions. For all corrosion protection systems: Maintain records for 78 months on-site or off-site at a readily available location if approved by the UPA.
Violation Notes:	Returned to compliance on 07/12/2022. OBSERVATION: Owner/Operator did not install corrosion protection system to meet the consensus standards, did not maintain records for 78 months on-site or off-site at a readily available location if approved by the UPA, or did not do one or more of the following for an impressed current system: inspect system every 60 calendar days; have corrosion protection equipment turned on and functioning properly; test system within six months of installation or repair and at least every three years thereafter. For sacrificial anodes failed to check within six months of installation or repair and at least once every 36 months thereafter in accordance with the manufacturer s instructions. Corrosion protection system reported to fail testing on 4/22/2021. System has not been repaired.

Violation Description: Failure of the leak detection equipment to have an audible and visual alarm as required.
Violation Notes: Returned to compliance on 07/12/2022. OBSERVATION: The diesel UDC stand alone Beaudreau leak sensor failed to stop the flow of product at the dispenser when tested. All monitoring equipment shall be maintained to activate an audible and visual alarm or stop the flow of product at the dispenser when it detects a leak. CORRECTIVE ACTION: Correct immediately by having a properly licensed, trained, and certified contractor replace the failed component with a functional component (LG 113-x listed, if applicable) and obtain a permit from the CUPA. If the failed component can t be replaced immediately, there is a possibility that the diesel UST system may be red tagged to prevent fuel inputs.

Description:	RP advised that the primary pollution control device is currently down, therefore the secondary pollution control device was being used. The pressure release device activated due to a pipeline leading to the secondary pollution control device being plugged. This caused the release of Carbon Tetrachloride (a by-product from the manufacturing process) into the atmosphere. PER THE NRC: "A CALLER REPORTED A RELEASE OF AN UNKNOWN AMOUNT OF CARBON TETRACHLORIDE INTO AN ATMOSPHERE FROM A STORAGE TANK DUE TO AN OVER PRESSURING IN THE SYSTEM. THE CALLER SUSPECTS THAT THE AMOUNT OF RELEASE WILL LIKELY REACH THE REPORTABLE QUANTITY. REMEDIAL ACTIONS THE CALLER STATED THAT THE FACILITY TECHNICIANS ARE WORKING TO BYPASS / REROUTE THE COLLECTION POINT TO RELIEVE THE PRESSURE IN THE SYSTEM."

Description:	RP states: Site air loss caused a safety system to activate & water quench to the dryer which caused the dryer to overfill and activate a pressure release disk. Release impacted the process area. Release is contained and no longer releasing. No waterways impacted. Unknown who (Dow or Contractor) will conduct clean up. NRC Report states: "CALLER IS REPORTING THAT AN AIR LOSS ACTIVATED A SAFETY SYSTEM WHICH CLENCHED A DRIER CAUSING THE DRIER TO OVERPRESSURE RELEASING DICHLOROPROPENE AND METHLYENE CHLORIDE TO THE AIR. MADE NOTIFICATIONS."

Description:	Per NRC Report: Caller is reporting they had a release of chlorine gas into the air from their facility possibly due to a power outage. The cause of the incident is unknown at this time. Caller states they are not sure if this will reach the reportable quantity amount of 5 pounds. The release was secured and investigation is underway and calculating the amount released.

Facility Size:	Small Treatment
Supervisor:	TARYN STOKELL BUCK
Site Code:	200164, 200302
Senate District:	07, 9
Assembly District:	11
Public Information Officer:	Not reported
Commercial Offsite Facility Types:	Landfills, Treatment Facilities
Quarterly Update:	QUARTERLY UPDATE Quarterly Update Period: October 1, 2022 to December 31, 2022. The facility has three Hazardous Waste Facility Permits: (1) Boiler and Industrial Furnace (BIF) Permit, (2) Block 560 Drum Storage Permit, and (3) Monofill Post-Closure Permit. RECENT ACTIVITY One of the facility permits is in the renewal application process. Recent activity details are provided in the "PERMITTING REGULATORY DESCRIPTION/HISTORY" section below. After the Dow Chemical Company and E.I. du Pont Nemours & Company had a successful merger in 2017, the resulting facility applied for three sets of Permit Modifications (to change all legal entities, from Dow to Corteva) for BIF, Monofill and Block 560 DSA permits: i) 1st Mod: Class 1* Mod (March 1, 2019) to make ownership transfer & name changes to all three (3) permits, Block 560, Monofill & BIF. And, by that time, the facility should be named Corteva Agriscience Pittsburg Operations, the owner & operator should be named Dow AgroSciences, LLC, and the owner of real property should be named Centen Ag LLC. ii) 2nd Mod: Class 1 Mods (January 1, 2021) to change the Dow AgroSciences, LLC to Corteva Agriscience LLC, separately to Block 560 and Monofill. And, by that time, the facility should still be Corteva Agriscience Pittsburg Operations, the owner & operator should be changed to Corteva Agriscience LLC, and the owner of real property should still be Centen Ag LLC. iii) 3rd Mod: Class 1 Mods (September 1, 2021, September 21, 2022 and September 21, 2022) to change the Centen Ag LLC to Corteva Agrisceince LLC, individually to BIF, Monofill and Block 560. And, by now, the facility should still be Corteva Agriscience Pittsburg Operations, the owner & operator should still be Corteva Agriscience LLC, and the owner of real property should be changed to Corteva Agriscience LLC. FACILITY DESCRIPTION/HISTORY (1) BIF Permit: The Facility is located at 901 Loveridge Road (Facility) in the City of Pittsburg, in Contra Costa County, on 513 acres of land. Dow purchased the property in 1938.

Title Description:	Change of Ownership and Names of Facility/Operator/Property Owner for BIF, Monofill Landfill, Block 560 Drum Storage Area
Due Date:	Not reported
Comments:	The initial Permit Mod letters were modified & submitted by 3/8/19. DTSC is waiting for Notice through mailing list, copy of newspaper print of Public Notice, facility s confirmation of successful merger/re-org/transfer of ownership and three Modified Part Bs (BIF, Monofill & Block 560 Drum Storage Area). Facility chose to deal with on-going Monofill permit first, while leaving BIF in Technical Review. Facility will now deal with Block 560 in the near future.

Comments:	Merger transaction is expected to complete by 4/1/2019. A conditional DTSC approval will be sent out to allow facility to move forward with merger/re-organization. A final approval will depend on fulfillment of Notice/Public Notice, successful merger/re-organization/transfer of responsibilities, coverage & liabilities. Conditional Approval Letters were not sent out. Continuous discussion was on going to address incomplete FA, DS issues.

WDS:
Name: THE DOW CHEMICAL COMPANY
Address: 901 LOVERIDGE RD
City: PITTSBURG
Facility ID: San Francisco Bay 071017001
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.

THE DOW CHEMICAL COMPANY (Continued) **S105256192**

Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	CA0004910 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion:	2
Facility Telephone:	Not reported
Facility Contact:	ATTN: SANDY GALGANSKI
Agency Name:	THE DOW CHEMICAL COMPANY
Agency Address:	PO BOX 1398
Agency City,St,Zip:	PITTSBURG 94565
Agency Contact:	RANDY FISCHBACK
Agency Telephone:	9254325122
Agency Type:	Private
SIC Code:	2819
SIC Code 2:	2879
Primary Waste Type:	Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.
Primary Waste:	FILBRI
Waste Type2:	I
Waste2:	Filter Backwash Brine Waters
Primary Waste Type:	Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.
Secondary Waste:	Stormwater Runoff
Secondary Waste Type:	Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Design Flow:	1
Baseline Flow:	1
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The POTW Does not have an approved pretreatment program. Some POTWs may have local pretreatment programs that have not been approved by the regional board and/or EPA.
Treat To Water:	Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.
Complexity:	Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.
Name:	THE DOW CHEMICAL COMPANY
Address:	901 LOVERIDGE RD
City:	PITTSBURG
Facility ID:	San Francisco Bay 071017002
Facility Type:	Solid Waste Site-Class I - A solid waste facility at which hazardous waste may be treated or stored.
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	Not reported
Subregion:	2

Primary Waste Type:	Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.
Primary Waste:	PROCES
Waste Type2:	D
Waste2:	Process Waste (Waste produced as part of the industrial/manufacturing process)
Primary Waste Type:	Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.
Secondary Waste:	Washwater Waste (Product washwater wastes: E.G., photo reuse wastewater, vegetable washwater)
Secondary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The POTW Does not have an approved pretreatment program. Some POTWs may have local pretreatment programs that have not been approved by the regional board and/or EPA.
Treat To Water:	Major Threat to Water Quality. A violation could render unusable a ground water or surface water resource used as a significant drink water supply, require closure of an area used for contact recreation, result in long-term deleterious effects on shell fish spawning or growth areas of aquatic resources, or directly expose the public to toxic substances.
Complexity:	Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.

DOW CHEMICAL CO PITTSBURG FACILITY - LANDFILL (Continued) **S110420971**

Site History: The Dow Chemical Company owns and operates a chemical manufacturing facility at 901 Loveridge Road in Pittsburg, California. The site is bounded by the New York Slough on the north, the Pittsburg-Antioch Highway on the south, Loveridge Road on the west, and parklands and commercial areas on the east. Residential areas exist further to the south beyond the Antioch-Pittsburg Highway. The site occupies approximately 993 acres of which approximately 235 acres are a wetland preserve located on the eastern side of the facility. In addition to active chemical manufacturing facilities, the site contains an active Class II (designated) solid waste landfill and a number of closed solid waste disposal units. (More information on the landfill can be found in Geotracker ID # L10002834653) Dow currently manufactures latex, agricultural chemicals, fumigants, fungicides, and hydrochloric acid at their Pittsburg facility. Historically, Dow used the site to manufacture chlorine, sodium hydroxide, hydrogen, and chlorinated solvents, including carbon tetrachloride and tetrachloroethene. In addition to chemical manufacturing activities, Dow conducts chemical development research at its Pittsburg facility. The Calpine Corporation operates a power plant on site, producing electricity and steam. The Cynera Company and M.G. Generon fabricate reverse osmosis membranes on the Dow property. Since March 2000, Dow has operated the prototype EISB system proposed in their 1999 revised corrective action plan in lieu of the site-wide hydraulic containment remedy proposed in their 1997 corrective action plan. See ECM and Fortis for more documents. An effectiveness evaluation report of the EISB system was submitted in March 2006.

Description:	Caller states there was a release of methylene chloride due to over pressuring of vessel. Caller also stated that the amount released is unknown but expected to be above the 1,000 pound reportable quantity. The release was into the atmosphere and unrecoverable. No waterways were impacted. Other unreportable chemicals associated with the release are being cleaned by on-site personnel.

Description:	Reporting party states that during the startup of a piece of equipment they released a pressure saftey valve and approximately 1000 lbs was released and about 200 lbs of it, evaporated into the atmosphere. The reporting party also notified the NRC and per the NRC: CALLER REPORTED A RELEASE OF PERCHLOROETHYLENE IN A CHEMICAL FACILITY DUE TO A PROCESS UPSET. CALLER STATED 1000 POUNDS OF PERCHLOROETHYLENE WERE RELEASED WITH 200 POUNDS BEING RELEASED TO THE ATMOSPHERE.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D005
Waste Description: Barium

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D010
Waste Description: Selenium

DOW CHEMICAL PITTSBURGH PLT (Continued) **1015757274**

Waste Code: D011
Waste Description: Silver

Waste Code: D018
Waste Description: Benzene

Waste Code: D019
Waste Description: Carbon Tetrachloride

Waste Code: D021
Waste Description: Chlorobenzene

Waste Code: D022
Waste Description: Chloroform

Waste Code: D028
Waste Description: 1,2-Dichloroethane

Waste Code: D032
Waste Description: Hexachlorobenzene

Waste Code: D033
Waste Description: Hexachlorobutadiene

Waste Code: D034
Waste Description: Hexachloroethane

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D038
Waste Description: Pyridine

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichlorethylene

Waste Code: D043
Waste Description: Vinyl Chloride

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2,

DOW CHEMICAL PITTSBURGH PLT (Continued) **1015757274**

Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: P020
Waste Description: Dinoseb (Or) Phenol, 2-(1-Methylpropyl)-4,6-Dinitro-

Waste Code: P087
Waste Description: Osmium Oxide Oso4, (T-4)- (Or) Osmium Tetroxide

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U008
Waste Description: 2-Propenoic Acid (I) (Or) Acrylic Acid (I)

Waste Code: U009
Waste Description: 2-Propenenitrile (Or) Acrylonitrile

Waste Code: U037
Waste Description: Benzene, Chloro- (Or) Chlorobenzene

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U084
Waste Description: 1,3-Dichloropropene (Or) 1-Propene, 1,3-Dichloro-

Waste Code: U112
Waste Description: Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

DOW CHEMICAL PITTSBURGH PLT (Continued) **1015757274**

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U211
Waste Description: Carbon Tetrachloride (Or) Methane, Tetrachloro-

Waste Code: U226
Waste Description: Ethane, 1,1,1-Trichloro- (Or) Methyl Chloroform

Waste Code: U227
Waste Description: 1,1,2-Trichloroethane (Or) Ethane, 1,1,2-Trichloro-

Waste Code: U228
Waste Description: Ethene, Trichloro- (Or) Trichloroethylene

Completed Sub Area Name: SWMUs 8, 6.1 and 35
Completed Document Type: Corrective Measures Study Workplan Addendum
Completed Date: 08/08/2012
Comments: Workplan meets our requirements now. Will be implemented starting September 1, 2012.

Completed Area Name: SWMU 4
Completed Sub Area Name: SWMU 4
Completed Document Type: Technical Report
Completed Date: 07/29/2011
Comments: Report approved with qualification on recommendations to replace approved VOC sample collection method with passive diffusion bottle collection. DTSC believes the RP needs more time to improve use of the method before we can approve replacement.

Comments:	Not reported
Completed Area Name:	SWMU 4
Completed Sub Area Name:	SWMU 4
Completed Document Type:	Interim Measures Implementation Report
Completed Date:	09/13/2011
Comments:	Tank removed, groundwater and soil sampled pumped and removed.
Completed Area Name:	Site L-B
Completed Sub Area Name:	Unit 1 Landfill (CAMU)
Completed Document Type:	Operation and Maintenance Report
Completed Date:	02/08/2012
Comments:	Report is complete and observations are compatible with requirements and specifications.
Completed Area Name:	SWMU 4
Completed Sub Area Name:	SWMU 4
Completed Document Type:	Fieldwork
Completed Date:	02/28/2010
Comments:	Investigation completed, included a MIP investigation, the installation, development and samplinf of 13 additional wells, and the removal of a UGST found during well installation.
Completed Area Name:	SWMU 4
Completed Sub Area Name:	SWMU 4
Completed Document Type:	Corrective Measures Study Report
Completed Date:	10/24/2014
Comments:	Technical Completion Approval. Final Approval pending public review.
Completed Area Name:	SWMU 4
Completed Sub Area Name:	SWMU 4
Completed Document Type:	Remedial Action Completion Report
Completed Date:	08/04/2017
Comments:	SWMU 4 Construction Corrective Measures Completion Report documents the corrective measures construction activities completed to address soil and groundwater impacts identified for SWMU 4 and downgradient areas extending north to the Third Street property boundary. Corrective measures implementation includes targeted excavation, soil vapor extraction, groundwater extraction, treatment and disposal, and zero valent iron (ZVI) injections.
Completed Area Name:	SWMU 4
Completed Sub Area Name:	SWMU 4
Completed Document Type:	Interim Measures Workplan
Completed Date:	01/11/2011
Comments:	Workplan calls for removal of UGST and associated piping. UGST contains petroleum hydrocarbon residues. Addresses all of our issues

US STEEL POSCO INDUSTRIES (Continued) **S100184393**

and the need for immediate removal of source of contamination.

US STEEL POSCO INDUSTRIES (Continued) **S100184393**

Citation:	HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Description:	APSA Program - Administration/Documentation - General
Violation Notes:	Returned to compliance on 10/18/2013.
Violation Division:	Contra Costa County Health Services Department
Violation Program:	APSA
Violation Source:	CERS,
Site ID:	399999
Site Name:	PSC Industrial Outsourcing Pittsburg
Violation Date:	03-05-2019
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 03/18/2019. OBSERVATION: The business failed to complete and electronically submit chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. Currently the 10,000gal Mix Tank is missing from the inventory. Additionally, please rename Provox to a more generic - Sodium Percarbonate name, as facility no longer utilizes this brand. Rename Tallow Product to reflect that input is no longer Tallow (ex: Oil product, or Vegetable Oil Product,etc). Work with UPI to ensure the Iron oxide is captured on this inventory or theirs, as well as the 2 totes of degreaser in the OSU and update the inventory as necessary or let CCHSHMP know if it is on UPI's inventory. CORRECTIVE ACTION: Complete and electronically submit the chemical inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Division:	Contra Costa County Health Services Department
Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	399999
Site Name:	PSC Industrial Outsourcing Pittsburg
Violation Date:	03-05-2019
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes:	Returned to compliance on 03/18/2019. OBSERVATION: The business failed to electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the annual due date. Facility has submitted their annual submittal, however their business phone has been disconnected for several phones due to an interruption of service. This must be updated on your owner/operator identification page. Please update the billing contact email at that time (email is still currently functional, but is now outdated). Site map and Inventory deficiencies are covered in other violations. CORRECTIVE ACTION: Electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA within 30 days. On an ongoing basis, electronically submit and certify the business plan annually on or before the annual due date.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: Returned to compliance on 03/18/2019. OBSERVATION: The business failed to complete and electronically submit a site map with all required content including: north orientation, loading area, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shut offs, evacuation staging area, hazardous materials/waste storage areas and emergency response equipment. Current maps have most information including emergency response equipment, process drains, north orientation, but is missing a specific evacuation staging area, internal roads/adjacent streets, and is missing the hazardous materials storage areas for the warehouse and the Perlite stored outdoors. CORRECTIVE ACTION: Complete and electronically submit a site map with all required content.

Violation Description: Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.
Violation Notes: Returned to compliance on 08/26/2021. OBSERVATION: The facility was provided information from UPI that the liquid processed at the OSU contains petroleum, but the facility has not updated the business activities information in CERS to acknowledge the applicability of the APSA Program. CORRECTIVE ACTION: By August 20, 2021, update and submit the business activities in CERS to indicate the facility owns or operates ASTs with greater than 1,320 gallons of petroleum capacity.

HWP:
EPA ID: CAD009150194
Name: USS-UPI LLC
Address: 900 LOVERIDGE RD
Cleanup Status: OPERATING PERMIT
Latitude: 38.02252
Longitude: -121.8572
Facility Type: Permitted - Operating
Facility Size: Large Postclosure
Supervisor: RYAN BATTY
Site Code: 200204, 500301, 510914, 520024
Senate District: 07, 9
Assembly District: 14
Public Information Officer: Not reported
Commercial Offsite Facility Types: Not reported
Quarterly Update: QUARTERLY UPDATE Quarterly Update Period: July 2022 - October 2022. The facility, now known as USS-UPI, Inc., is currently performing permit maintenance in accordance with their post-closure permit. More so, the permit is undergoing a Class 1 modification for proposed changes to the statistical method in the groundwater monitoring plan. The Class 1 modification has been conditionally approved and the Department is currently awaiting documents to finalize the modification process. POST-CLOSURE PERMIT MAINTENANCE Groundwater sampling and analysis: - Groundwater Elevations: monitored quarterly

USS-POSCO INDUSTRIES (Continued) **S112999667**

in wells M-01DR, M-01F, M-01GR, M-02, M-03, M-04, M-04D, M-04S, M-05, M-06, M-07R, M-08, M-09, M-10, P-01R. - Groundwater Monitoring Parameters: monitored annually in wells M-01DR, M-01F, M-01GR, M-02, M-03, M-04, M-04D, M-04S, M-05 (monitoring includes Total Dissolved Solids (TDS), Total Organic Carbon (TOC), Metals (arsenic, chromium, copper, iron, lead, manganese, nickel, and zinc), and Total Petroleum Hydrocarbons Diesel (TPH-d). - Groundwater Monitoring Constituents of Concern (CoCs): sampled and analyzed every 5 years in wells M-01DR, M-01F, M-01GR, M-02, M-03, M-04, M-04D, M-04S, M-05 (monitoring includes Total Dissolved Solids (TDS), Total Organic Carbon (TOC), Metals (arsenic, chromium, copper, iron, lead, manganese, nickel, and zinc), and Total Petroleum Hydrocarbons Diesel (TPH-d). Landfill inspection: - Monthly visual inspection: Condition of gates, fences, and roads, evidence of erosion, cracking, or seepage. - Additional inspections shall be performed after 25 year 24 hour rainstorms, and after a significant earthquake or other events that may cause damage to the Unit I CAMU. - Annually the Unit I CAMU shall have a comprehensive inspection which is approved by an independent engineer registered in California. - Annual land survey to evaluate the condition of the cover. FACILITY DESCRIPTION/ HISTORY USS Posco is a steel production facility located in Contra Costa County at 900 Loveridge Road Pittsburg, California

Gepaid:	CAD009150194
TSD EPA ID:	CAD008302903
CA Waste Code:	122 - Alkaline solution without metals pH >= 12.5

USS-POSCO INDUSTRIES (Continued) **S112999667**

Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.0125
Year:	2021
Gepaid:	CAD009150194
TSD EPA ID:	CAD008302903
CA Waste Code:	214 - Unspecified solvent mixture
Disposal Method:	H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons:	0.4
Year:	2021
Gepaid:	CAD009150194
TSD EPA ID:	CAD980675276
CA Waste Code:	352 - Other organic solids
Disposal Method:	H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons:	81.98
Year:	2021
Gepaid:	CAD009150194
TSD EPA ID:	CAD059494310
CA Waste Code:	135 - Unspecified aqueous solution
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	20.85071
Year:	2021
Gepaid:	CAD009150194
TSD EPA ID:	CAD008302903
CA Waste Code:	181 - Other inorganic solid waste
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.0335
Year:	2021
Gepaid:	CAD009150194
TSD EPA ID:	UTD991301748
CA Waste Code:	181 - Other inorganic solid waste
Disposal Method:	H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons:	84.02
Year:	2021
Gepaid:	CAD009150194
TSD EPA ID:	CAT080014079
CA Waste Code:	151 - Asbestos containing waste
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.17

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D005
Waste Description: Barium

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D011
Waste Description: Silver

Waste Code: D018
Waste Description: Benzene

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichlorethylene

USS-POSCO INDUSTRIES (Continued) **1000139502**

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: K062
Waste Description: Spent Pickle Liquor From Steel Finishing Operations Of Plants That Produce Iron Or Steel.

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P098
Waste Description: Potassium Cyanide (Or) Potassium Cyanide K(Cn)

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U151
Waste Description: Mercury

USS-POSCO INDUSTRIES (Continued) **1000139502**

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Violation Date: 06-25-2019
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes: Returned to compliance on 06/26/2019. OBSERVATION: The designated operator failed to complete the designated operator inspection reports every 30 days as required. There was only one DO report between date ranges 12/21 and 2/8 as well as 5/21 and 6/25. CORRECTIVE ACTION: Ensure that designated operators performing monthly inspections at this facility are including all of the required information on the reports. Locate missing reports or provide a statement to the CUPA that you will ensure that DO testing is performed within the required time frame.

Violation Description:	Failure to ensure drainage from diked storage areas is restrained by valves, except where facility systems are designed to control such discharge, or failure to ensure manually activated pumps or ejectors are used and the condition of the accumulation is inspected prior to draining dike.
Violation Notes:	Returned to compliance on 02/06/2019. OBSERVATION: There are 3 single wall tanks storing petroleum products in a bermed area outside the garage. The bermed area drains directly to a pit. The pit had liquid in it with a visible sheen. The facility does not check the bermed area prior to the liquid draining to the pit. CORRECTIVE ACTION: By 11/2/2018, the facility must implement controls to restrain the liquid in the bermed area from going to the pit and procedures for staff to inspect the condition of the liquid in the bermed area prior to releasing the liquid. The facility must keep a diked drainage log to document these activities.

Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	Returned to compliance on 09/09/2020. OBSERVATION: Owner/Operator failed to meet one or more of the following spill container requirements: install or maintain spill container which is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill container, and is resistant to galvanic corrosion; did not perform tightness test at installation, every 12 months thereafter, or within 30 days after a repair; did not have tested using manufacturer's guidelines, industry codes, engineering standards, or method approved by PE, or was not tested by a certified UST service technician; or failed to maintain testing records for 36 months. Diesel spill bucket did not pass testing, tester expects that the leak may be at the nipple. Tester was unable to pour 5gallons into Gasoline Spill Bucket, and the bucket did not hold the liquid, liquid decreased above the fill cap. CORRECTIVE ACTION: Install or repair spill buckets to meet all of the [Truncated]

Violation Description:	RCRA Large Quantity Generator - Abandonment/Illegal Disposal/Unauthorized Treatment - General
Violation Notes:	Returned to compliance on 09/18/2020. OBSERVATION: During the July 5, 2018 meeting facility provided adequate documentation to clarify different processes occurring on and around the CRU pad/berm. On July 11, 2018 facility provided a Recyclable Materials Report for ERM #3 Pickle Liquor Solution and claims HSC 25143.2(c)(2) for this waste stream. This code section requires that the facility comply with all hazardous waste generator requirements to maintain its exemption from requiring an authorization (permit) for treatment. This includes documentation showing that no waste is held on site prior to treatment for more than 90 days, as well as Hazardous Waste Tank assessments for all hazardous waste tanks including T43 & T42. Facility identified T43 & T42 as a tank requiring a hazardous waste tank assessment in their November 2, 2018 email. CORRECTIVE ACTION: Provide a description of how facility documents accumulation time for the waste prior to treatment to ensure waste is not on site for more than 90 days [Truncated]

Citation:	22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description:	Failure of generator to obtain assessment or reassessment every five (5) years or the remaining service life of the tank system, as stated in the engineer's assessment, whichever is less. This assessment applies to onground or aboveground tank systems containing only non-RCRA hazardous wastes generated onsite, or for a small quantity generator onground or aboveground tank systems containing RCRA hazardous wastes generated onsite.
Violation Notes:	Returned to compliance on 03/09/2020. OBSERVATION: The Tin Mill Outdoor used oil tank located outside of door 206A does not have a hazardous waste tank assesment conducted by a P.E. Furthermore the top of the tank has a hole, no overfill protection, is subject to rain intrusion and possible overfill. CORRECTIVE ACTION: Conduct a hazardous waste tank assessment on the tank and submit results to CCHSHMP. You may also dispose of the used oil as a hazardous waste and

USS-POSCO INDUSTRIES (Continued) **S100925064**

Violation Notes:	Returned to compliance on 05/13/2017. OBSERVATION: Facility has submitted a Consolidated Emergency Response/Contingency Plan on March 1, 2017. Plan is missing the CUPA phone number and does not identify the nearest hospital or other appropriate emergency medical assistance appropriate for potential accident scenarios. CORRECTIVE ACTION: Update Consolidated Emergency Response/Contingency Plan to include the CUPA number (925-335-3200 and 925-335-3232 for emergencies) and the nearest hospital phone number or other local emergency medical assistance. Submit updated Consolidated Emergency Response/Contingency Plan to the California Environmental Reporting System (CERS) website.

Violation Date:	09-13-2018
Citation:	22 CCR 15 66265.192(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(a)
Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service. The written assessment shall state that, the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed to meet the regulation.
Violation Notes:	Returned to compliance on 09/08/2020. OBSERVATION: During the July 5, 2018 meeting facility provided adequate documentation to clarify different processes occurring on and around the CRU pad/berm. On July 27, 2018 facility provided a Recyclable Materials Report for ERM #5 Chem Treat Rinse Water and claims HSC 25143.2(c)(2) for this waste stream. This code section requires that the facility comply with all hazardous waste generator requirements to maintain its exemption from requiring an authorization (permit) for treatment. This includes Hazardous Waste Tank assessments for all hazardous wastes including T10, T3, T19, T20 & T50 if liquid is ever stored in this tank. Facility identified T50 as a tank requiring a hazardous waste tank assessment in their November 2, 2018 email. CORRECTIVE ACTION: Provide CCCHSHMP hazardous waste tank assessments for these tanks.

Violation Description: Failure to adequately discuss in the SPCC Plan facility drainage or drainage controls such as secondary containment around containers and other structures, equipment, and procedures for the control of a discharge.
Violation Notes: Returned to compliance on 02/06/2019. OBSERVATION: The current SPCC Plan does not include a discussion of the 3 single walled tanks storing petroleum or pit in the garage area or how drainage controls are implemented. Based on the use of the bermed area, the pit is the secondary containment. The drainage from the bermed area to the pit has been occurring for longer than 6 months. CORRECTIVE ACTION: By 11/2/2018, update the SPCC Plan to provide a discussion of how the drainage controls provide adequate secondary containment, procedures for checking the bermed area, procedures for the control of discharge, and maintaining diked drainage logs.

Violation Description:	Business Plan Program - Administration/Documentation - General
Violation Notes:	Returned to compliance on 05/13/2017. OBSERVATION: BP02 was cited during the Oct. 14, 2015 inspection for hazardous materials inventory that was missing or incorrectly reported for the largest container, maximum daily amount, as well as hazardous materials inventory that no longer existed on site due to changes in operations. On Nov.13, 2015 the facility made changes to the hazardous materials inventory. These changes were acknowledged in the Dec. 16, 2015 follow up inspection as well as the Dec. 24, 2015 rejection of the Nov. 13, 2015 CERS submittal. The hazardous materials inventory was rejected due to lack of updating the oil bearing portion of the hazardous materials inventory which the facility was waiting on an updated SPCC Plan for inventory as well as not accounting for other items such as requested process tanks, and issues with the compressed gas related inventory. The violation was elevated to a Class II and the due date was extended to Feb. 16, 2016 to wait for the SPCC Plan updates. The facility [Truncated]

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to ensure that containment systems of diked areas in all bulk storage tank installations are either: 1. Sufficiently impervious to contain discharged oil until cleaned up. OR 2. Any discharge to a drainage trench system will be safely confined in a facility catchment basin or holding pond until cleaned up.
Violation Notes: Returned to compliance on 02/06/2019. OBSERVATION: The pit associated with the 3 singled walled tanks in the garage area was storing a liquid with a visible sheen. There were no procedures available at the time of the inspection regarding storage or disposal of the liquid in the pit. Although a precise depth was not obtained, it is believed that the pit was about half full with liquid at the time of the inspection. Although there is no overhead coverage for the pit to prevent rain water from entering the pit, based on the timing of the inspection (lack of rain fall for an extended period of time), the liquid in the pit is most likely from operations associated with garage activities. Based on observations, the pit is storing a liquid with petroleum and is therefore bulk storage containment, but is not

USS-POSCO INDUSTRIES (Continued) **S100925064**

meeting the 40 CFR Part 112 requirements of a bulk storage containment. It does not appear feasible for the pit to meet secondary containment requirements for bulk storage. These activities have been occurring [Truncated]

Citation: 22 CCR 15 66265.192(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(a)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service. The written assessment shall state that, the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed to meet the regulation.
Violation Notes: Returned to compliance on 06/29/2020. OBSERVATION: During the July 5, 2018 meeting facility provided adequate documentation to clarify different processes occurring on and around the CRU pad/berm. On July 11, 2018 facility provided a Recyclable Materials Report for ERM #1 Caustic Cleaning Solution and claims HSC 25143.2(c)(2) for this waste stream. This code section requires that the facility comply with all hazardous waste generator requirements to maintain its exemption from requiring an authorization (permit) for treatment. This includes Hazardous Waste Tank assessments for all hazardous waste tanks including T40, T41, T16. Facility stated in a July 27, 2018 email that these tanks were expected to have hazardous waste tank assessments completed by August 10, 2018, but these assessments have not been submitted to CCHSHMP. CORRECTIVE ACTION: Provide hazardous waste tank assessments.

Citation:	HSC 6.7 25290.2(c) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.2(c)
Violation Description:	Failure to maintain secondary containment (e.g., failure of secondary containment testing).
Violation Notes:	Returned to compliance on 07/16/2020. OBSERVATION: Liquid in a dry annular was found in the diesel annular indicating a possible leak in the secondary containment. Technician believes the liquid is water, water was found in the annular last year and passed SB989 testing. Diesel had an annular alarm 1/19/20, it was investigated by the new Designated Operator on 2/28/20 who found the annular to be dry and the sensor to be okay. Secondary containment shall be impervious to the liquid and vapor of the substance contained and constructed to prevent structural weakening as a result of contact with any hazardous substances released from the primary containment. CORRECTIVE ACTION: Investigate source of water/liquid, ex: remove water from annular, test annular for secondary containment testing, and then check for water again to ensure groundwater is not leaking into the annular. Send results of investigation. If necessary, contact a properly licensed, trained, and certified contractor to make repairs to the UST system [Truncated]

Violation Description:	RCRA Large Quantity Generator - Abandonment/Illegal Disposal/Unauthorized Treatment - General
Violation Notes:	Returned to compliance on 11/08/2020. OBSERVATION: ETL#1 Pickle Rinse was sampled by the facility on May 29, 2018. The sample was found to have a pH <2 making it a hazardous waste. Facility has submitted documentation to CCHSHMP during the May 2017 inspection (Collection System TWTP.ppt) indicating the ETL#1 Pickle Rinse goes to the TWTP, which is illegal treatment and disposal of a hazardous waste. CORRECTIVE ACTION: Facility is not currently running the ETL#1 and does not have plans to re-use it. This clears this violation. If Facility decides they want to start using ETL#1 in the future, this waste stream will need to be diverted from the TWTP and managed as a hazardous waste.

Site History:	Roll Technology West (RTW) is a chrome plating steel mill shop. RTW began chrome plating operations in 1994. From 2009 to 2014, RTW used approximately 140 gallons of Fumetrol 140 (AF140), which contains perfluorooctane sulfonate (PFOS), as a fume suppressant to reduce hexavalent chromium air emissions. In 2009, RTW switched from AF140 to Atotech's Fumetrol 21 LF2 (AF21), which contains 6:2 fluorotelomer sulfonate (6:2 FTS). RTW has implemented a closed-loop chrome plating system with no waste discharge stream. There are no records of spills or groundwater contamination to date. To investigate the potential presence of PFAS, samples will be collected from the secondary containment area to investigate possible undocumented tank spills/overflows, from stormwater runoff from the roof to investigate deposition from the air scrubber vent, and from the unpaved soil area on the lot to investigate aerial deposition of PFAS on the ground.

Feature Description:	The 42.98-acre site was acquired in 1942 for construction of the Columbia Steel Foundry. The foundry cast armored stern sections for use in the wartime shipbuilding industry. The plant was declared surplus in 1946 and transferred to the General Services Administration (GSA). In 1949 the name was changed to the Pacific Ordnance Steel Foundry and transferred to the Department of the Army for retention in the Departmental Industrial Reserve. In 1953, the plant was completely refurbished and equipped for the manufacture of 14-ton tank hull casings together with turret. The property was sold on 14 August 1963 to QUAMCO, Inc., an Ohio corporation. There were no restrictions or reservations in the deed. A 1.679-acre parcel was excluded from this transaction, to remain under the jurisdiction of the Department of the Navy for use as an X-ray, radiography facility. On 3 September 1963, the property, consisting of 41.3 acres of land, was transferred from Ludlow Valve Manufacturing Company, Inc., a New York based corporation, to United States Steel Corporation who is the present owner. Subsequent to that transfer, the facility was used for the manufacture of steel products including steel pipe. Steel manufacturing operations have ceased and the facility is now an industrial park with building and yard space leased out to a variety of businesses.

City,State,Zip:	PITTSBURG, CA 94565
Region:	STATE
Facility Status:	**Open - Long Term Management**
Status Date:	06/13/2022
Global Id:	SL1823A658
Lead Agency:	SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number:	Not reported
Latitude:	38.017341
Longitude:	-121.854872
Case Type:	Cleanup Program Site
Case Worker:	AJK
Local Agency:	Not reported
RB Case Number:	2119.1132
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Other Acid or Corrosive, Other Metal
EPA Region:	9
Coordinate Source:	Google Geocode
Cuf Case:	NO
Quantity Released Gallons:	Not reported
Begin Date:	01/01/1987
Leak Reported Date:	01/02/1965
How Discovered:	* RBD
How Discovered Description:	Not reported
Discharge Source:	Not reported
Discharge Cause:	Not reported
Stop Method:	Not reported
Stop Description:	Not reported
No Further Action Date:	Not reported
CA Water Watershed Name:	Suisun - Concord - Pittsburg - In Delta (207.34)
Dwr Groundwater Subbasin Name:	Pittsburg Plain (2-004)
Disadvantaged Community:	Not reported
CA Enviroscreen 3 Score:	81-85%
CA Enviroscreen 4 Score:	90-95%
Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	The site was previously used for ferric chloride production and had two ponds associated with the production, Ponds B and C; these ponds were closed in 2005. Annual groundwater monitoring currently takes place at the site.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
STATE MASTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/26/2023
Date Data Arrived at EDR: 05/02/2023
Date Made Active in Reports: 05/17/2023
Number of Days to Update: 15

Source: EPA
Telephone: N/A
Last EDR Contact: 07/06/2023
Next Scheduled EDR Contact: 10/09/2023
Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/26/2023
Date Data Arrived at EDR: 05/02/2023
Date Made Active in Reports: 05/17/2023

Next Scheduled EDR Contact: 10/09/2023
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/26/2023

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing
Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

HCYCLE PITTSBURG
NOT REPORTED
ANTIOCH, CA 94509

TARGET PROPERTY COORDINATES

Latitude (North):	38.021424 - 38° 1' 17.13''
Longitude (West):	121.844285 - 121° 50' 39.43''
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	601443.4
UTM Y (Meters):	4208616.5
Elevation:	14 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12021565 ANTIOCH NORTH, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

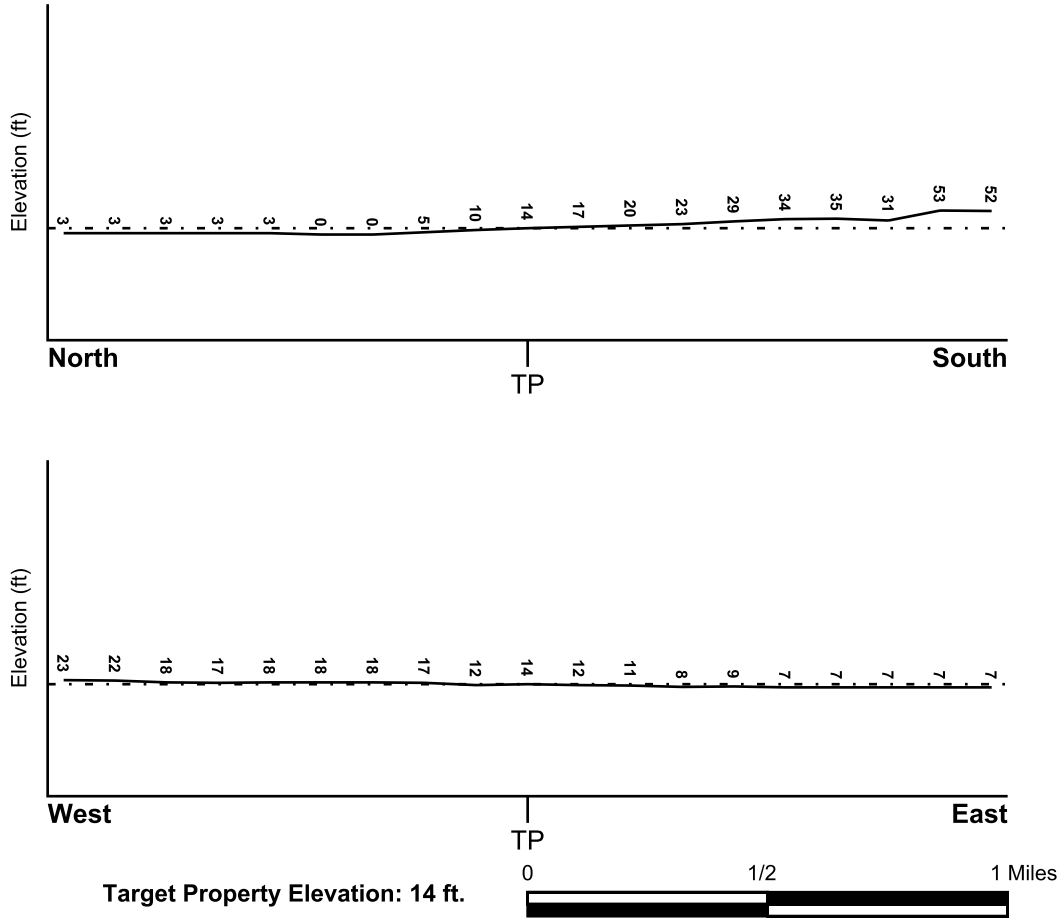
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06013C0138G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06013C0136G	FEMA FIRM Flood data

06013C0139G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
ANTIOCH NORTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: CLEAR LAKE

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	29 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4
2	29 inches	59 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4

Soil Map ID: 2

Soil Component Name: RINCON

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
2	11 inches	29 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
3	29 inches	59 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9

Soil Map ID: 3

Soil Component Name: JOICE

Soil Surface Texture: muck

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Very poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 61 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches	muck	A-8	Highly organic soils, Peat.	Max: 141 Min: 42	Max: Min:
2	14 inches	59 inches	muck	A-8	Highly organic soils, Peat.	Max: 141 Min: 42	Max: Min:

Soil Map ID: 4

Soil Component Name: Water

Soil Surface Texture: muck

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 5

Soil Component Name: RINCON

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Appendix B:
User Questionnaire

PHASE I ENVIRONMENTAL SITE ASSESSMENT
USER QUESTIONNAIRE

Pursuant to the American Society for Testing and Materials E 1527-21 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E 1527-21), in order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the User must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The User should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

The "User" is defined in the ASTM E 1527-21 standard as *the party seeking to use Practice E 1527 to complete an environmental site assessment of the Site. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager*.

Thank you for taking the time to complete this questionnaire. If you have any questions, please contact Doug Kilmer at 616.258.0058 or dkilmer@trccompanies.com

Date: August 2, 2023

User Name: Megan Good

Company: HC (Contra Costa), LLC

Address: 1320 Willow Pass Road, Suite 600

Concord, CA 94520

Telephone No.: 760-583-9211

E-mail Address: megan.good@hcycle.com

Signature:

Site Name: Corteva Agriscience

Address: 901 Loveridge Road

Pittsburg, CA 94565

Purpose of ASTM Phase I (potential purchase, potential sale, re-finance, update the environmental condition of the Site, Lease termination or initiation, etc.)

Completion of environmental impact report and analyses for the identified 24-acre Study Area.

(1) Environmental cleanup liens that are filed or recorded against the Site (40 CFR 312.25)

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the Site under federal, tribal, state or local law?

Yes	No
☐	☑

NOTE 1 – In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

(2) Activity and land use limitations (AULs) that are in place on the Site or that have been filed or recorded against the Site (40 CFR 312.26(a)(1)(v) and (vi))

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the Site and/or have been filed or recorded against the Site under federal, tribal, state or local law?

Yes ☐ No ☑

(3) Specialized knowledge or experience of the person seeking to qualify for the *Landowner Liability Protection* (LLP) (40 CFR 312.28)

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes ☐ No ☑

(4) Relationship of the purchase price to the fair market value of the Site property (40 CFR 312.29)

Does the purchase price being paid for the Site property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Yes ☑ No ☐

(5) *Commonly known* or *reasonably ascertainable* information regarding the Site property (40 CFR 312.30)

Are you aware of commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

(a) Can you provide any information regarding the past uses of the Site?
(b) Can you provide any information regarding specific chemicals that are present or once were present at the Site?
(c) Can you provide any information regarding spills or other chemical releases that have occurred at the Site?
(d) Can you provide any information regarding any environmental cleanups that have occurred at the Site?

Yes ☑ No ☐

See attached documents/links.

(6) The degree of obviousness of the presence or likely presence of contamination at the Site, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

	Yes	No
Based on your knowledge and experience related to the Site are there any obvious indicators that point to the presence or likely presence of releases at the Site?	☐	☑

(7) Proceedings Involving the Site

	Yes	No
Are you aware of: (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Site; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the Site; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products at the Site?	☐	☑

(8) Questions Regarding Helpful Documents

Are you aware of the presence of any of the documents listed below and, if so, whether copies can and will be provided to TRC within reasonable time and cost constraints?

	Yes	No
– Environment site assessment reports	☐	☑
– Environment compliance audit reports	☐	☑
– Environmental permits (e.g., solid waste disposal permits; hazardous waste disposal permits; wastewater permits; National Pollutant Discharge Elimination System [NPDES] permits; or underground injection permits)	☑	☐
– Registrations for underground and aboveground storage tanks	☐	☑
– Registrations for underground injection systems	☐	☑
– Material Safety Data Sheets (MSDSs)	☐	☑
– Community Right-To-Know plan(s)	☐	☑
– Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc.,	☐	☑
– Reports regarding hydrogeologic conditions at the Site and surrounding area	☐	☑
– Notices or other correspondence from any government agency regarding current or previous violations of environmental laws with respect to the Site or relating to environmental liens encumbering the Site property	☐	☑
– Hazardous waste generator notices or reports	☐	☑
– Geotechnical studies	☐	☑
– Risk assessments	☐	☑
– Recorded AULs	☐	☑

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

UNITED STATES STEEL CORPORATION, a Delaware corporation, Grantor, hereby grants unto THE DOW CHEMICAL COMPANY, a Delaware corporation, Grantee, all that certain real property in the County of Contra Costa, State of California, described as follows:

TRANSFER TAX PAID ON GRANT DEED SERIES NO. 96833

PARCEL D:

A portion of the Rancho Los Medanos, described as follows:

Beginning on the east line of that parcel of land described as Parcel 1 in the deed from the Anglo California National Bank of San Francisco to the Dow Chemical Company recorded May 23, 1950 in Book 1562 of official records of Contra Costa County, page 586, at a point which bears North 0° 59' 14" east 407.92 feet from the southeast corner of said Dow parcel (1562 or 586); thence from said point of beginning, along said east line, north 0° 59' 14" east 605.55 feet; thence leaving said east line, south 89° 00' 46" east 200.00 feet; thence north 21° 25' 34" east 1344.05 feet to the northern boundary line of the Rancho Los Medanos; thence along said northern line, south 78° 17' 46" east 233.23 feet; south 53° 27' 46" east 158.76 feet; south 4° 51' 46" east 173.68 feet, and south 39° 12' 46" east 166.20 feet; thence leaving said northern boundary of the Rancho Los Medanos, south 39° 51' 58" west 1836.41 feet to the point of beginning.

The foregoing conveyance is made subject to the following:

1. The lien of taxes for the fiscal year 1977-78;

2. Any and all rights, rights of way, easements and encu nces existing on the property, whether or not of record.

IN WITNESS WHEREOF, Grantor has caused this instrument to be executed in its behalf by its officers thereunto first duly authorized, and its corporate seal to be hereto affixed as of the 1st day of July, 1977.

LAND USE COVENANT AND AGREEMENT

ENVIRONMENTAL RESTRICTIONS

County of Contra Costa, Assessor Parcel Number: 073-220-049
Corteva Pittsburg Monofill
DTSC Site Code: 200164

This Land Use Covenant and Agreement ("Covenant") is made by and between Centen Ag LLC (the "Covenantor"), the current owner of property located at 901 Loveridge Road, City of Pittsburg, in the County of Contra Costa, State of California (the "Property"), and the Department of Toxic Substances Control (the "Department"). Pursuant to Civil Code section 1471, the Department has determined that this Covenant is reasonably necessary to protect present or future human health or safety or the environment as a result of the presence on a portion of the land on the Property of hazardous materials as defined in Health and Safety Code section 25260 ("Affected Portion"). The Covenantor and the Department hereby agree that, pursuant to Civil Code section 1471 and Health and Safety Code section 25202.5, the use of the Property be restricted as set forth in this Covenant and that the Covenant shall conform with the requirements of California Code of Regulations, title 22, section 67391.1.

ARTICLE I

STATEMENT OF FACTS

1.1. Property Location. The Property that is subject to this Covenant, totaling approximately 246.20 acres, is more particularly described in the attached Exhibit A, "Legal Description", and depicted in Exhibit B, "Assessor's Map". The Property is located in the area now generally bounded by New York Slough on the north, the BNSF Railway line on the south, Loveridge Road and Pittsburg Waterfront on the west, and wetlands on the east. The Property is also identified as County of Contra Costa, Assessor Parcel Number 073-220-049.

The Restrictions and Requirements outlined in Article IV of this Covenant apply only to the Affected Portion of the Property, totaling approximately 8.99 acres, that is more particularly described and depicted in Exhibit C "Record of Survey" and is referred to as the site of the former Solar Evaporation Ponds.

1.2. Remediation of Property. The Affected Portion of the Property has been investigated and/or remediated under the Department's oversight. The Department approved a Closure Plan in accordance with Health and Safety Code, division 20, chapter 6.5. The closure activities conducted at the Property included solidification and consolidation of waste at the location of former Solar Evaporation Ponds A, B, C, and D, and construction of an encapsulation structure. Hazardous substances and hazardous wastes, including solidified Solar Evaporation Pond waste containing heavy metals, halogenated and non-halogenated volatile organic compounds, semi-volatile organic compounds, and exhibiting flammability and corrosivity characteristics, remain within the Affected Portion of the Property above levels acceptable for unrestricted land use.

1.3. Basis for Environmental Restrictions. As a result of the presence of hazardous wastes, which are also hazardous materials as defined in Health and Safety Code section 25260, at the Property, the Department has concluded that it is reasonably necessary to restrict the use of the Affected Portion of the Property in order to protect present or future human health or safety or the environment, and that this Covenant is required as part of the Department-approved remedy for the Property. The Department has also concluded that the Property, as remediated and when used in compliance with the Environmental Restrictions of this Covenant, does not present an

unacceptable risk to present and future human health or safety or the environment.

ARTICLE II
DEFINITIONS

2.1. Department. "Department" means the California Department of Toxic Substances Control and includes its successor agencies, if any.

2.2. Environmental Restrictions. "Environmental Restrictions" means all protective provisions, covenants, restrictions, requirements, prohibitions, and terms and conditions as set forth in this Covenant.

2.3. Improvements. "Improvements" includes, but is not limited to buildings, structures, roads, driveways, improved parking areas, wells, pipelines, or other utilities.

2.4. Lease. "Lease" means lease, rental agreement, or any other document that creates a right to use or occupy any portion of the Property.

2.5. Occupant. "Occupant" or "Occupants" means Owner and any person or entity entitled by ownership, leasehold, or other legal relationship to the right to occupy any portion of the Property.

2.6. Owner. "Owner" or "Owners" means the Covenantor, and any successor in interest including any heir and assignee, who at any time holds title to all or any portion of the Property.

ARTICLE III
GENERAL PROVISIONS

3.1. Runs with the Land. This Covenant sets forth Environmental Restrictions that apply to and encumber the Property and every portion thereof no matter how it is improved, held, used, occupied, leased, sold, hypothecated, encumbered, or conveyed. This Covenant: (a) runs with the land pursuant to Civil Code section 1471 and Health and Safety Code section 25202.5; (b) inures to the benefit of and passes with each and every portion of the Property; (c) is for the benefit of and is enforceable by the Department; (d) is imposed upon the entire Property; and (e) contains Environmental Restrictions applicable only to the Affected Portion thereof.

3.2. Binding upon Owners/Occupants. This Covenant: (a) binds all Owners of the Property, their heirs, successors, and assignees; and (b) the agents, employees, and lessees of the Owners and the Owners' heirs, successors, and assignees. Pursuant

to Civil Code section 1471, all successive Owners of the Property are expressly bound hereby for the benefit of the Department; this Covenant, however, is binding on all Owners and Occupants, and their respective successors and assignees, only during their respective periods of ownership or occupancy except that such Owners or Occupants shall continue to be liable for any violations of, or non-compliance with, the Environmental Restrictions of this Covenant or any acts or omissions during their ownership or occupancy.

3.3. Incorporation into Deeds and Leases. This Covenant shall be incorporated by reference in each and every deed and Lease for any portion of the Property.

3.4. Conveyance of Property. The Owner and new Owner shall provide Notice to the Department not later than 30 calendar days after any conveyance or receipt of any ownership interest in the Property (excluding Leases, and mortgages, liens, and other non-possessory encumbrances). The Notice shall include the name and mailing address of the new Owner of the Property and shall reference the site name and site code as listed on page one of this Covenant. The notice shall also include the Assessor's Parcel Number(s) noted on page one. If the new Owner's property has been assigned a different Assessor Parcel Number, each such Assessor Parcel Number that covers the Property must be provided. The Department shall not, by reason of this Covenant, have authority to approve, disapprove, or otherwise affect proposed conveyance, except as otherwise provided by law or by administrative order.

3.5. Costs of Administering the Covenant to Be Paid by Owner. The Department has already incurred and will in the future incur costs associated with this Covenant. Therefore, the Covenantor hereby covenants for the Covenantor and for all subsequent Owners that, pursuant to California Code of Regulations, title 22, section 67391.1(h), the Owner agrees to pay the Department's costs in administering, implementing and enforcing this Covenant.

ARTICLE IV
RESTRICTIONS AND REQUIREMENTS

4.1. Prohibited Uses. The Property shall not be used for any of the following purposes without prior written approval by the Department:

(a) A residence, including any mobile home or factory built housing, constructed or installed for use as residential human habitation.

(b) A hospital for humans.

(c) A public or private school for persons under 18 years of age.

(d) A day care center for children.

4.2. Soil Management. Soil management activities at the Affected Portion of the Property are subject to the following requirements in addition to any other applicable Environmental Restrictions:

(a) No activities that will disturb the soil at or below grade level (e.g., excavation, grading, removal, trenching, filling, earth movement, mining, or drilling) shall be allowed at the Property without a Soil Management Plan pre-approved by the Department in writing.

(b) Any soil brought to the surface by grading, excavation, trenching or backfilling shall be managed in accordance with all applicable provisions of state and federal law.

4.3. Prohibited Activities. The following activities shall not be conducted at or within the Affected Portion of the Property:

(a) Drilling for any water, oil, or gas without prior written approval by the Department.

(b) Extraction or removal of groundwater without a Groundwater Management Plan pre-approved by the Department in writing.

(c) Activity that may alter, interfere with, or otherwise affect the integrity or effectiveness of, or the access to, any investigative, remedial, monitoring, operation or maintenance system or activity required for the Property without prior written approval of the Department.

The Prohibited Activities described in paragraph 4.3 of this Covenant do not apply to activities that are expressly authorized in a Hazardous Waste Facility Post Closure Permit issued by the Department.

4.4. Access for Department. The Department shall have reasonable right of entry and access to the Property for inspection, investigation, remediation, monitoring, and other activities as deemed necessary by the Department in order to protect human

health or safety or the environment.

4.5. Access for Implementing Operation and Maintenance. The entity or person responsible for implementing the operation and maintenance activities, if any, shall have reasonable right of entry and access to the Affected Portion of the Property for the purpose of implementing such operation and maintenance activities until the Department determines that no further operation and maintenance activity is required.

4.6. Inspection and Reporting Requirements. The Owner shall conduct an annual inspection of the Property verifying compliance with this Covenant and shall submit an annual inspection report to the Department for its approval by January 31st of each year. The annual inspection report must include the dates, times, and names of those who conducted the inspection and reviewed the annual inspection report. It also shall describe how the observations that were the basis for the statements and conclusions in the annual inspection report were performed (e.g., drive by, fly over, walk in, etc.). If any violation is noted, the annual inspection report must detail the steps taken to correct the violation and return to compliance. If the Owner identifies any violations of this Covenant during the annual inspection or at any other time, the Owner must within 10 calendar days of identifying the violation: (a) determine the identity of the party in violation; (b) send a letter advising the party of the violation of the Covenant; and (c) demand that the violation cease immediately. Additionally, a copy of any correspondence related to the violation of this Covenant shall be sent to the Department within 10 calendar days of its original transmission.

ARTICLE V
ENFORCEMENT

5.1. Enforcement. Failure of the Owner or Occupant to comply with this Covenant shall be grounds for the Department to require modification or removal of any Improvements constructed or placed upon any portion of the Property in violation of this Covenant. Violation of this Covenant, such as failure to submit (including submission of any false statement) record or report to the Department, shall be grounds for the Department to pursue administrative, civil, or criminal actions, as provided by law.

ARTICLE VI
VARIANCE, REMOVAL, AND TERM

6.1. Variance from Environmental Restrictions. Any person may apply to the Department for a written variance from any of the Environmental Restrictions imposed by this Covenant. Such application shall be made in accordance with Health and Safety Code section 25223.

6.2. Removal of Environmental Restrictions. Any person may apply to the Department to remove any of the Environmental Restrictions imposed by this Covenant or terminate the Covenant in its entirety. Such application shall be made in accordance with Health and Safety Code section 25224.

6.3. Term. Unless ended in accordance with paragraph 6.2, by law, or by the Department in the exercise of its discretion, this Covenant shall continue in effect in perpetuity.

ARTICLE VII
MISCELLANEOUS

7.1. No Dedication Intended. Nothing set forth in this Covenant shall be construed to be a gift or dedication, or offer of a gift or dedication, of the Property, or any portion thereof, to the general public or anyone else for any purpose whatsoever.

7.2. Recordation. The Covenantor shall record this Covenant, with all referenced Exhibits, in the County of Contra Costa within 10 calendar days of the Covenantor's receipt of a fully executed original.

7.3. Notices. Whenever any person gives or serves any Notice ("Notice" as used herein includes any demand or other communication with respect to this Covenant), each such Notice shall be in writing and shall be deemed effective: (a) when delivered, if personally delivered to the person being served or to an officer of a corporate party being served; or (b) five calendar days after deposit in the mail, if mailed by United States mail, postage paid, certified, return receipt requested:

And

To Department: Department of Toxic Substances Control
8800 Cal Center Drive
Sacramento, California 95826
Attention:
Unit Chief
Permitting Division

Any party may change its address or the individual to whose attention a Notice is to be sent by giving advance written Notice in compliance with this paragraph.

7.4. Partial Invalidity. If this Covenant or any of its terms are determined by a court of competent jurisdiction to be invalid for any reason, the surviving portions of this Covenant shall remain in full force and effect as if such portion found invalid had not been included herein.

7.5. Statutory References. All statutory or regulatory references include successor provisions.

7.6. Incorporation of Exhibits. All exhibits and attachments to this Covenant are incorporated herein by reference.

IN WITNESS WHEREOF, the Covenantor and the Department hereby execute this Covenant.

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

DRAFT

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SAN FRANCISCO BAY REGION

ORDER No. R2-2002-0007
UPDATED WASTE DISCHARGE REQUIREMENTS AND RESCISSION OF ORDER NOS. 97-123 AND 98-059 FOR:

THE DOW CHEMICAL COMPANY
PITTSBURG FACILITY
CONTRA COSTA COUNTY

The California Regional Water Quality Control Board, San Francisco Bay Region (hereinafter the Regional Board), finds that:

SITE DESCRIPTION & LOCATION

1. The Dow Chemical Company (Dow or Discharger) owns and operates a chemical manufacturing facility at 901 Loveridge Road in Pittsburg, California (Figure 1). The site is bounded by the New York Slough on the north, the Pittsburg-Antioch Highway on the south, Loveridge Road on the west, and parklands and commercial areas on the east. Residential areas exist further to the south beyond the Pittsburg-Antioch Highway. The site occupies approximately 993 acres of which approximately 235 acres are a wetland preserve located on the eastern side of the facility. In addition to active chemical manufacturing facilities, the site contains an active Class II (designated) solid waste landfill and a number of closed solid waste disposal units.

2. Dow currently manufactures latex, agricultural chemicals, fumigants, fungicides, and hydrochloric acid at their Pittsburg facility. Historically, Dow used the site to manufacture chlorine, sodium hydroxide, hydrogen, and chlorinated solvents, including carbon tetrachloride and tetrachloroethene. In addition to chemical manufacturing activities, Dow conducts chemical development research at its Pittsburg facility. The Calpine Corporation operates a power plant on site, producing electricity and steam. The Cynera Company and M.G. Generon fabricate reverse osmosis membranes on the Dow property.

PURPOSE OF ORDER

3. The purpose of this Order is to update waste discharge requirements (WDRs) regarding the operation, closure, post-closure maintenance, and monitoring of Solid Waste Management Units (SWMUs). Specifically, this Order updates the status and requirements for twenty-five SWMUs at the Dow Pittsburg facility and rescinds WDR Order Nos. 97-123 and 98-059. On-going and future corrective measures at the Dow Pittsburg facility are or will be regulated by site cleanup requirements (SCRs) issued pursuant to the California Water Code, Section 13304.

REGULATORY STATUS

4. In June 1987, the Regional Board adopted WDR Order No. 87-064 requiring Dow to characterize all solid waste management units (SWMUs) of concern for water quality impacts and evaluate alternatives for remediation, if necessary.

5. In 1989 the U.S. Environmental Protection Agency (USEPA) issued a 3008(h) Administrative Order for the Dow facility pursuant to the Resource Conservation and Recovery Act (RCRA). The RCRA Order required Dow to 1) determine the nature and extent of any releases of hazardous wastes/constituents at their facility, and 2) evaluate corrective action alternatives necessary to mitigate the migration of hazardous wastes/constituents at their facility.

6. In August 1996, the California Department of Toxics Substance Control (DTSC) issued a Hazardous Waste Facility Permit (EPA ID Number: CAD 076 528 678) for the Dow facility, which contained a Corrective Action Schedule of Compliance. In response to DTSC's permit, the USEPA issued written notice in August 1997 that it had terminated their 3008(h) Administrative Order and that the requirements of that Order had been incorporated into DTSC's permit. At that same time, the Regional Board assumed the role of lead agency for corrective action at the Dow facility pursuant to Section 25204.6 of the California Health and Safety Code (CHSC). Section 25204.6 of the CHSC allows the Regional Board to implement and enforce the corrective action requirements of Article 6, Chapter 14, Division 4.5, Title 22 of the California Code of Regulations (22CCR).

7. In 1997, the Regional Board adopted WDR Order No. 97-123 requiring Dow to extract groundwater impacted with volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs) in order to capture contaminant mass and mitigate impacts in specific areas. Order No. 97-123 established interim minimum groundwater extraction rates in order to take advantage of Dow's existing groundwater treatment capacity until a final remedy could be implemented. Order No. 97-123 also established injection standards for the treated groundwater should Dow select injection as the preferred disposal method. Interim extraction requirements were established in anticipation of a larger, site-wide corrective action remedy based on hydraulic containment of VOCs in groundwater.

8. In 1998, the Regional Board adopted WDR Order No. 98-059 thereby establishing requirements for implementation of corrective action remedies for the SWMUs and for VOC contaminants in groundwater. WDR Order No. 98-059 also rescinded Order No. 87-064. WDR Order No. 98-059 accepted Dow's 1997 proposal for site-wide corrective action of VOC-impacted groundwater using hydraulic containment. However, prior to implementation, Dow determined that hydraulic containment would not be economically feasible due primarily to site hydrogeology. As a result, Dow investigated the use of engineered in-situ bioremediation as the site-wide corrective action remedy and submitted a revised corrective action plan in 1999. Currently the Regional Board is the lead agency overseeing corrective action at the Dow Pittsburg facility.

9. Dow's surface water discharges are regulated by NPDES permit CA0004910 (WDR Order No. 01-142) issued by the Regional Board.

HYDROGEOLOGIC CHARACTERIZATION AND GROUNDWATER CONDITIONS

10. The Dow Pittsburg facility is located in the Pittsburg Plain Groundwater Basin that is bounded by the hills south of the facility, the western portion of the Sacramento-San Joaquin River delta in the north, Bay Point in the west, and the City of Antioch in the east. The basin is filled with unconsolidated fluvial and alluvial sediments deposited in the Sacramento-San Joaquin River delta and in alluvial fans formed by streams draining the hills south of the facility. Groundwater at the Dow facility is first encountered at depths beginning from approximately 2 to 13 feet below ground surface (bgs).

11. Lithology of the shallow subsurface beneath the site consists of a low-permeability silty clay in the upper 40 feet (designated as the water-table interval) with a saturated sand unit extending from approximately 40 to 135 feet bgs. A layer of low permeability material consisting mostly of clay is also present between approximately 85 to 110 feet bgs in the northern portion of the site. This lower clay layer extends southward from the northern boundary of the facility (New York Slough) and pinches out approximately 200 feet south of 2nd Street. Where present, the lower clay layer divides the saturated sand unit into two intervals designated as the mid-depth interval (40-85 feet bgs) and the deep interval (110-135 feet bgs). As the lower clay layer thickens along the northern boundary of the facility (toward the Slough), the mid-depth interval of the saturated sand unit generally becomes thinner/finer grained and apparently pinches out in various locations near the Slough bank. Regionally, a clay layer exists below the deep interval of the saturated sand unit from approximately 130 to as much as 800 feet bgs. Table 1 summarizes the water-bearing intervals at the Dow site.

Table 1. Depths of Occurrence of Groundwater Transmissive Zones at the Dow Pittsburg Facility

Transmissive Zone	Typical Depths (fbgs)
Water Table Interval	5 to 40
Mid-Depth Interval	40 to 85
Deep Interval	110 to 135

12. VOCs and SVOCs have been detected at elevated concentrations in groundwater at various locations beneath the Dow facility in the interior of the site and near the perimeter adjacent to New York Slough and Bundesen Bay (Figure 2). Table 2 summarizes the principal organic contaminants identified in groundwater beneath the site.

Table 2. Principal Organic Contaminants Detected in Groundwater Beneath the Dow Pittsburg Facility

Principal VOCS and SVOCS	
• tetrachloroethene (PCE)	• methylene chloride (MeCl)
• trichloroethene (TCE)	• chloromethane (CM)
• 1,2-dichlorethene (1,2-DCE)	• 1,2-dichloropropane (1,2-DCP)
• 1,1-dichloroethene (1,1-DCE)	• hexachlorobenzene (HCB)
• 1,2-dichloroethane (1,2-DCA)	• hexachloroethane (HCA)
• 1,1-dichloroethane (1,1-DCA)	• pentachlorophenol (PCP)
• vinyl chloride (VC)	• benzene
• carbon tetrachloride (CCL_4)	• toluene
• chloroform (CF)	

13. The organic contaminants in groundwater summarized in Tables 2 are generally the result of numerous historic spills and leaks to the ground that have occurred throughout the facility during the course of operations. Their sources are generally not the discrete SWMUs regulated under this Order.

14. Mercury and methyl mercury have also been detected in groundwater in the northern portion of the site. The source of mercury in groundwater was Dow's former chlor-alkalai plant, which is located at the southwestern corner of the Former Outfall Pond (Figure 3). The Former Outfall Pond is a SWMU that was closed in compliance with WDR Order No. 98-059. Dow has submitted a technical report that presents an evaluation of mercury impacts and hydrogeologic conditions in the vicinity of the Former Outfall Pond *(Report on Evaluation of Mercury Flux at the Former Outfall Pond, June 2001*). The need for further investigation and/or corrective action will be evaluated based on the extent and magnitude of mercury impacts. Table 3 summarizes the maximum reported mercury and methyl mercury concentrations in groundwater in each transmissive zone in the vicinity of the former chlor-alkali plant and the Former Outfall Pond.

Table 3 Maximum Mercury and Methyl Mercury Concentrations in Groundwater in the Vicinity of the Former Chlor-Alkalai Plant and the Former Outfall Pond at the Dow Pittsburg Facility

	Maximum Concentrations During Most Recent Characterization (2000–2001) (ug/l)		
	Water Table	**Mid-Depth**	**Deep**
Mercury	486	0.39	---
Methyl Mercury	3.6	0.00058	---

'---' No Data.

SURFACE WATER IMPACTS

15. VOCs have been detected in surface water grab samples collected in Bundesen Bay. Additionally, grab samples from a groundwater seep in the southwestern corner of Bundesen Bay contained significant VOC concentrations. The discharge of VOC-contaminated groundwater beneath the Dow facility into Bundesen Bay is believed to be the source of VOC impacts to surface water in Bundesen Bay.

SOLID WASTE MANAGEMENT UNITS (SWMUs)

16. In 1986 the USEPA prepared a RCRA Facility Assessment (RFA) report that identified 25 SWMUs at the Dow Pittsburg facility. In June 1987, the Regional Board issued WDR Order No. 87-064 requiring Dow to characterize the areas of potential concern identified in the RFA report and, if necessary, evaluate alternatives for remediation. In response, Dow has submitted various reports addressing RWQCB requirements for SWMU investigations and closures. Much of the work is summarized in a twelve-volume *Remedial Feasibility Investigation and Corrective Action Program* report submitted in December 1988. Dow's March 1995 *Corrective Measures Study Report* presents various alternatives for closing SWMUs and for monitoring and maintenance of closed SWMUs.

17. In 1998, the Regional Board adopted WDR Order No. 98-059 addressing closure and maintenance of three of the twenty-five identified SWMUs. The SWMUs addressed in WDR Order No. 98-059 include the Class III Northeast Landfill, which is currently active, the Hexachlorobenzene Trench, which has since been closed, and the Former Outfall Pond, which has also been closed (Figure 4). Table 4 summarizes the twenty-five identified SWMUs at the Dow facility and the status of each. Requirements in WDR Order No. 98-059 pertaining to these solid waste management units have been satisfied.

Table 4 SWMUs Identified at the Dow Pittsburg Facility

RFA Unit No.	SWMU Description	Action Required	Status/Comments
4.1 - 4.7	Aboveground Storage Tanks (6, 15, 21, 102, 156, 408, 506-A, 506-B)	None	All tanks closed and removed.
4.8	Storm Sewer System	Maintenance/ Retrofitting as Needed	Ongoing program to retrofit old pipelines to prevent infiltration of groundwater contaminants into sewer system.
4.9	Former Solar Evaporation Ponds (Class I - Monofill)	Post-Closure Maintenance	The six surface Impoundments were closed between 1988 and 1990 pursuant to *Closure Plan - Class 1 Surface Impoundments* as amended, dated November 1, 1988, approved jointly by DTSC and RWQCB.
4.10	Central Landfill (Class II)	Post-Closure Maintenance	Closure performed simultaneously with closure of adjacent Solar Evap. Ponds (shares hydraulic containment system). Closure is managed pursuant to *Final Closure of the Central Landfill at the Dow Pittsburg Facility*, dated October 20, 1997.
4.11	Northeastern Landfill (Class II)	Active; operational Maintenance and Monitoring	Dow submitted a report titled *Preliminary Closure Plan and Post-closure Maintenance Plan for the Northeast Landfill*, dated March 24, 1999 in compliance with WDR Order No. 98-059.
4.12	Hexachlorobenzene Disposal Trench (Class I)	Post-Closure Maintenance & Monitoring	Final cover installed in July 1998 in compliance with WDR Order No. 98-059 as documented in *Hexachlorobenzene Trench, Documentation of Final Cover*, dated December 21, 1998.
4.13	Inactive Hazardous Waste Disposal Area – chemical research disposal trench (Class I)	None	Closed in 1960's. Area is covered with asphalt. Not a significant source of groundwater contamination. Partially covered by a concrete-diked tank farm and buildings.
4.14	Former Municipal Landfills (Northwestern and North Central)	None	Contain mostly construction waste, but dates of disposal, volume, and type of wastes disposed of are not documented.
4.15	Former Brine Process Ponds	None	Sediment removed. Ponds backfilled with clean soil. Concrete slab constructed over backfilled ponds.

Table 4 (continued) SWMUs Identified at the Dow Pittsburg Facility

RFA Unit No.	SWMU Description	Action Required	Status/Comments
4.16 4.17	Former Latex Coagulation Ponds and Latex Firewater Reservoir	None	Sludge and visibly contaminated soil excavated and ponds backfilled with clean soil.
4.18	Sym-tet Fire Water Receiving Impoundment	None	Closed pursuant to *Closure Report Sym-tet Fire Water Impounding Basin*, dated September 30, 1987.
4.19	Former Outfall Pond	Post-Closure Maintenance & Monitoring	Closed and capped in Oct. 2000 in compliance with WDR Order No. 98-059 as documented in *Former Outfall Pond Cap Construction Project Closure Report*, dated December 2000.
4.20	Shock Pond	None	Stormwater detention pond replaced with concrete holding basin.
4.21	Former Drum Storage Area	None	Closed. No evidence of spills or releases.
4.22	E-002 Pond	None	River water clarification area. No hazardous wastes ever deposited.
4.23	Inactive Ethyl Corporation Property (900/1000 Block)	Further evaluation to determine need for remediation	Ethyl Corp. stored chemicals used to manufacture tetraethyl lead in this area prior to Dow's purchase of the property in 1982. Approx. 70% of area is covered with asphalt pavement. Groundwater extraction wells have been installed to contain an isolated low-level VOC plume. Lead has not been detected in groundwater since 1992. Potential for use of bioremediation to be investigated.
4.24	Pioneer Rubber Plant	None	Closed.
4.25	Rail Car Washing Area	None	Closed. No evidence of releases.

Class II Northeast Landfill

18. The Northeast Landfill is currently the only active SWMU at the Dow facility. It is bounded by New York Slough to the north, Third Street to the south, J Street to the west, and the Kirker Creek Remnant Channel to the east (Figure 4). The unlined landfill spans approximately 15 acres and has been in use since the 1930's. Materials disposed of in the landfill include inert wastes such as concrete rubble, brick, wood, miscellaneous construction debris and excavation dirt, asphalt paving, and brine mud. Historically, garbage and other miscellaneous refuse were disposed of in the landfill during the 1950s and 1960s. Antioch Harbor dredge bottoms were reportedly placed in the landfill in the 1970s.

19. Currently, disposal of construction materials into the Northeast Landfill is limited to about 100 cubic yards per year. The brine mud, a waste product of the on-site Brine Plant, is currently disposed of in the Northeast Landfill at an approximate rate of 125 cubic yards per year. The Brine Plant produces a concentrated commercial brine solution and condensate used as boiler feed at an on-site power plant. Feed to the Brine Plant consists of extracted groundwater treated to remove VOCs and SVOCs, treated storm water runoff that has contacted chemical process units, plus various maintenance and scrubber waters that have been treated in the site's wastewater processing units. The brine mud waste has a moisture content of 45%, and a pH of about 11. Dow estimates 40,000 cubic yards of remaining capacity are left in the landfill and plans to continue operation indefinitely. Dow has installed a French drain extraction system around the perimeter of the landfill in compliance with the state's general construction standards for landfill containment structures. In March 1999, Dow submitted a preliminary closure and post-closure maintenance plan for the Northeast Landfill in compliance with WDR Order No. 98-059.

BASIN PLAN AND RESOLUTIONS

20. The Regional Board adopted a revised Water Quality Plan for the San Francisco Bay Basin (Basin Plan) in June 21, 1995. This updated and consolidated plan represents the Regional Board's master water quality control planning document. The State Water Resource Control Board and the Office of the Administrative Law approved the revised Basin Plan on July 20 and November 13, respectively, of 1995. A summary of revisions to regulatory provisions is contained in Section 3912, Title 23 of the California Code of Regulations. The Basin Plan defines beneficial uses and water quality objectives for waters of the State, including surface water and groundwater.

21. The Basin Plan provides that all groundwaters are considered suitable, or potentially suitable, for municipal or domestic water supply (MUN) and that, in making any exceptions, the Regional Board will consider the criteria referenced in Regional Board Resolution No. 89-39, "Sources of Drinking Water", where:

    (a) The total dissolved solids exceed 3,000 mg/l (5,000 μS/cm, electrical conductivity), and it is not reasonably expected by the Regional Board that the groundwater could supply a public water system, or

    (b) There is contamination, either by natural processes or human activity (unrelated to the specific pollution incident), that cannot reasonably be treated for domestic use using best management practices or best economically achievable treatment practices, or

    (c) The water source does not provide sufficient water to supply a single well capable of producing an average, sustained yield of 200 gallons per day.

22. The groundwater beneath the Dow site north of the Atchison Topeka and Santa Fe Railway line has TDS/electrical conductivity that is significantly higher than the 3000 mg/l (5000 μS/cm) levels considered as maximums for suitability for municipal or domestic water supply. Furthermore, it is not reasonable to expect that the groundwater could supply a public water system because significant pumping of the aquifer is likely to result in

saltwater intrusion that would further degrade water quality. There is evidence that past pumping of the aquifer in the early 1900s resulted in increased salinity. Therefore, the groundwater beneath the Site satisfies the Basin Plan exemption criteria cited in Finding No. 21(a).

BENEFICIAL USES OF SURFACE WATER AND GROUNDWATER

Groundwater

23. The Site resides within the boundaries of the Pittsburg Plain Groundwater Basin, as defined in the Basin Plan. The existing and potential beneficial uses identified for groundwater in this basin, according to the Basin Plan, include:

- Municipal and Domestic Supply (MUN)
- Industrial Process Supply (PROC)
- Industrial Service Supply (IND)
- Agricultural Supply (AGR)

Surface Water

24. The northern portion of the Dow facility is bounded by New York Slough. New York Slough is located within the San Francisco Bay/Delta system between Suisun Bay to the west and the confluence of the Sacramento and San Joaquin Rivers to the east. Contra Costa Water District maintains a drinking water intake at Mallard Slough four miles west of the Dow facility. The Mallard Slough intake is used to augment the main supply primarily during winter and spring months when the salinity is low. The existing and potential beneficial uses identified for surface water in New York Slough and contiguous water bodies, according to the Basin Plan, include:

- Ocean, Commercial, and Sport Fishing (COMM)
- Preservation of Rare and Endangered Species (RARE)
- Water Contact Recreation (REC1)
- Non-Water Contact Recreation (REC2)
- Fish Migration (MIGR)
- Fish Spawning (SPWN)
- Wildlife Habitat (WILD)
- Estuarine Habitat (EST)
- Marine Habitat (MAR)
- Navigation (NAV)
- Industrial Process Supply (PROC)
- Industrial Service Supply (IND)
- Groundwater Recharge (GWR)
- Agricultural Supply (AGR)
- Municipal and Domestic Supply (MUN)

CALIFORNIA ENVIRONMENTAL QUALITY ACT

25. This action is exempt from provisions of the California Environmental Quality Act pursuant to Section 15301, Title 14 of the California Code of Regulations.

NOTICIFICATION AND PUBLIC MEETING

26. The Regional Board has notified the Discharger and interested agencies and persons of its intent to update waste discharge requirements and has provided them with an opportunity to submit their written views and recommendations.

27. The Regional Board, in a public meeting, heard and considered all comments pertaining to the proposed waste discharge requirements for the Site.

IT IS HEREBY ORDERED pursuant to the authority in Section 13263 of the California Water Code (CWC), Title 27, Division 2, Subdivision 1 of the California Code of Regulations (27CCR), and Chapter 15, Division 3, Title 23 of the California Code of Regulations (Chapter 15) that the Discharger, its agents, successors, and assigns shall meet the applicable provisions contained in 27CCR, Chapter 15, and Division 7 CWC, and shall comply with the following:

A. PROHIBITIONS

1. The treatment, storage, and discharge of groundwater shall not create a condition of pollution or nuisance as defined in Section 13050(m) CWC, nor degrade the quality of the groundwater in the aquifers to which it is injected.

2. Untreated or inadequately treated groundwater shall not create a condition of pollution or nuisance as defined in Section 13050(m) CWC, nor degrade the quality of waters of the State or of the United States.

3. The relocation of wastes to or from waste management units shall not create a condition of pollution or nuisance as defined in Section 13050 (1) and (m) CWC. Any relocated waste shall not be placed in or allowed to contact ponded water from any source whatsoever. Wastes shall not be relocated to any location where they can be discharged into waters of the State or of the United States.

4. Leachate and ponded water containing leachate or in contact with waste shall not be discharged to waters of the State or of the United States unless specifically authorized under an NPDES permit.

5. The creation of any new waste management units is prohibited without prior Regional Board staff concurrence.

6. Excavation within or reconfiguration of any existing waste management unit is prohibited without prior concurrence of Regional Board staff.

7. The Discharger, or any future owner of the site, shall not cause the following conditions to exist in waters of the State or of the United States at any place outside existing waste management units:

   a. Surface Waters:

      (1) Floating, suspended, or deposited macroscopic particulate matter or foam
      (2) Bottom deposits or aquatic growth
      (3) Adversely alter temperature, turbidity, or apparent color beyond natural background levels
      (4) Visible, floating, suspended, or deposited oil or other products of petroleum origin
      (5) Toxic or other deleterious substances to be present in concentrations or quantities that may cause deleterious effects on aquatic biota, wildlife, or waterfowl, or that render any of these unfit for human consumption either at levels created in the receiving waters, or as a results of biological concentrations

   b. Groundwater:

      (1) Further degradation of groundwater quality and/or substantial worsening of existing groundwater impacts
      (2) Further significant migration of pollutants through subsurface transport

8. Discing of landfill covers is prohibited without prior concurrence of Regional Board staff. Alternate methods of controlling vegetative growth, which do not affect the integrity of the landfill cap, shall be utilized.

B. SPECIFICATIONS

1. All reports submitted pursuant to this Order shall be prepared under the supervision of and signed by a California registered civil engineer, registered geologist, or certified engineering geologist.

2. Surface drainage from tributary areas and internal site drainage from surface or subsurface sources shall not contact or percolate through wastes during the life of the site.

3. Containment, collection, drainage, and monitoring systems at the facility, shall be maintained as long as leachate is present and poses a threat to water quality.

4. Final cover systems for waste management units shall be graded and maintained to promote lateral runoff and prevent ponding and infiltration of water.

5. The Discharger shall install any reasonable additional groundwater and leachate monitoring devices required to fulfill the terms of any future Self-Monitoring Program issued by the Executive Officer.

6. The Discharger shall maintain all devices or designed features, installed in accordance with this Order such that they continue to operate as intended without interruption, except for limited periods of maintenance and repair.

7. The Discharger shall conduct monitoring activities according to the Self-Monitoring and Reporting Program attached to this Order and as may be amended by the Executive Officer, to verify the effectiveness of groundwater remediation and containment systems and waste management unit closure systems.

8. In the event of a release of a constituent of concern beyond the Point of Compliance (27CCR, Section 20405), the site begins a Compliance Period (27CCR, Section 20410). During the Compliance Period, the Dischargers shall perform an Evaluation Monitoring Program and a Corrective Action Program.

9. Landfill gases shall be adequately vented, removed from the landfill, or otherwise controlled to minimize the danger of explosion, adverse health effects, nuisance conditions, or the impairment of beneficial uses of water.

10. At any time, the Discharger may file a written request (including supporting documentation) with the Executive Officer, proposing modifications to the attached Self-Monitoring and Reporting Program. If the proposed modifications are acceptable, the Executive Officer may issue a letter of approval that incorporates the proposed revisions into the Self-Monitoring and Reporting Program.

11. The Discharger shall notify the Regional Board at least six months prior to beginning final closure activities for any waste management unit.

12. The Discharger shall comply with all applicable provisions of 27CCR that are not specifically referred to in this Order.

13. The Discharger shall provide a minimum of two surveyed permanent monuments near the landfill from which the location and elevation of wastes, containment structures, and monitoring facilities can be determined throughout the operation and post-closure maintenance period. A licensed land surveyor or registered civil engineer shall install these monuments.

14. The Discharger shall notify the Regional Board immediately of any failure occurring in any waste management unit. Any failure that threatens the integrity of any containment and control facilities, structures, or devices, shall be promptly corrected after approval of the method and schedule by the Executive Officer.

15. The Discharger shall maintain the facility so as to prevent a statistically significant increase in water quality parameters at points of compliance as provided in 27CCR, Section 20420.

16. All Class I units must comply with the applicable Chapter 15 and RCRA requirements.

C. PROVISIONS

1. **Self-Monitoring Program**: The Discharger shall comply with the updated Self-Monitoring Program (SMP) as attached to this Order (Part A and Part B). The attached SMP is designed to collect information necessary to evaluate the integrity of active and closed waste management units. The attached SMP is also designed to detect any discharges from waste management units and the significance and stability of any discharge. The attached SMP may be amended at the discretion of the Executive Officer, as necessary to better evaluate site conditions and discharges.

COMPLIANCE DATE: IMMEDIATE

2. **Demonstration of Hydraulic Containment and a Five-Foot Separation from Groundwater**: The Discharger shall submit technical reports semi-annually, which demonstrate, to the satisfaction of the Executive Officer, the maintenance of hydraulic containment of groundwater beneath the Class I Former Solar Evaporation Ponds (Monofill) and the Class II Central Landfill. Each semi-annual technical report shall also demonstrate the maintenance of a minimum five-foot separation between the base of each unit and the groundwater table. Demonstration of these requirements shall be made graphically and with tabulated data, as follows:

   a. a piezometric surface contour map showing monitoring wells/locations, extraction wells/locations, perimeter drains, and water-level measurements
   b. a table or tables that include all monitoring wells/locations, corresponding water-level measurements, measurement dates, extraction wells/locations, individual and total extraction rates, the total extraction volume for the semi-annual period, and the cumulative extraction volumes.

   The above information may be incorporated into each semi-annual self-monitoring report required pursuant to Provision C.1 of this Order in lieu of a separate technical report. Demonstration of hydraulic containment and separation from groundwater for these units must be made using data collected on a semi-annual or more frequent basis.

COMPLIANCE DATE: August 31 and March 1 of each year

3. **Constituents of Concern (COCs)**: The Discharger shall submit a technical report, acceptable to the Executive Officer, that presents a complete list of COCs for each SWMU monitored pursuant to the SMP attached to this Order, or as may be modified by the Executive Officer. COCs must be determined based on the character of the wastes and leachate in each SWMU. The COCs for each SWMU must also be validated in a technical report, acceptable to the Executive Officer, to be submitted once every five years.

COMPLIANCE DATE: March 1, 2003, then every five years thereafter

4. **Financial Assurance:** The Discharger shall obtain and maintain a Financial Assurance Instrument, acceptable to the Executive Officer, until the end of the Post-Closure Maintenance Period for each waste management unit subject to 27CCR, Chapter 6, Subdivision 1, Division 2, and Chapter 15, Section 2550.0. The Discharger shall submit a report every five years that either validates the Instrument's ongoing viability or proposes and substantiates any needed changes (e.g., a documented increase in the monitoring systems' ability to provide reliable early detection of a release can cause a decrease in the Instrument's financial coverage). For the purposes of planning the amount of the fund, the Discharger shall assume a post-closure period of at least 30 years. However, the post-closure maintenance period shall extend as long as the wastes pose a threat to water quality.

COMPLIANCE DATE: August 31, 2002, then every five years thereafter

5. **Report of Waste Discharge:** The Discharger shall submit a technical report, acceptable to the Executive Officer, describing any proposed material change in the character, location, or volume of a discharge, or in the event of a proposed change in site use or development [CWC Section 13260(c)]. A material change includes, but is not limited to, the following:

   a. Addition of a major industrial waste discharge to discharge of essentially domestic sewage, or the addition of a new process or product by an industrial facility resulting in a change in the character of the waste
   b. Significant change in disposal method, e.g., change from a land disposal to a direct discharge to water, or change in the method of treatment which would significantly alter the characteristics of the waste
   c. Significant change in the disposal area, e.g., moving the discharge to another drainage area, to a different water body, or to a disposal area significantly removed from the original area potentially causing different water quality or nuisance problems
   d. Increase in flow beyond that specified in the waste discharge requirements.
   e. Increase in area or depth to be used for solid waste disposal beyond that specified in the waste discharge requirements

   The technical report shall describe the project, identify key changes to the design that may impact waste management units, and specify components of the design necessary to maintain integrity of waste management unit covers and prevent water quality impacts. No material changes to the site shall be made without approval by the Executive Officer.

COMPLIANCE DATE: 120 days prior to any material change

6. **Stormwater Control Plans:** For each proposed development greater than 5 acres in size, the Discharger shall submit a Notice of Intent to the State Water Resources Control Board, submit a Storm Water Pollution Prevention Plan acceptable to the Executive Officer, and implement Best Management Practices (BMPs) for the control of stormwater, in accordance with requirements specified in the State Water Resources Control Board General Permit for Storm Water Discharges Associated with Construction Activities (NPDES Permit No. CAS000002).

COMPLIANCE DATE: 30 days prior to construction

7. **Availability**: A copy of these waste discharge requirements shall be maintained at the discharge facility and be available at all times to operating personnel. [CWC Section 132631]

8. **Change In Ownership**: The Discharger must notify the Executive Officer, in writing at least 30 days in advance of any proposed transfer of this Order's responsibility and coverage to a new Discharger. The notice must include a written agreement between the existing and new Discharger containing a specific date for the transfer of this Order's responsibility and coverage between the current Discharger and the new Discharger. This agreement shall include an acknowledgment that the existing Discharger is liable for violations up to the transfer date and that the new Discharger is liable from the transfer date on. [CWC Sections 13267 and 13263]

9. **Revision**: These waste discharge requirements are subject to review and revision by the Regional Board. [CCR Section 13263]

10. **Termination**: Where the Discharger becomes aware that it failed to submit any relevant facts in a Report of Waste Discharge or submitted incorrect information in a Report of Waste Discharge or in any report to the Regional Board, it shall promptly submit such facts or information. [CWC Sections 13260 and 13267]

11. **Vested Rights**: This Order does not convey any property rights of any sort or any exclusive privileges. The requirements prescribed herein do not authorize the commission of any act causing injury to persons or property, do not protect the Discharger from his liability under Federal, State or local laws, nor do they create a vested right for the Discharger to continue the waste discharge. [CWC Section 13263(g)]

12. **Severability**: Provisions of these waste discharge requirements are severable. If any provisions of these requirements are found invalid, the remainder of these requirements shall not be affected.

13. **Operation and Maintenance**: The Discharger shall, at all times, properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the Discharger to achieve compliance with conditions of this Order. Proper operation and maintenance includes effective performance, adequate funding, adequate operator staffing and training, and adequate laboratory and process controls including appropriate quality assurance procedures. This provision requires the operation of

backup or auxiliary facilities or similar systems only when necessary to achieve compliance with the conditions of this Order. [CWC Section 13263(f)]

14. **Reporting of Hazardous Substance Release**: If any hazardous substance is discharged in or on any waters of the State, or discharged or deposited where it is, or probably will be, discharged in or on any waters of the State, the Discharger shall report such discharge to the Regional Board by calling (510) 286-1255 during regular office hours (Monday through Friday, 8:00 to 5:00). A written report shall be filed with the Regional Board within five working days. The report shall describe: the nature of the hazardous substance, estimated quantity involved, duration of incident, cause of release, estimated size of affected area, nature of effect, corrective actions taken or planned, schedule of corrective actions planned, and persons/agencies notified.

15. **Entry and Inspection**: The Discharger shall allow the Regional Board, or an authorized representative upon the presentation of credentials and other documents as may be required by law, to:

    a. Enter upon the Discharger's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of this Order;
    b. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this Order;
    c. Inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this Order; and
    d. Sample or monitor at reasonable times, for the purposes of assuring compliance with this Order or as otherwise authorized by the California Water Code, any substances or parameters at any location. [CWC Section 13267]

16. **Monitoring Devices**: All monitoring instruments and devices used by the Discharger to fulfill the prescribed monitoring program shall be properly maintained and calibrated as necessary to ensure their continued accuracy. All flow measurement devices shall be calibrated at least once per year, or more frequently, to ensure continued accuracy of the devices. Annually, the Discharger shall submit to the Executive Officer a written statement signed by a registered professional engineer certifying that all flow measurement devices have been calibrated and will reliably achieve the accuracy required.

17. **Analytical Methods**: Unless otherwise permitted by the Regional Board Executive officer, all analyses shall be conducted at a laboratory certified for such analyses by the State Department of Health Services. The Regional Board Executive Officer may allow use of an uncertified laboratory under exceptional circumstances, such as when the closest laboratory to the monitoring location is outside the State boundaries and therefore not subject to certification. All analyses shall be required to be conducted in accordance with the latest edition of "Guidelines Establishing Test Procedures for Analysis of Pollutants" [40 CFR Part 136] promulgated by the U.S. Environmental Protection Agency. [CCR Title 23, Section 2230]

18. **Discharges To Navigable Waters**: Any person discharging or proposing to discharge to navigable waters from a point source (except for discharge of dredged or fill material subject to Section 404 of the Clean Water Act and discharge subject to a general NPDES permit)

must file an NPDES permit application with the Regional Board. [CCR Title 2 Section 223571]

19. **Endangerment of Health or the Environment**: The Discharger shall report any noncompliance that may endanger health or the environment. Any such information shall be provided orally to the Executive officer within 24 hours from the time the Discharger becomes aware of the circumstances. A written submission shall also be provided within five days of the time the Discharger becomes aware of the circumstances. The written submission shall contain a description of the noncompliance and its cause; the period of noncompliance, including exact dates and times, and if the noncompliance has not been corrected; the anticipated time it is expected to continue and steps taken or planned to reduce, eliminate, and prevent recurrence of the noncompliance. The Executive Officer, or an authorized representative, may waive the written report on a case-by-case basis if the oral report has been received within 24 hours. The following occurrences must be reported to the Executive Officer within 24 hours;

    a. Any bypass from any portion of the treatment facility.
    b. Any discharge of treated or untreated wastewater resulting from sewer line breaks, obstruction, surcharge or any other circumstances.
    c. Any treatment plant upset that causes the effluent limitation of this Order to be exceeded. [CWC Sections 13263 and 13267]

20. **Document Distribution**: Copies of all correspondence, technical reports, and other documents pertaining to compliance with this Order shall be provided to the following agencies:

    a. RWQCB - San Francisco Bay Region
    b. Cal/EPA Department of Toxic Substances Control

    The Executive Officer may modify this distribution list as needed.

21. **Duty to Comply**: The Discharger shall comply immediately, or as prescribed by the time schedule below, with all Prohibitions, Specifications and Provisions of this Order. All required submittals must be acceptable to the Executive Officer. The Discharger must also comply with all conditions of these waste discharge requirements. Violations may result in enforcement actions, including Regional Board Orders or court Orders requiring corrective action or imposing civil monetary liability, or in modification or revocation of these waste discharge requirements by the Regional Board. (CWC Section 13261, 13263, 13265, 13268, 13300, 13301, 13304, 13340, 13350).

22. **Requests for Technical Reports**: All technical and monitoring reports required by this Order are requested pursuant to Section 13267 of the California Water Code. Failure to submit reports in accordance with schedules established by this Order or failure to submit a report of sufficient technical quality to be acceptable to the Executive Officer may subject the Dischargers to enforcement action pursuant to Section 13268 of the California Water Code.

23. This Order supersedes WDR Order Nos. 97-123 and 98-059. Order Nos. 97-123 and 98-059 are hereby rescinded.

I, Loretta K. Barsamian, Executive Officer, do hereby certify that the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, San Francisco Bay Region, on January 23, 2002.

_____

Loretta K. Barsamian
Executive Officer

Appendix F:
TRC Staff and Environmental Professional Qualifications/Resumes

DRAFT

GARY LIEBERMAN, CEM

EDUCATION

B.S., Geology, Sonoma State University, 1987

PROFESSIONAL REGISTRATIONS/CERTIFICATIONS

Certified Environmental Manager, Nevada (#2052), 2007

AREAS OF EXPERTISE

Mr. Lieberman, CEM has program management and technical experience in the following general areas:

- Environmental and Regulatory Compliance
- Environmental Assessments and Audits
- Site Remediation Design and Implementation
- Construction Management and Oversight
- Groundwater Remediation
- Hazardous Waste Management and Disposal
- Environmental Health and Safety

REPRESENTATIVE EXPERIENCE

Mr. Lieberman has over 34 years of experience and responsibility in environmental consulting, including five years of direct experience with the Port. His qualifications include extensive hands-on experience planning, coordinating, directing, and conducting contaminated site investigations, asbestos and lead surveys and abatement programs, and performing environmental and regulatory compliance and audits, environmental site assessments (ESAs), and re-development/Brownfields work. Mr. Lieberman's work sites have included hazardous waste, office buildings, fuel and chemical storage, agricultural, food processing, mining, and telecommunications. His clients have included real estate, petroleum and chemical companies, pharmaceutical, financial, and insurance institutions in the private sector and government agencies at the local and federal levels, including the U.S. Air Force, U.S. Coast Guard, and U.S. Army. He currently serves in the capacity of Senior Project Manager with TRC's Environmental, Construction, and Remediation Division with responsibility for project and client management.

Port of Oakland, As-Needed Environmental Services – Oakland, CA

TRC is working on the Risk Management Plan (RMP) Location 167B Soils Remediation Project. The scope includes investigative, waste profiling, remediation oversight, air monitoring, and reporting services for remediation of lead contaminated soil. The lead impacts were speculated to have been introduced to the site by the use of lead oxides historically used in paint by the ship building industry as rust inhibitors, resulting in the discharge of lead-containing substances into shallow soil (fill) at the site. The selected remedial remedy consisted of removing and disposing of soil with total lead concentrations exceeding the remediation goal at off-site disposal facilities permitted to receive the waste. TRC's initial scope included assisting the Port with in-situ waste profiling for the planned excavation of soil in an effort to delineate areas of soil for disposal as non-RCRA versus RCRA hazardous wastes. The objective was to confidently "pre-profile" soils by location and depth to facilitate direct-loading during remedial excavation activities.

City of Oakland, Public Works, On Call Environmental Services – Oakland, CA (Project Manager)

Facilitated the pick-up and disposal of universal and hazardous materials from various City of Oakland buildings and facilities. Coordinated directly with disposal contractors to pick-up wastes in a timely manner and provide documentation of pick-up and disposal to City personnel.

Environmental Health & Safety (EH&S) and Compliance Outsource Support Services, Shorenstein Realty Services, Inc. – Multiple Locations, United States (Project Manager)

Mr. Lieberman is responsible for assisting with compliance, EH&S, and acquisition and divestiture activities, as well as facilitating staff to support their nationwide building portfolio. Since 1999, he has provided EH&S, compliance and regulatory and CUPA support services for Shorenstein's owned and managed properties in San Francisco and nationwide. His services include CUPA and DTSC annual submittals, asbestos and lead-based paint surveys, indoor air quality studies, preparation of survey reports, preparation of abatement specifications, compliance air sampling, preparation of final closure letters and reports, building health and safety and regulatory audits, and emergency response for chemical spills and exposures, and a naturally occurring asbestos analysis for a redevelopment project with serpentinite fill. Additional services included development of an EH&S policy, plan, and procedures manual and facilitation of rollout to more than 600 client staff nationwide. Mr. Lieberman supports monitoring of pending regulatory developments, working with client management to communicate information throughout organization, and providing corporate EH&S functions for client's owned and managed properties nationwide.

Phase I Environmental Site Assessments, Regulatory Audits and Due Diligence, JDS Uniphase – Various Locations, United States (Project Manager)

Mr. Lieberman facilitated completion of Phase 1 ESAs, compliance audits, and environmental due diligence support services in the Bay Area, United States, Canada, Europe, and Far East. His services included a broad range of disciplines to conduct comprehensive due diligence, compliance, and EH&S assessments associated with real property mergers, acquisitions, and divestitures. Protocols were developed from nationally recognized industry standards and customized to fit the needs unique to each transaction. The services included providing JDSU with a clear understanding of the identified and potential transactional liabilities, and a cost-effective roadmap to solving the challenges. The Phase I ESAs were performed in accordance with ASTM-1527-05 and -1527-13 and the due diligence activities were often performed in quick turnaround to meet the needs of the transaction.

MKS Instruments Onsite Compliance and H&S Support – Milpitas, CA (Project Manager)

Mr. Lieberman is currently providing periodic onsite compliance and health and safety support for the facility. His responsibilities include performing periodic facility compliance checks to verify all applicable permits are in place; preparation of internal safety summary document; assisting onsite staff with determining if documentation of storage and labeling procedures in the hazardous materials waste storage areas are being followed; performing weekly inspections to document site conditions, including completing internal Hazardous Waste Storage Area and Facility Inspection Checklist sheets; assisting MKS with general regulatory coordination, permitting activities, and EH&S support, when requested; and assisting with a facility Lockout/Tagout and Machine Guarding Audit. Mr. Lieberman will assist the facility with the training of a new full-time Health and Safety and Regulatory Compliance employee when a candidate is identified.

BRIAN W. MO

EDUCATION

B.S., Earth Science, University of California, Santa Barbara 2021

AREAS OF EXPERTISE

Mr. Brian W. Mo has technical experience in the following general areas:

- Environmental Site Assessments, Phase I & II
- Field Investigation Preparation
- Field Sampling Activities
- Well Installation/Abandonment
- Technical Writing and Reporting
- ArcGIS, QGIS, gINT

REPRESENTATIVE EXPERIENCE

Mr. Mo is a graduate of the University of California, Santa Barbara, where he received a Bachelor of Science studying geology and hydrology while conducting paleoclimate, geochemical, and structural tectonic research in Death Valley. He serves as a TRC Staff Geologist in the Concord office and is responsible for assisting with Phase I & II Environmental Site Assessments (ESAs), ongoing site investigations, field sampling, data collection and management for related reporting. Mr. Mo's fieldwork experience includes oversight of well installations, well development, well abandonment, soil logging to ASTM standards, and soil sampling. His other responsibilities include writing various reports, compiling and interpreting data, and drafting potentiometric and isoconcentration contour maps.

Rombauer Vineyards Phase I ESAs – Napa, CA (Staff Geologist: 2022 – 2023)

Mr. Mo assisted in the preparation of a Phase I ESAs for Koerner Rombauer Investments, LLC / Rombauer Vineyards, Inc. for due diligence purposes. His responsibilities included review of environmental databases and regulatory agency records, review of previous environmental reports, historical source review (i.e., aerial photographs, topographic maps), description of historical site conditions, and preparation of the written report summarizing findings.

TForce Phase II ESAs – Various Locations, NV, CA (Staff Geologist: 2021 – 2022)

Mr. Mo assisted in the preparation of a Phase II ESAs for TForce Holdings USA, Inc. for due diligence purposes. His responsibilities included implementing remedial actions as required with coordinating removal of leaking underground storage tanks, investigative sampling, and preparation of the written report summarizing findings.

Recology Hay Road Landfill – Vacaville, CA (Staff Geologist: 2021 – Present)

Mr. Mo has served as a staff geologist overseeing the installation and destruction of monitoring wells at this site. His duties include soil logging in the field as well as associated reporting of well completion and subsequent analytical data.

GBF Landfill Groundwater and Soil Vapor Monitoring – Antioch, CA (Staff Geologist: 2021 – Present)

Mr. Mo has served as a TRC staff geologist overseeing the ongoing groundwater and soil vapor monitoring at this site. His duties comprise of coordinating sampling events, overseeing installation and destruction of monitoring wells, soil logging, drafting gINT logs, and assisting in completion of semi-annual reports.

Wilbur-Ellis Helm Soil and Groundwater – Helm, CA (Staff Geologist: 2021 – 2022)

Mr. Mo has served as a staff geologist overseeing the installation and destruction of monitoring wells at this site. His duties include coordinating soil logging in the field, conducting in-field nitrate examination, and drafting gINT logs.

SPECIALIZED TRAINING

Appendix G:
Environmental Professional Statement

DRAFT

DEFINITION OF ENVIRONMENTAL PROFESSIONAL AND RELEVANT EXPERIENCE THERETO PURSUANT TO 40 CFR 312

(1) a person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases (see §312.1(c)) on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20(e) and (f).

(2) Such a person must: (i) hold a current Professional Engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of 3 years of full-time relevant experience; or (ii) be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries as defined in §312.21 and have the equivalent of 3 years of full-time relevant experience; or (iii) have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of 5 years of full-time relevant experience; or (iv) have the equivalent of 10 years of full-time relevant experience.

(3) An environmental professional should remain current in his or her field through participation in continuing education or other activities.

(4) The definition of environmental professional provided above does not preempt state professional licensing or registration requirements such as those for a professional geologist, engineer, or site remediation professional. Before commencing work, a person should determine the applicability of state professional licensing or registration laws to the activities to be undertaken as part of the inquiry identified in §312.21(b).

(5) A person who does not qualify as an environmental professional under the foregoing definition may assist in the conduct of all appropriate inquiries in accordance with this part if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional provided above when conducting such activities.

Relevant experience, as used in the definition of environmental professional in this section, means: participation in the performance of all appropriate inquiries investigations, environmental site assessments, or other site investigations that may include environmental analyses, investigations, and remediation which involve the understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions and for which professional judgment was used to develop opinions regarding conditions indicative of releases or threatened releases (see §312.1(c)) to the subject property. TRC personnel resume(s) are included in **Appendix F**.

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in §312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Signature of Environmental Professional: _____ Date: _____
